Stinton's Bulbs, Plants & Seeds.

Autumn Catalogue

Stinton & Son

Claremont Nurseries
Newtown-Geelong-Australia
(Sole Proprietor, Fredk. W. Stinton F.R.H.S.)

Hyacinth Dr. Lieber
(Grown in Claremont Bulb Fibre)

STINTON'S "CLAREMONT" ANEMONES

Anemones are gaining increased popularity each year. This is caused by the fact that they flower longer and more freely than many other garden plants. The brilliant show of colour given by them in the Spring repays the gardener for his attention. The plants flower over a long period, giving a profusion of first-class cut blooms. The best cost no more to grow than the cheaper kinds and the prices of the best are very reasonable. STINTON'S "Claremont" Anemones may be seen the world over. They are excellent for bedding purposes and unsurpassed for indoor decoration.

ANEMONE, ST. BRIGID, "CLAREMONT"

Vivid Scarlet

This variety of St. Brigid Anemone is very robust and extremely hardy, thriving where other Anemones will sometimes fail. It bears enormous flowers of a very brilliant scarlet colour over a long flowering period, makes a wonderful bed, and the flowers being produced on long stiff stems makes it admirably adapted for cut flower purposes. For a brilliant effect in the garden this Anemone stands without a peer.

Per hundred, 15/-; Per fifty, 8/-; Per twenty-five, 4/6.

ANEMONE, CORONARIA

"Scarlet Emperor"

A wonderful new Anemone of the Coronaria type. The flowers are of immense size and great substances, and are borne on long, clean stems, reaching as far as 2 feet above the foliage. This new strain has been re-selected and much improved, and now yields flowers up to 6½ inches in diameter. For decorative purposes, either in the garden or in the home, we know of nothing to equal this Anemone.

Per hundred, 15/-; Per fifty, 8/-; Per twenty-five, 4/6.

ANEMONE, CORONARIA

Choice Mixed — Giant Single Poppy-Flowered Variety.

This variety is very hardy, and will flower prolifically all through the season. For freedom of bloom and brilliancy of colour there is nothing in the whole family to equal these plants. Flowers are from 3 to 5 inches across.

Per hundred, 5/-; Per fifty, 3/-; Per twenty-five, 1/9.

ANEMONE "SCARLET EMPEROR"

Stinton's "Claremont" Anemones

Anemone, St. Brigid, "Claremont" Super-
hybrids, Mixed Colours

These Anemones are among the most useful and popular flowers we have today. The "Claremont" strain contains only the very best quality flowers. In form they resemble the St. Brigid Anemone but the flowers are much larger and the whole constitution of the plant has been so improved that it is far above the original type. The colours are brighter and the strain combines the glorious colours of the St. Brigid Anemone with the robust constitution and long flowering qualities of the Coronaria type.

Every shade of the family is included in this wonderful strain ranging from pure white through rose pink, mauve, blue, down to a vivid scarlet and on to a deep maroon. "Claremont" Anemones are famous for their productiveness and long lasting qualities. They are excellent for massing in beds or borders. They last well when cut; the flowers are borne on long stiff stems making them ideal for indoor decoration. The "Claremont" St. Brigid Super-hybrid Anemones are supplied to all parts of the world. The strain is improved from year to year and only the best quality flowers are allowed to remain.

Stinton's "Claremont" Anemones are the best obtainable. Plant the best and be satisfied with your results.

Per hundred, 12/-; Per fifty, 6/6; Per twenty-five, 3/6;

Orders of five hundred and over, 10/- per hundred.

Anemone St. Brigid Claremont Super Hybrids
MIXED COLOURS

(Reproduction from Natural Colour.)

"Claremont" Super-Hybrid No. 5 (Re-Selected Strain)

Stinton's "Claremont" Ranunculus

SUPER - HYBRIDS No. 5

**(Award of Merit, Nurserymen and Seedsmen's Association
of Victoria)**

The Committee of Inspection, which recommended the granting of this Certificate of Merit, stated: "We consider the new strain of Ranunculus, known as the "Claremont" Super-hybrids, to be the best we have yet seen for constitution of plant, harmony of colour, form and size. All inferior quality and poor colouring have been carefully eliminated."

The "Claremont" Ranunculus Super-Hybrids No. 5 are the best obtainable in the world. No other strains have been introduced that are equal in quality to these magnificent hybrids. The mixture of colour embraces all shades of cream, yellow, orange, tango, scarlet, crimson and the beautiful flaked varieties are also prominent.

The robustness of constitution and long flowering qualities place this strain in the highest position possible and is recognised as the leading strain of Ranunculus.

STINTON was the originator of the "Claremont" Ranunculus Super-hybrids No. 5 and when first shown they received the Award of Merit of the Nurserymen and Seedsmen's Association of Victoria.

Orders for this strain of Ranunculus are received from all parts of the world and regular shipments are supplied each season to Great Britain, America and European countries, including even Holland, the recognised hub of the bulb markets of the World. Stinton is continually improving his strain of Ranunculus and each season this strain is further improved. All the poor colours have been eliminated and only the first-class flowers are allowed to remain.

Many other strains of Ranunculus on the market to-day have had the "Claremont" Ranunculus Super-hybrids No. 5 introduced into them. This can be seen and is proved beyond all doubt as a large percentage of the blooms are distinct No. 5 type.

Ranunculus are easy to cultivate and are one of the most satisfactory plants to grow in the garden.

After all, the best is the cheapest in the end as the results will show, and we recommend all those who are thinking of planting Ranunculus to buy the "Claremont" Ranunculus Super-hybrids No. 5 and be sure of perfect satisfaction.

Per hundred, 15/-; per fifty, 8/-; per twenty-five, 4/6; per five hundred, 60/-;
per thousand, 100/-

STINTON'S "CLAREMONT" RANUNCULUS

STINTON'S "CLAREMONT" RANUNCULUS No. 5 in the following mixtures of separate shades :

MIXTURE NO. 1.—This is a mixture of very brilliant Red shades. It is most useful for decorative purposes in the garden, and will yield flowers of wonderful size. For brilliant shades and long-flowering propensities this mixture of red shades cannot be excelled.
Per hundred, 12/-; per fifty, 6/6; per twenty-five, 3/6; per dozen, 2/-.

MIXTURE NO. 2.—This is an entirely new range of colours, which has been separated from our No. 5 Mixture. It comprises all bright Terra-Cotta, Brick Red and Apricot shades. In our nurseries it has proved itself to be the hardiest and longest flowering type of Ranunculus we have yet known. The flowers are not adversely affected by rough weather nor hot days, and its most remarkable feature is that it will flower long after the other strains of Ranunculus have finished up by adverse weather conditions. We have every confidence in recommending it both for decorative purposes in the garden and for exhibition purposes. Its immense flowers and long stems give it a definite advantage over all other lines of Ranunculus we have yet offered.

Per hundred, 20/-; per fifty, 10/6; per twenty-five, 5/6;
per dozen, 3/-.

MIXTURE NO. 3.—This is an assortment of mostly Rose Pink shades, which also comprises Light Pinks, down to almost a Rosy Cerise. We have been for many years trying to select this line of Rose Pink Ranunculus, and we are pleased to say we have now been able to bring it up to a sufficiently high standard for it to be offered for sale. It yields flowers of immense size, which are fully up to exhibition standard, but it is more sensitive of hard weather conditions when in flower than any of the other varieties which we offer. It is, therefore, recommended that it be planted in a position which will not be too open to hot winds and hard, drying condition. This mixture is most attractive for indoor decoration.

Per hundred, 20/-; per fifty, 10/6; per twenty-five, 5/6; per dozen 3/-.

MIXTURE NO. 4.—This mixture comprises bright Yellow shades with a inter-mixture of the flaked varieties. It makes a very brilliant effect in the garden and is free flowering. Flowers fully up to exhibition size are freely borne.
Per hundred, 12/-; per fifty, 6/6; per twenty-five, 3/6; per dozen, 2/-.

"CLAREMONT" RANUNCULUS

Mixture of Tango Shades.

For many years this mixture of Ranunculus has been one of our most popular strains. For garden display it is unexcelled, as all poor colours have been removed. The flowers of this bright, showy mixture make a very brilliant effect in the garden.

Per hundred, 7/-; per fifty, 4/-; per twenty-five, 2/6.

SPECIAL OFFER OF STINTON'S FAMOUS

"CLAREMONT" GARDEN STRAIN RANUNCULUS

A very floriferous strain, comprising all the bright colours from which the lighter shades have been eliminated. The plants flower over a long period. An excellent strain for cutting purposes and we recommend it to the home gardener.

Per hundred, 5/-; per fifty, 3/-; per twenty-five, 1/9.

Whilst the plants are all "rogued" in the young seed beds, there are always a few which fail to flower in the first year, and are, therefore, beyond our control. This is a very small percentage, however, and we feel sure that no unsatisfactory results will be obtained.

OLD DUTCH TULIPS (BREEDER TULIPS).

These long stemmed, large flowered Tulips are all self-coloured and are like the Darwin Tulips in form and shade. They differ especially in their beautiful colours, which vary from finest carmine-pink, terra-cotta and violet blue, to the most glowing orange-bronze colourings.

APRICOT.—Dull bronzy buff, shaded ruddy apricot, with olive base.

BRONZE QUEEN.—Soft buff tinged golden bronze; sturdy habit.

DON PEDRO.—Unique shade of coffee brown, shaded maroon; inside rich mahogany. Large flower.

Page Four.

STINTON'S "CLAREMONT" TULIPS

Tulips are extremely hardy and of easy culture, flowering freely in either sunny or shaded situations. They will do well in most parts of Victoria if care is taken regarding the preparation of the soil and the proper depth of planting. Although the stately Darwins still hold pride of place in popularity, the early single type is gaining steadily in public favour. These are of dwarfier growth than the Darwin, Cottage and Rembrandt Tulips, but come into bloom much earlier. They are admirably adapted for formal beds, pot cultivation, and for growing in bowls with fibre.

CULTURE.

Like the Hyacinth, the Tulip does best in a good rich soil, but perfect drainage is essential. The beds should be thoroughly prepared and dug at least two feet in depth. A heavy dressing of old decayed cow-manure may be dug into the bottom spit of soil, and an application of four ounces of bone dust — not blood and bone — to the square yard mixed with it at the same time. The bulb should be planted at least five inches deep, measuring from the top of the bulb. Too shallow planting has destroyed more Tulips than planting too deep. Bulbs should be planted as early as possible.

DARWIN TULIPS.

For large flower beds and the open border we confidently recommend Darwin Tulips for their stately bearing and rich colours. The varieties offered have been specially selected as being distinct, showy and beautiful, so that our customers need have no hesitation in purchasing, as all are good. The cut blooms form one of the handsomest subjects for decorative purposes and last a long time in water. These Tulips may be successfully grown in pots with soil, and in large bowls with our special fibre.

The varieties Inglescombe Pink, Inglescombe Scarlet, Inglescombe Yellow, are really Cottage included in the following list.

BARTIGON.—Rich carmine red.

CLARA BUTT.—Beautiful soft salmon rose. An excellent variety.

FARNCOMBE SANDERS.—Large fiery-rose-scarlet, inside vivid scarlet, with white centre marked with blue. One of the finest varieties.

INGLESCOMBE PINK.—Delicate rose-pink, tinted salmon.

INGLESCOMBE SCARLET.—Intense scarlet, black base.

INGLESCOMBE YELLOW.—A handsome bold yellow; first quality.

KATE GREENAWAY.—Delicate flesh pink, shaded pale lavender.

LA CANDEUR (White Queen).—Lovely soft white, slightly tinged blush.

LA TULIPE NOIRE ("The Black Tulip").—Velvety maroon-black; a magnificent flower.

MATCHLESS.—Bright rose-pink, fine large flowers.

PHILLIPE DE COMMINES.—Fine form, dark plum, with darker sheen.

PRIDE OF HAARLEM.—Bright rose. An enormous flower of great beauty.

PURITY.—Pale Pink.

REV. EWBANK.—Vivid heliotrope-lilac, lightly bordered. Magnificent flower.

THE SULTAN.—Almost a Black Tulip; strong grower.

VIOLET QUEEN.—Deep violet, large flower.

WILLIAM PITT.—Glowing deep scarlet; blue and white base.

NAMED VARIETIES.—6d. each; 5/- per dozen.

MIXED COLOURS.—4d. each; 3/6 per dozen.

REMBRANDT TULIPS.

A class of Tulips with beautifully coloured flowers. These are generally in delicate shades with stripes of darker colours, forming a lovely combination which gives a very gay effect to the garden. Being tall growers the flowers are well adapted for decorative purposes.

APOLLO.—Rosy lilac and white, with deep carmine markings.

BOUCAINVILLE.—Amaranth blue, striped white.

FLEUR DE MARIE.—Deep rose on pale rose, white ground.

HEBE.—Pale lilac-white, deep brown markings.

LA COQUETTE.—Lilac and white, dark purple markings.

MARIE ANTOINETTE.—Violet and white.

PROCLE.—Violet flamed and white.

ROSY GEM.—Rosy lilac and white, deep red markings.

SALOME.—Carmine rose, with white markings.

SEMELE.—Large flower; fine vivid rose and white.

SULAIIKA.—Red and white stripes.

UNDINE.—Violet, white stripes.

VICTOR HUGO.—Scarlet and white.

ZENOBI.—White, tinted lilac, striped maroon.

NAMED VARIETIES.—6d. each; 5/- per dozen.

MIXED COLOURS.—4d. each; 3/6 per dozen.

LOUIS XIV.—Dark purple, flushed bronze, with broad margin of golden brown. Very large globular flowers.

LUCIFER.—Bright terra-cotta orange. Enormous flowers.

PANORAMA.—Deep orange-red, large flower.

PRINCE OF ORANGE.—Orange-scarlet, edged lighter red, large striking flower.

YELLOW PERFECTION.—Light bronze yellow, edged golden yellow, large flower of remarkable beauty. A lovely tulip.

9d. each; 7/6 per dozen.

EARLY FLOWERING SINGLE TULIPS.

COLEUR CARDINAL.—Rich crimson-scarlet. 6d. each; 5/- per dozen.

THOMAS MOORE.—Terra-cotta, with orange tint. 6d. each; 5/- per dozen.

EARLY FLOWERING DOUBLE TULIPS.

MURILLO (Albano).—White, tinged rose; beautiful. 6d. each; 5/- per dozen.

STINTON'S "CLAREMONT" TULIPS

SPECIAL OFFER OF STINTON'S TULIPS, RAINBOW MIXTURE

This Rainbow Mixture is highly recommended for planting in beds and borders, and is made from the best large flowered varieties. In composing this mixture the utmost care has been taken to ensure that all shades and colours are represented and that they flower at the same time. A group of this Rainbow Mixture, with its great variety of colouring and form, gives a delightful effect.

3/6 per dozen;
25/- per 100.

An attractive display of Darwin Tulips in the Garden.

STINTON "CLAREMONT" IRISES

For elegance of form and exquisite variety of colour combinations, the Iris family is in a class by itself. They are the nearest rivals to the Orchids in this regard. On the other hand they are the easiest possible subjects to grow, and succeed in any ordinary garden soil with a minimum of care. They are perfectly hardy.

SPANISH IRIS.

BEAUTY.—Pale lavender; falls white, with orange blotch; a very beautiful flower. 2/6 per dozen.

BELLE CHINOISE.—Deep yellow. 2/6 per dozen.

CAJANUS.—Canary-yellow, with orange-yellow blotches on the falls, very fine. 2/6 per dozen.

CHRYSOLORA.—A fine, bright, clear yellow. 2/6 per dozen.

DARLING.—Deep purplish-blue; small, but pretty flower. 2/6 per dozen.

EXCELSIOR.—A fine blue. 2/6 per dozen.

GREY LADY.—Beautiful powder-blue, suffused grey. 2/6 per dozen.

KING OF THE BLUES.—Fine deep purplish-blue. 2/6 per dozen.

KING OF THE YELLOWS.—Very fine golden yellow. 2/6 per dozen.

LOUISE.—Standards, porcelain blue; falls, bright yellow; striking flower. 2/6 per doz.

MIA.—Bright blue; strong grower. 2/6 per dozen.

MR. WALTER T. WARE.—One of the best yellows. Beautiful flower. 3/- per dozen.

QUEEN WILHELMINA.—Extra beautiful white, with small yellow blotch on the falls. 2/6 per dozen.

SOPHIE JAFFEE.—Primrose yellow; orange blotch; extra large flower. 2/6 per dozen.

THUNDERBOLT ("Goldcup").—Dark bronze; golden blotch; large flower. 5/- per doz.

SPANISH IRIS MIXED.—In a splendid mixture. 1/6 per dozen.

DUTCH IRIS.

A new and valuable race of Irises, resembling the Spanish varieties in form, but the flowers are much larger and the habit of growth is taller. They bloom a few days before the Spanish Irises.

FRANS HALS.—Falls, pale primrose; standards, pale blue; vigorous grower. 2/6 dozen.

HART NIBBRIG.—Brilliant clear blue, excellent for cutting. 3/6 per dozen.

HUCHTENBURG.—Falls, orange-yellow; standards, palest blue, passing to white; elegant flower. 3/6 per dozen.

IMPERATOR.—A new Hybrid Iris resembling the Spanish type, although of a different origin. "Imperator" differs in that it has larger flowers of greater substance and blooms a little later. The flower standard is lavender purple; falls, large and broad, azure blue, with a brilliant blotch; strong grower. Height 27ins. 3/6 per dozen.

REMBRANDT.—Wide dark blue standards; falls, rich deep blue, with orange blotch. Vigorous grower, extra. 3/6 per dozen.

WEDGEWOOD.—Light blue, very early. 5/- per dozen.

DUTCH MIXED.—2/- per dozen.

MISCELLANEOUS IRIS.

PAVONIA (Peacock Iris).—Most attractive variety; the pure white flowers are each marked with three distinct blue eyes. 2/6 per dozen.

SUSIANA ("Mourning Iris").—This uncommon flower has been attracting a lot of attention in recent years. The large flowers are grey marked with lines of black. It is considered to be one of the best Irises in cultivation. Strongly recommended. 3/6 each.

TINGITANA.—This giant-flowering Spanish Iris is one of the improved types. The tall growing habit and beautiful pale blue flowers make it a most desirable garden subject. 2/6 per dozen.

TUBEROSA ("The Snakeshead Iris").—Easily grown variety; pale green and black; very distinct. 5/- per dozen.

ENGLISH IRIS.

ANGLICA MIXED.—An assortment of the best varieties. 5/- per dozen.

STINTON'S "CLAREMONT" HYACINTHS

Hyacinths are becoming more and more popular each year. It is the most accommodating of all bulbs. Any good garden soil will suit it. It may be successfully grown in pots, with soil, with bulb fibre, or in Hyacinth glasses in water only. As a bedding plant also it is superb, and the delicious perfume makes yet another point in its favor.

CULTURE.

Good drainage is essential. For best results the soil must be rich and deeply prepared. The soil should be in a well-tilled condition for at least one foot below the bulbs. Plant early and plant deep. No strict rule can be made, but the shallowest planting should ensure a depth of four inches above the crown of the bulb. Generally speaking, six inches is not too deep. A little clean sand at the base of the bulb, apart from assuring porosity, will assist in keeping soil pests away. Sea sand may be used with safety. Plant about eight inches apart when used in beds.

HINTS ON CULTURE OF HYACINTHS IN POTS OR IN BOWLS.

For several years past we have devoted much time to the growing of Hyacinths in pots or bowls for indoor decoration. We feel now that we have definitely found a process from which complete satisfaction will result. We have found that the old method of plunging the pots or bowls in a bed of ashes is entirely unsuitable to our Australian climatic conditions. Besides being unnecessary work it makes the bulbs weak and liable to be attacked by insect pests. The following is the method to be carried out.

A light rich soil is used for the pot culture. Prepare the drainage in the usual way, plant the bulbs with the crown just at the soil level. "Claremont" Bulb Fibre is used in the culture of Hyacinths in bowls. No drainage is necessary. The bulbs are planted in the same manner as for pot culture.

The pots and bowls should now be placed in an open frame looking south for preference. They may be left there until the flower buds are beginning to open. Care should be taken in the case of the bowls to drain the water out after a heavy rain. When the flowers are showing colour move them into a glasshouse or a conservatory. By doing this the blooms are perfect when fully open and are not marked by the weather as is often the trouble when they are left to flower outside. The following list will give some idea of the varieties available for choice.

BISMARCK.—The earliest pale blue.

CITY OF HAARLEM.—Large fine yellow, extra.

DR. LIEBER.—Early, lavender blue, tinted violet.

GARRICK.—Dark blue, fine large bells.

GERTRUDE.—Very fine deep pink; large spike.

GIGANTEA.—Blush pink; large broad spike.

GRAND MAITRE.—Blue, fine large and broad spike.

HERMANN.—A lovely shade of rich salmon pink.

KING OF THE BLUES.—Dark blue; large spike.

LADY DERBY.—Lovely flesh pink, extra.

LA VICTOIRE.—Beautiful bright scarlet.

L'INNOCENCE.—Pure white, extra large truss.

LORD BALFOUR.—Large bells, rose violet, extra.

MARCONI.—Deep rose, late.

QUEEN OF THE PINKS.—New introduction, beautiful deep pink.

QUEEN OF THE BLUES.—Porcelain blue; close spike.

ROI DES BELGES.—Deep red, very fine.

SCHOTEL.—Large lavender-blue, extra.

CHOICE MIXED.—A beautiful mixture, embracing all colours.

Named varieties; 1/3 each; 12/- per dozen; 95/- per hundred.

Mixed colours; 1/- each; 10/- per dozen; 75/- per hundred.

TRY GROWING
HYACINTHS IN BOWLS
WITH FIBRE

Hyacinth l'Innocence.

Our "Claremont" Bulb Fibre has been proved to be the best obtainable for the culture of bulbs in bowls of fibre.

Price—6d. per lb., plus postage.

Ixia Emperor of China.

STINTON'S "CLAREMONT" CAPE BULBS

There are many varieties of African bulbs which are a decided acquisition to the garden, and our atmospheric and soil conditions being so eminently suited to the requirements of these bulbs, it is very desirable that they be included in almost every garden. Their particular requirements are well-drained land, preferably of a sandy nature. Under these conditions these bright little subjects will do very well indeed, and on account of their very free-flowering abilities and their resistance to the hot, dry weather which usually prevails in the late Spring months of the year, they are very valuable to all horticulturists. Hereunder we give a list of these bulbs, and we certainly recommend that they be included in every collection.

The *Watsonia*, although a native of South Africa, has been vastly improved by hybridists, and the varieties we offer have been raised by the late Mr. Cronin and are very beautiful.

IXIAS.

The *Ixia* with its brilliant colours and long, graceful stems, is fast coming to the front in popularity. They have a wide range of colours, from pure white to brilliant crimson, while the pale green *Ixia Viridiflora* is a colour rarely met with in horticulture.

CULTURE.—*Ixias* do best in a light sandy loam, and will not tolerate the slightest tendency to over-moisture once the flowering stage is over, and it is well worth while preparing a bed specially to accommodate them. They should be planted deeply; four inches, measuring from the top of the bulbs, is not too deep in sandy soil.

CRATEROIDES MAJOR.—An improved form of *Crateroides*. Brilliant scarlet; an excellent variety. 3/6 per dozen.

CRATEROIDES.—Brilliant scarlet, very fine 1/6 per dozen.

DUCHESS OF EDINBURGH.—White, red striped. 1/6 per dozen.

EMPEROR OF CHINA.—Rich yellow, centre black. 1/6 per dozen.

GALATHEA.—White, blue eye. 1/6 per dozen.

HYPATIA.—White, flushed lilac. 1/6 per dozen.

ROSALIND.—Beautiful carmine-rose. 1/6 per dozen.

SMILING MARY.—Beautiful cherry red. 2/- per dozen.

VIRIDIFLORA.—Green and black. 5/- per dozen.

VULCAN.—Crimson-red and orange. 3/6 per dozen.

MIXED.—A fine mixture of all brilliant colours. 9d. per dozen; 5/- per hundred.

ANOMATHECA CRUENTA.

Dwarf growing, bulbous plants, much like the *Freesia* in habit; blood-red in colour. They require a warm well drained situation, and are good bedding plants. 1/- per dozen.

BABIANA.

Beautiful plants, growing about one foot in height. They produce flowers of many colours—blue, rose and crimson; some are delicately perfumed. In fine mixture. 1/6 per dozen.

GALTONIAS.

Galtonia candicans or *Hyacinthus candicans* or summer hyacinth is among the choicest of the summer-flowering bulbs. It produces stout, erect, glaucous scapes shooting up for four feet or more from the centre of the foliage in summer, and bearing at the top a raceme of twenty or more large, sweet-scented, drooping, pure white flowers like white bells. They should be planted in warm sunny borders or beds. 6d. each; 5/- per dozen.

LACHENALIA (Cape Cowslip).

Lachenalias are elegant flowers when in bloom in the winter and spring months, and one variety in particular shines out as one of our most valuable acquisitions for a brilliant effect in the garden during the depth of winter. That variety is *Lachenalia Quadricolour*, there being no other bulbous plant to equal it for a winter display. *Lachenalias* are at home either in the open garden, in pots, or in hanging baskets. For the latter purpose the *Lachenalia* is invaluable.

LACHENALIA AUREA.—One of the largest flowered of the genus; flower spikes from nine to twelve inches long of a very brilliant orange yellow. 3/6 doz.

LACHENALIA QUADRICOLOUR.—This variety is very hardy and very free flowering. The earliest of all flowering bulbs, usually commencing to flower at the end of May and continuing right through until August. Flowers of this variety are coloured red, yellow, green and purple in combination. 2/6 per dozen.

Page Eight.

MORPHIXIA LONGIFLORA.

This beautiful *Ixia*-like plant requires well drained land on a nice sunny border. It bears long spikes of flowers up to three feet high of a light salmon-pink colour. 1/- per dozen; 7/6 per hundred.

SPARAXIS.

African Harlequin Flower; a gorgeous and striking flower of compact growth, it reaches a height of about nine inches. Culture same as for *Ixia*. Mixed colours. 1/6 per dozen.

TRITONIA.

Another of these lovely bulbous plants indigenous to the Cape. The variety we offer — *Crocata*, Prince of Orange — produces long racemes of large orange-scarlet flowers. Height, 15 inches. Culture same as for *Ixia*. 1/- per dozen.

WATSONIA (Bugle Lily).

Genus are beautiful South African plants having fibrous coated corms, sword-shaped leaves, and tall spikes of tubular, bell-shaped flowers.

ADELAIDE.—A fine orange shade; dwarf habit. 5/- per dozen.

CAMBERWELL.—Salmon, with vieux-rose throat; large flowers, three inches across, placed close to stem. 5/- per dozen.

HOBART.—Large white frilled petals. 5/- per dozen.

MALVERN.—White ground, shaded lavender; large blooms, three inches across. 5/- per dozen.

MELBOURNE.—Beautiful salmon-pink. 5/- per dozen.

ORANGEA.—Beautiful shade orange-red. 5/- per dozen.

PERTH.—Of dwarf habit; flowers magenta. 5/- per dozen.

PINK PEARL.—A splendid pink shade, tall. 5/- per dozen.

MIXED VARIETIES.—2/6 per dozen.

Stinton's "Claremont" Freesias

We have devoted much time to this beautiful garden flower. By years of special care in hybridising and reselection we are now able to offer strains of Freesias vastly superior to any other strains previously sold. Hundreds of thousands of Freesia bulbs are grown at our Moolap nurseries thus enabling us to select only the first class flowers for our requirements.

The "Claremont" Freesias are recognised as the best obtainable in the Commonwealth.

Freesias are easily naturalised in sunny shrubberies, borders or any warm corner. They may be left in the ground undisturbed for several years. The bulbs are inexpensive and the flowers delightfully fragrant.

CULTURE.—Good drainage is essential; apart from that, any good garden soil will suit them. Plant the corms three inches deep. They are excellent as a pot plant, and six or seven bulbs can be planted in a five-inch pot. Care must be taken to ensure cool conditions at the start, so that the bulbs are well rooted before top growth commences. During the flowering period copious waterings are necessary.

"CLAREMONT" NEW HYBRIDS, RE-SELECTED.—These are now offered in the undermentioned named varieties, and as supplies in many of these new named sorts are very short we recommend booking your order early to avoid disappointment.

CARMENCITA.—Carmine-pink petals; orange inside tube. 3/6 per dozen.

CARRIE BUDAN.—Magenta and white. 3/6 per dozen.

CORREO.—Red, tapering to yellow at base. 5/- per dozen.

DOROTHY SCHEEPERS.—Rosy pink, good size; strong grower. 5/- per dozen.

DAFFODIL.—Good pure yellow. 5/- per dozen.

EVELEEN STINTON.—An extra large flower of vivid saffron orange colour.

One of our finest varieties. 5/- per dozen.

ELDERS GIANT WHITE.—Pure white; large flower. 5/- per dozen.

GOLDEN TREASURE.—Bright yellow. 5/- per dozen.

MARIE FISCHER.—Good lavender with a yellow spot generally confined to one petal. 3/6 per dozen.

MENDOTA.—New giant yellow, vigorous growth. Long stems excellent for cutting. 5/- per dozen.

MRS. MARC PETERS.—Attractive deep rose salmon with lower petals blotched orange and yellow. Early bloomer. 5/- per dozen.

PINK PEARL.—Beautiful rose pink shade of exquisite form. 3/6 per dozen.

PINK BEAUTY.—Distinct type, giant rose pink flowers, flat broad open petals, resembling an orchid spray. 5/- per dozen.

PURITY.—Pure white. 1/- per dozen.

SPLENDENS.—Pale lavender. 2/6 per dozen.

SUNRISE.—This large flowering Freesia is undoubtedly one of the finest varieties yet introduced. It has very large flowers of a brilliant yellow colour, suffused orange, with a tinge of salmon pink on the lower petal. 5/- dozen.

WISTARIA.—Rich violet blue, centre white. 5/- per dozen.

"CLAREMONT" SUPER-HYBRIDS.—Extra special mixed. 5/- per dozen.

"CLAREMONT" SUPER-HYBRIDS.—This strain has been carefully reselected and most of the poor colours have been eliminated. Only those varieties producing vigorous growth, long stems, and large flowers have been retained. 2/6 per dozen.

FREESIA, REFRACTA ALBA.—Justly famed for its delicious scent and its accommodating nature. We offer at a low rate for planting in quantity. 9d. per dozen; 3/6 per hundred.

Special low price in one thousand and ten thousand parcels for naturalising purposes.

Claremont Hybrid Freesias (from nature).

SPECIAL OFFER

We are making a special offer of this lovely Narcissus Buttercup, as illustrated above. The bowl of Buttercup was grown at our Nurseries last season. We used the "Claremont" Bulb Fibre in place of soil.

As this variety lends itself admirably to culture in bowls, we are offering—

12 Bulbs, with sufficient "Claremont" Bulb Fibre, for 3/6.

Stinton's "Claremont" Daffodils (NARCISSUS)

The Daffodil is probably the most popular of all Spring-flowering subjects. It may be grown almost anywhere in Victoria in any kind of soil. A deep, well drained, alluvial or basaltic soil, however, best suits its requirements. It is a first-class bulb for naturalising in shady lawns where the mower is not much in use during the flowering period.

The Daffodils offered hereunder are grown from the collection of the late Mr. Leonard Buckland, of "Keyham," Camperdown. The varieties have been selected after having been tried out and proved at our Moolap Nurseries.

A further purchase includes the whole of the collection of Mr. Buckland's more recent home at "Springfield," Narrawong, comprising his latest creations. Hundreds of choice varieties remain yet to be selected and named, and as this is done we will extend our list each season as the varieties are proved and classified.—

In the Trumpet class, the cup is as long or longer than the perianth.

Division 1(a) — YELLOW TRUMPET VARIETIES.

COMMONWEALTH.—A beautiful refined flower; colour, clear soft yellow with broad perianth of good substance. Trumpet beautifully formed and of solid texture. 5/- each.

EMPEROR.—Trumpet; perianth, deep primrose; trumpet, rich full yellow; excellent for flower beds or borders and for naturalising; an excellent cut flower. 3d. each; 2/6 per dozen.

GOLDEN CITY.—Uniform rich golden-yellow; broad firm perianth, well-proportioned trumpet; good for show or garden purposes. 2/6 each.

GOLDEN SPUR.—True golden-yellow trumpet; very early flowering. 3/6 dozen.

KING ALFRED.—Trumpet; a remarkably handsome Daffodil, which we strongly recommend, flowers of great size and substance, and with a very refined appearance; colour, a uniform intense golden-yellow; trumpet, large with deeply-frilled open mouth, sweetly scented; a very vigorous and free bloomer. 9d. each; 7/6 per dozen.

MAXIMUS.—Trumpet; very beautiful and graceful flower of uniform, deep, rich golden-yellow; perianth, twisted; one of the richest coloured yellow Trumpet Daffodils; must be planted about nine inches deep. 4d. each; 3/6 per dozen.

MELODY.—Rich clear yellow; broad perianth and large trumpet; fine form and substance. 2/6 each.

MICHAEL.—One of the most beautiful giant yellow Trumpet Daffodils, perianth, soft yellow, broad, slightly campanulate and of great substance, trumpet full soft yellow. Solid texture. 2/6 each.

THE GIFT.—Splendid yellow trumpet. 7/6 each.

MIXED TRUMPETS.—Selfs and bicolors; a fine selection for cutting purposes. Great value at 5/- per dozen.

MIXED YELLOW TRUMPETS.—This contains many beautiful varieties of finest quality. 5/- per dozen.

Division 1(b)—WHITE TRUMPET VARIETIES.

ALICE KNIGHTS.—Early-flowering; perianth, white; trumpet, creamy-white; prettily frilled open mouth; good constitution and free bloomer; very beautiful. 5/- per dozen.

PETER BARR.—White perianth and big white trumpet; extra. 1/- each.

WHITE IVORY.—A large ivory white trumpet of good form and great refinement. A great white. 3/6 each.

Division 1(c) — BICOLOUR TRUMPET VARIETIES.

CYRENE.—Broad creamy-white perianth; large well-formed trumpet of distinct citron-yellow. 1/- each.

E. JOHN HAYNES.—Enormous, well-finished flower; pure yellow trumpet, rich with broad white perianth. 2/6 each.

EMPRESS.—Large flower; perianth white and of great substance; trumpet, rich yellow. 2/6 per dozen.

GEORGE BROWNHILL.—Broad yellow trumpet, with broad white perianth; a very fine variety. 2/6 each.

PRINCEPS.—Trumpet; perianth, sulphur-white, trumpet, yellow. 9d. per dozen.

POINTER.—Good large yellow trumpet, with large flat white perianth. 2/6 each.

VICTORIA.—Creamy-white perianth; flat overlapping segments; trumpet, rich pale yellow, sweetly scented and very floriferous. 3/6 per dozen.

STINTON'S "CLAREMONT" DAFFODILS (Narcissus)

MIXED BICOLOR TRUMPETS.—Like Mixed Yellow Trumpets, this selection contains many varieties of much higher value than the price asked would indicate. 5/- per dozen.

Division 2 — INCOMPARABILIS or MEDIUM CUP.

ABO.—Red and yellow incomparabilis of distinct colouring. 7/6 each.

ANTOINE.—A very large uncommon bicolor incomparabilis of light lemon, with great form and refinement; a good show flower. 3/6 each.

APRICOTINE.—Distinct light yellow perianth; apricot open cup, very beautiful. 25/- each.

BALLARAT.—A large self yellow incomparabilis of great substance and refinement; a really good show flower. 3/6 each.

BERNADINO.—Incomparabilis; A. M. Holland; very beautiful flower, with large, broad, creamy perianth and a very large pale cup, prettily fluted and heavily suffused deep apricot-orange; free and vigorous. 5/- per dozen.

BLACKWELL.—Sulphur-yellow perianth, almond shaped segments, bright orange-red half-way down cup. 3/- per dozen.

CASIMER.—Large flower, white perianth; bold creamy yellow crown, shaded apricot; beautifully crinkled. 1/- each.

CLEO.—Orange-edged cup, very good. 2/6 each.

CONSTELLATION.—White perianth; open almond-shaped segments; yellow cup, tinged with orange; large flower. 2/6 per dozen.

FLAMINGO.—Rich lemon perianth; large chalice-shaped orange cup. 2/6 per dozen.

FLEETWING.—Fine creamy-white perianth; overlapping and pointed segments; bright yellow cup; very strong. 2/6 per dozen.

FLITTER.—Very large cup, red; great flower for decorative purposes. 3/6 each.

FRANK MILES.—Large handsome flower, soft clear yellow, with gracefully twisted perianth; excellent for cutting. 3/6 per dozen.

GLOAMING.—A yellow Incomparabilis of the largest size with broad flat perianth and large well-formed cup. 3/6 each.

GLORIANA.—Yellow perianth; glowing red cup; splendid flower. 3/6 each.

GLORIA MUNDI.—Handsome bold flower; flat, clear lemon-yellow perianth, with over-lapping segments; large cup of rich orange scarlet; excellent for exhibition. 5/- per dozen.

HELIOS.—A fine incomparabilis, with large orange cup. 2/- each.

LEMON STAR.—Large pale-cream perianth; almond-shaped segments; large creamy-white open cup, with rays of lemon running down and distinct lemon rim. 5/- per dozen.

LUCIFER IMPROVED.—Long creamy-white star-shaped perianth; beautiful long straight orange cup; very bright and telling. 3/6 per dozen.

LULWORTH.—Very pretty and striking, pale cream open perianth, large extended cup, prettily frilled, heavily stained with orange-scarlet. 2/6 per doz.

LUX.—Clean, improved lucifer; good perianth, very distinct. 10/- each.

MACEBEARER.—Creamy-white perianth; broad overlapping segments; large expanded pale-yellow cup, edged with bright orange. 5/- per dozen.

MILITANT.—Large yellow, with splendid perianth and open red cup; the best red and yellow. 15/- each.

MRS. WILLIAM MILES.—Large lemon-yellow perianth; pointed segments; open deep-yellow cup. 1/- each.

PILGRIM.—Perfectly formed flowers, always smooth and flat; well rounded pale-sulphur segments; pale-yellow cup. 2/6 per dozen.

PUZZLE.—Yellow perianth; open orange cup; distinct, very good. 15/- each.

RED HEEL.—Very brilliant red and yellow incomparabilis. 20/- each.

ROBESPIERRE.—Incomparabilis; A.M. R.H.S. London; ivory perianth and deep crimson cup; a beautiful flower. 9d. each; 7/6 per dozen.

RUTH II.—A very large and shapely flower. 3/6 each.

RUTH TUNBRIDGE.—Distinct variety; cup, large and spreading; white overlapping perianth; strong flower. 9d. each; 7/6 per dozen.

SUNBURST.—Light yellow perianth; large open cup, margined red. 5/- each.

TAMERLANE.—Lemon perianth; long-pointed and overlapping segments; large yellow open cup. 10/- per dozen.

Massed Narcissus at the water's edge.

STINTON'S "CLAREMONT" DAFFODILS

Division 3.—BARRII.

The Small Cup is Tinged or Coloured with Red.

- ALBATROSS.**—Barrii; perianth, white; cup, pale citron-yellow, nicely frilled and edged orange-red. 2/6 doz.
BATH'S FLAME.—Deep golden-yellow perianth; yellow cup, deeply edged orange-red; a giant flower for this section. 1/- each.
BRILLIANCY.—Deep golden-yellow perianth; large cup, edged deep scarlet. 1/- each.
BARRII CONSPICUOUS.—A flower of great beauty and refinement; bright yellow perianth and broad short cup, conspicuously edged orange-scarlet; a lasting flower and prized for cutting. 2/- per dozen.
FIREFLY.—Small but beautiful flower; flat all-red cup. 2/6 per dozen.
FIRE QUEEN.—White perianth; almond-shaped pointed segments; rich yellow crown, edged with scarlet; and striking greenish centre. 5/- per dozen.
ISIS.—Very solid pale primrose perianth; soft yellow cup, prettily fluted, with striking edge of soft madder scarlet. 3/6 each.
MISS WILMOTT.—Large flower; flat crown, with a rich orange picotee edge. 2/6 each.
MOWGLI.—Very flat pure white perianth; overlapping and well-rounded segments; large solid deep orange-red eye, smooth flower. 15/- each.
SEAGULL.—Large, flat, white perianth; overlapping segments, pale yellow cup, edged picotee; very attractive. 2/6 per dozen.
SUNRISE.—Creamy-white perianth, with flakes or dashes of yellow down segments; rich orange spreading cup; pretty and effective. 1/- each; 10/- per dozen.

Division 8 — TAZETTA AND POETAZ HYBRIDS. (Hybrids between Tazetta and Poeticus).

- JAUNE a'MERVEILLE.**—Soft lemon perianth, evenly balanced and perfectly round in shape; beautiful pale yellow eye, with slight orange rim at times; best and largest in this section. 9d. each; 7/6 per dozen.
RUBELITE.—White perianth; broad overlapping segments; rich red eye. 1/- each; 10/- per dozen.
SCARLET GEM.—Primrose-yellow perianth; brilliant orange-scarlet cup; carries four or five flowers to a stem; very fine. 9d. each; 7/6 per dozen.
STARLIGHT.—A most attractive flower; creamy-white, with conspicuous red cup. 6d. each; 5/- per dozen.

TAZETTA.

Often called Jonquils; several flowers on stem. (Polyanthus.)

- CAMPERNELLE.**—Large flowers; three or four on stem, rich golden-yellow. 1/6 per dozen.
EARLY ROMAN.—White perianth; double white and golden centre. 1/- doz.
PAPERWHITE.—Pure Paperwhite; early. 1/6 per dozen.
SOLIEL D'OR.—Rich yellow perianth; golden cup. 1/6 per dozen.

Division 9 — POETICUS.

- LAURA.**—An early-flowering variety; a much improved Poeticus Ornatus. 2/6 per dozen.
PRINCE OF POETS.—A beautiful flower of beautiful colourings, pure white perianth, with deep red margin to cup. 1/6 each; 15/- per dozen.
RED RIM.—A very fine large Poeticus with very round, flat, pure white perianth of great substance. Large yellow cup, broadly edged red. 2/- each; 20/- per dozen.

Division 10.—DOUBLE VARIETIES.

- ARGENT.**—Refined semi-double; segments white and pale yellow, giving the flower a striking silvery appearance. 2/6 per dozen.
INGLESCOMBE PHOENIX.—Large full double flowers of beautiful primrose yellow; opens well and is of good substance. 9d. each; 7/6 per dozen.
ORANGE PHOENIX.—Large white, with centre segments of rich orange. 2/6 per dozen.
PRIMROSE PHOENIX.—Lovely primrose-yellow, double variety. 6d. each; 5/- per dozen.

Division 4 — LEEDSII.

A Small Cup; Flower all White or Creamy-White.

- CLANDON.**—Perianth, white and waxy, consisting of elegantly pointed overlapping segments; long trumpet shaped cup, opening pale and yellow and becoming white with age. 6d. each; 5/- per dozen.
FAIRY QUEEN.—White perianth; overlapping and pointed segments, white cup, sometimes tinged with yellow. 1/6 per dozen.
LIVONIA.—Chief attractions, the buff tone of the cup and the well-frilled mouth of same. 6d. each; 5/- per dozen.
LONGFELLOW.—Deep ivory-white perianth, segments broad, long and overlapping; bright yellow, short, open trumpet-shaped crown, slightly tinged with green inside. 6d. each; 5/- per dozen.

- LORD KITCHENER.**—Leedsii, a giant Leedsii, a flower of great size, broad, white, flat perianth; crown very large; pale primrose; elegantly crimped at brim; a good grower and strong constitution. 6d. each; 5/- per dozen.
LOWDHAM BEAUTY.—Pure white broad segments; deep wide cup, elegantly crinkled on edge, opens pale yellow, but fades to white with age. 1/6 each.
MERMAID.—White perianth, overlapping segments, large bold crown, flanged at mouth, opens cream, but fades with age. 6d. each; 5/- per dozen.
QUEEN OF THE NORTH.—White perianth; broad overlapping segments, pale primrose cup. 6d. each; 5/- per dozen.
SIRDAR.—Silvery-white perianth; broad overlapping segments; large, straight cream cup, beautifully frilled at rim. 1/- each; 10/- per dozen.
SOUTHERN GEM.—White perianth; overlapping and pointed segments; pale lemon cup, prettily frilled, good exhibition flower. 6d. each; 5/- per dozen.
WHITE LADY.—Leedsii; a charming flower of medium size, but perfect form; broad, white perianth and dainty, pale yellow crinkled cup; delicately scented. 2/6 per dozen.
WHITE NECTARINE.—Creamy-white perianth; open segments; sulphur cup, edged with citron. 2/6 per dozen.
WHITE SLAVE.—Flat and smooth, with extraordinary lasting qualities; a greatly improved "White Lady." 3/6 per dozen.

Division 5 — TRIANDUS HYBRIDS.

- BENNETT POE.**—Delicate pale sulphur-yellow; perianth of good substance; beautifully-shaped straight trumpet; strong constitution and excellent for exhibition. 9d. each; 7/6 per dozen.

Division 6 — CYCLAMINEUS HYBRIDS.

- ORANGE GLORY.**—A striking variety with a yellow reflexing perianth and a trumpet of deep orange. 2/6 each.
THE LITTLE GENTLEMAN.—Very refined variety. 2/6 each.

Division 7 — JONQUILLA HYBRIDS.

- BUTTERCUP.**—A lovely Jonquil Hybrid; Emperor and Jonquilla; flower of very distinct, handsome form; long stem; colour, a rich buttercup yellow; almost a self; broad stiff perianth same length as trumpet, which is straight and of great substance. 2/6 per dozen.
GERTRUDE NETHERCOTE.—Jonquilla Hybrid; fine upstanding habit; strong grower; buttercup yellow; lasts well. 1/- each; 10/- per dozen.

Well flowered specimen of Cyclamen.

soil should be moderately rich, with some coarse grit in it and well decayed cow-manure just within reach of the long roots. Plant the corms with the crown slightly above the soil level. Cyclamen like moist conditions.

SPECIAL OFFER OF SEEDLING CYCLAMEN

We are making this offer of seedling Cyclamen for the benefit of all horticulturists in general, and those who prefer potting on their own plants, in particular.

Strong well-rooted plants in shades of salmon-pink, blood-red, white, etc. 5/- per dozen.

Papilio mixture.—Small variety giving a fine display. 5/- per dozen.

An excellent mixture which includes all the choicest shades. 3/6 per dozen.

CYCLAMENS IN SEPARATE COLOURS

Claremont Red.—Deep blood-red. 1/6 each; 15/- per dozen.
Claremont Pink.—Bright rose-pink. 1/6 each; 15/- per dozen.
Gloire d'Empel.—Cochineal-carmine. 1/6 each; 15/- per dozen.
Albatross.—Giant-flowered, pure white. 1/6 each; 15/- per doz.
 Splendid mixture of bright and showy colours. 1/- each; 10/- per dozen.

Stinton's "Claremont" Cyclamen

Now the Cyclamen may be had at a reasonable cost, it is fast coming into popular favour. Its claims on the garden lover are many. With ordinary care the flowering period runs into months, and the blooms form one of the most beautiful and lasting decorations.

CULTURE.

The corm should be planted as soon as received. In the open they require an easterly aspect to which the sun has access only in the early hours. At the foot of a wall, or even a fence, if moisture is attended to they will do well. The

Liliums

Stately fragrant bulbous plants that flower from December to March. Lime must not be given to any except *Lilium Candidum*.

Lilium Regale in Herbaceous Border.

AURATUM.—Golden-rayed Lily of Japan, tall fragrant flowers, ivory white with a golden band on each petal, spotted brown, not quite hardy. 2/6 and 3/6 each.

AURATUM PLATYPHYLLUM.—A more robust and hardier form than the above, with broad glossy foliage and larger flowers. 2/6 and 3/6 each.

CANDIDUM ("Madonna Lily").—Pure white, tall, many flowers on stem; fragrant. Plant bulbs shallow; give lime. 1/- each.

ELEGANS (*Thunbergianum*).—Red; lower growing than other varieties; the colour is a striking shade of red. 9d. and 1/- each.

ELEGANS (*Thunbergianum*).—Yellow; similar in growth to *Lilium Elegans*, red; the flowers are rich golden-yellow, spotted in throat with brown. 1/- each.

HENRYI.—Tall and hardy; is very elegant when grown with other plants in a herbaceous border; produces flowers of a beautiful apricot shade. 1/6 each.

LONGIFLORUM (*Christmas Lily*).—Pure white, trumpet shaped flowers. 1/- each.

PARDALINUM (*Leopard Lily*).—Grandiflora; large reflexed flowers, scarlet and yellow, spotted brown; a very robust grower. 1/- each.

REGALE.—One of the best; medium in height; this variety flowers at Christmas; the blooms are white trumpet-shape, with gold inside. 1/- each.

SPECIOSUM.—Hardy, tall, free-flowering, in shades of pink and claret; this variety flowers in February. 1/6 each.

SPECIOSUM MAGNIFICUM.—Beautiful seedling varieties, with rich shades of deep pink and white. 1/6 each.

SPECIOSUM MELPOMENE ("Crimson Tiger Lily").—Deepest pink in all *Speciosums*. 1/6 each.

SPECIOSUM RUBRUM.—Free-flowering variety of rich deep colour. 1/6 each.

TIGRINUM ("The Tiger Lily").—Growth of medium height; flowers bright scarlet with black spots. 1/- each.

Muscari Conicum ("Heavenly Blue") naturalised
in the shrubbery.

Stinton's "Claremont" Muscari and Miscellaneous Bulbs

GRAPE HYACINTHS (MUSCARI)

The Grape Hyacinth is a most interesting flower, exceedingly hardy and particularly well adapted for use in window-boxes. It is ideal for naturalising and as an edging for long borders or in clumps in the shrubbery. It may be left in the soil for two or three years with advantage. The bulbs are admirably suited for growing in bowls with fibre. A sunny position is desired; such position always brings out the best colours.

CULTURE.

This subject is so easy to grow that there is little to be said. Plant about three inches deep. It will grow in almost any kind of soil.

AZUREUM.—Bears lovely little spikes of Cambridge-blue coloured bell shaped flowers. 1/- per dozen; 7/6 per hundred.

BOTRYOIDES.—This differs from the above only in colour. The flowers are of a darker blue; a very effective colour. Equally good for naturalising. 1/- per dozen; 7/6 per hundred.

CONICUM ("Heavenly Blue").—A gem of the first water. Unquestionably one of the finest blue hardy flowers. The upper third of the stem is clustered thickly with gentian-blue wax-like bells, like tiny grapes. This subject makes a superb edging to a bed of Daffodils or Narcissus. Muscari are also first-rate for the rockery, for planting on grassy banks, and for growing in pots with soil or fibre.

1st size	1/- per dozen, 7/6 per 100
2nd size	9d. per dozen, 5/- per 100
3rd size	6d. per dozen, 3/6 per 100

MISCELLANEOUS BULBS

CROCUS.—Very pretty spring-flowering bulbs and extremely useful for borders or for massing under deciduous trees; likes a cool spot. Blue, purple, white, yellow. 2/6 per dozen.

HIPPEASTRUM (Amaryllis).—These handsome plants surpass many others in colour. The shades range white and red, crimson-red, orange-red, etc. Some varieties being self coloured otherwise striped or feathered markings. The soil should be fairly rich; leaf-mould and rotted cow manure is beneficial to them. 1/6 each.

LYCORIS RADIATA (Nerine Japonica).—Bright crimson, with golden anthers borne in a cluster. These have recurved stamens, and are most graceful and effective for decorative work. Plant in an open sunny position. 5/- per dozen.

NERINE (Guernsey Lily).—The Nerine is extremely hardy and does well in almost any position which allows the bulbs a full resting period during the summer months.

Flexuosa Alba.—Pure white; nice large flower spikes. 1/- each; 10/- per dozen.

Fothergilli.—Vermillion scarlet; large showy flowers. 1/- each; 10/- per dozen.

Sarniensis.—Rosy crimson; large flowers on long stems. 1/- each; 10/- per doz.

RICHARDIA ELLIOTIANA (Golden Yellow Calla Lily).—This variety is very hardy and free-flowering after the roots have become thoroughly established in the ground, and very little attention is necessary. Deep golden-yellow flowers on long stems. 2/6 each.

SCILLA CAMPANULATA (Woodland Hyacinth).—For planting under trees, in the border, and in beds. A splendid subject for bowls and for pots indoors. Revels in either soil or fibre, and can be had in three lovely colours.

Rose	2/6 per dozen, 15/- per 100
Blue	1/6 per dozen, 10/- per 100
White	1/6 per dozen, 10/- per 100
Mixed	1/- per dozen, 7/6 per 100

SNOWFLAKES.—*Leucojum vernum* is the Spring Snowflake, with pure white, green tipped, sweet-scented flowers, appearing in August on stems 9 to 12 inches long. 1/- per dozen, 7/6 per hundred.

STERNBERGIA LUTEA.—A very effective autumn-flowering bulb, producing a flower closely resembling a Crocus, of a rich golden-yellow; very hardy and very showy. 3/6 per dozen.

STINTON'S "CLAREMONT" GLADIOLI

Gladioli are well worth cultivating. They are now one of the most popular bulbs grown for cut flower purposes. They are easy to grow and the flowering period covers practically the entire year. The most suitable time to plant Gladioli corms is from July to February. They flower in about three months from the time of planting and if a succession of blooms is desired a few bulbs planted each month will give a continual supply of blooms. It is better, if possible, to have them flowering during October, November and December and again from March to the end of May. By doing this the hottest months are missed and the flowers are not spoilt by the drying winds.

Almost any soil will suit them. Old rotted manure worked well into the soil is beneficial to them. Plant the corms about five inches deep in sandy soil and about three inches in a heavy soil. By doing this the corm is protected from the hot rays of the sun and when in flower the plant can stand up against the wind and not be blown over.

Gladioli are very effective when planted in clumps of about nine or twelve corms in the herbaceous border. It is advisable to plant one variety when doing this as they all flower at the same time making a gay splash of colour.

The corms should be lifted when the foliage turns colour and stored in a dry place until time of replanting.

Gladioli are unexcelled for cut flower purposes. They should be cut when the lower flowers are open and the remainder of the buds will open in the water.

LIST OF GLADIOLI.

ADA.—A most delicate variety; colour satiny-white, with small purplish blotch inside, very distinct. 1/- each.

A. E. R. GILLIGAN.—Deep crimson, centre speckled white; strong grower. 1/- each.

AH.—Pale apricot-pink and yellow; medium-sized flower on vigorous plants and foliage; has a beautiful opening bud, reminding one of "Ophelia" rose. 1/- each.

ALBANIA.—Pure glistening white; the flowers wide open, very large, with broad, well rounded petals having finely ruffled edges. Certainly a beautiful white variety and as pure as freshly-fallen snow. 6d. each.

AMERICA.—A famous American variety, producing fine formed erect spikes, well furnished with large open flowers. Colour, pale shell-pink, shaded white, faint carmine lines in throat. 6d. each.

AMERICAN BEAUTY.—One of the best, and much in demand for show purposes, the flowers being large with twelve or more open on well formed spike. Colour, deep rose or rosy-cerise, with a cream blotch on the lower petals. Recommended as an exceptionally fine variety for exhibition. 1/- each.

AMETHYST.—This is a most reliable variety for exhibition, and excellent for all purposes; consistently producing long well faced spikes of eight or ten open blooms. The flowers are large, of very graceful form, and of a distinct shade of lilac rose, with deep rose bordering and a white centre line on each petal. 1/- each.

APHRODITE.—Pure white, small violet stripe; very fine. 6d. each.

ASIA.—This is one of the best; colour, rich cerise, inside silvery-rose, with pale base. Splendidly shaped flowers on graceful stem, producing two to three flower stem to one bulb. The Queen of the Gladioli. 1/- each.

AVALON.—An extra choice blush-white, with very beautiful red throat markings. A magnificent flower. 1/6 each.

BERTY SNOW.—Soft lilac-pink, with a white blotch on the lower petals. The flowers are of exceptional size, perfectly formed, and are produced on spikes of exceptional size. Highly recommended as a splendid all-round variety and most reliable show gladiolus. 1/- each.

BLONDE.—Choice apricot-shaded cream and peach. Outstanding for exhibition. 6d. each.

BREAK O' DAY.—Large flowers, soft salmon-pink. 6d. each.

BRONZE KING.—Bronze, very fine colour, free flowering. 1/- each.

BURWOOD GEM.—Bright rose-pink, with crimson blotch; a very fine garden and decorative flower. 1/- each.

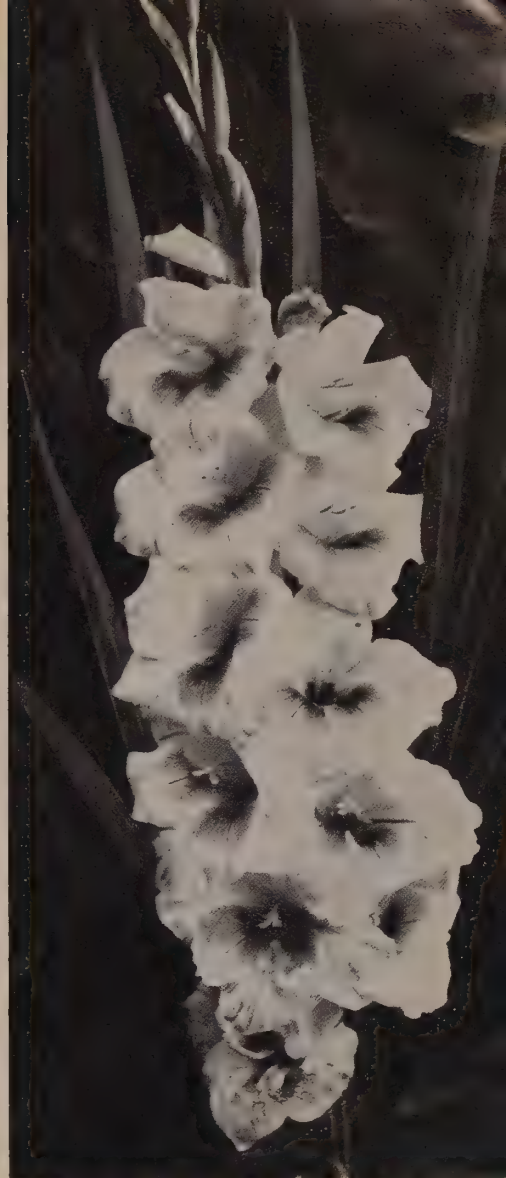

BYRON L. SMITH.—This beautiful gladiolus has become a world's favourite on account of its exquisite colour and refinement and its general reliability. Colour, a distinct shade of lavender-pink, cream blotches on lower petals. Of the highest quality, and one of the most beautiful varieties grown. 6d. each.

CAPT. BOYNTON.—Pale lavender, dark blotch. 6d. each.

CAPT. BRAULOT.—Immense spreading flowers of deep salmon, with conspicuous creamy yellow blotches on the lower petals. This variety will be popular on account of the great size and distinct colour of the blooms. 1/- each.

CHANCELLOR.—One of the finest dark crimsons. The flowers are of good size and substance perfectly formed, and well placed on excellent spikes. Easily grown and very reliable; may be strongly recommended. 6d. each.

CHANTICLEER.—Scarlet, flaked crimson, yellow star on centre petal; attractive. 6d. each.

Gladiolus Eveleen Stinton.

STINTON'S "CLAREMONT" GLADIOLI

CHARLEMAGNE.—A gladiolus in high estimation everywhere (especially among exhibitors) on account of the great length and perfect formation of the spikes. Large flowers of deep rose ground, suffused and flaked salmon-red and scarlet, lower petals dotted crimson on cream. 1/- each.

CHU CHIN CHOW.—Salmon, with blood-red blotch, bordered with white. 1/- ea.

CINDERELLA.—Pure white ground colour, with dainty markings of pink at the edges of petals. The blooms are most graceful form and are produced on tall slender spikes. 1/- each.

CONCOLOR.—Large flowers, pale Naples yellow, lower segments sulphur-yellow; very distinct. 1/- each.

CONSPICUOUS.—Lavender, violet blotch. 1/- each.

CONSTANCE.—A lovely variety for decorative work, and is not to be despised as a show variety when well grown. The colour of the upper petals is rich salmon, with lighter undercolour; lower petals bright nasturtium-orange on salmon. Recommended to cut-flower growers and for florists' work. 6d. ea.

CORUNNA.—A beautiful gladiolus with a coal-black throat, edged with white; large, wide-spreading petals. 1/- each.

CRIMSON GLOW.—A beautiful crimson-scarlet gladiolus, with extra large open flowers. The habit of the plant is excellent, being very strong and vigorous. One of the best decorative varieties in this colour. 6d. each.

CRINKLES.—Deep pink, heavily ruffled. 1/- each.

DR. F. E. BENNETT.—Bright scarlet, with creamy-white markings in the centre of the flower. Extra large flowers, well placed on fine long spikes. One of the finest red varieties in cultivation. 1/- each.

DR. W. VAN FLEET.—Delicate rose-pink, deeper at the edges of petals. Throat of softest canary-yellow. Tall and slender plants with very large flowers. 1/6 each.

DUCHESS OF SUTHERLAND.—Cream, feathered with rose. 1/6 each.

EARLY SUNRISE.—Salmon-pink, early. 1/- each.

ELFRIEDA.—Creamy-white, edges with rose; delicate shade. 1/- each.

ELORA.—Creamy-white, with rich crimson spot on three lower petals; these spots are overlaid with dainty featherings of American Beauty pink. A very lovely variety. 1/- each.

EUREKA.—Bright orange-red, fine flower. 6d. each.

EVELEEN STINTON (P. Symons).—New blush-pink heavily overlaid with chocolate; fine long spike of good form; individual flowers are of medium size and good texture; will carry up to sixteen open fresh flowers; a good exhibition gladiolus. Award of Merit, Ballarat Test Garden 1932. 5/- each.

FERN KYLE.—Large ruffled blossoms of white, faintly tinted with cream, rather compactly placed on good strong stems; several open at one time. A very pretty gladiolus and very popular. 1/- each.

FLORENCE.—Colour a very bright and pleasing shade of lilac, with a pure white blotch in centre. Immense flowers, larger than any other of this colour we have seen, and unusually stiff spikes carry up to about six open flowers at a time. Of great value for the flower border. 1/- each.

FLAMING SWORD.—Bright vermilion red, with a slight brownish-scarlet stripe in the centre. The elegant spike has six or more flowers well placed on a tall, erect stem. A fine decorative variety. 1/- each.

GERALDINE FARRAR.—Pale lavender-violet, with deep violet spot on lower petals. It has a very pronounced light blue cast, a colour very scarce and uncommon in gladiolus. Good germinator for bulbets. 1/- each.

GERTRUDE.—Slaty orange-rose, with small cream blotch. Large flower; tall and strong spike, with many flowers open at the same time. 1/6 each.

GERTRUDE ERREY.—This beautiful variety is now well established as a universal favourite and is generally recognised as one of the finest varieties in cultivation; the large flowers and long, graceful, perfectly formed spikes lending themselves equally as well to either decorative or show purposes. The colour is exquisite, a light salmon or shell pink on the outer part of the flower shading off to almost white in the centre, a spot of deeper colour in the throat. 6d. each.

GIANT NYMPH.—An excellent variety producing fine long spikes of large open flowers, the colour salmon-pink with deeper salmon centre. The corn is naturally discoloured but this has no detrimental effect on the vigorous growth. 1/- each.

GLORIOSA.—Scarlet, with a clear cut blotch of rich crimson, and a yellow band on lower petals. Full-sized petals of good quality. A most brilliant and striking variety. 6d. each.

GLOXINIA.—Creamy-yellow, turning to cherry-pink, blotched dark red on all petals. Tall and strong growing variety flowers are coloured like a Gloxinia. A wonderful exhibition variety. 1/- each.

GIGANTIC.—Bright rosy-red shaded salmon; blooms generally with four or five flowers at the same time. Flowers are well placed on stem. 1/6 each.

GOLDEN MEASURE.—A fine deep yellow variety that has become world-famous, and which for hardness and strong vigorous growth is unsurpassed. The colour is clear yellow in the centre of the flower, with amber-yellow shading on the outer part of the petals. The blooms are large and are produced on long strong spikes. 1/- each.

GOLDEN WEST.—Bright orange, small purplish and yellow spots on lower petals. 1/- each.

GOLDFISH.—Pure yellow, crimson spot, grand variety. 1/- each.

H. B. STALLARD.—Red, large white spot; large and handsome. 6d. each.

INDIAN MAID.—Flowers of beautiful peach-blossom pink, with deeper throat. 6d. each.

IRIS.—True lavender in colour, touched with cream in centre. Likely to be much in demand in account of its beautiful distinct colour. 1/6 each.

JEAN TENNY.—Colour, silvery rose, edges flushed and sometimes striped with a darker shade of pink; a cream blotch in centre. A gladiolus recommended for its hardy constitution and general excellence. 1/- each.

JENNY LIND.—Blossoms are pure apricot pink, throat pale yellow, the two colours blending to perfection. Many blooms open at the one time. One of the most exquisitely beautiful of gladioli and recommended without reserve. 1/6 each.

KELWAY'S EXQUISITE.—Lemon-yellow, deep yellow throat striped carmine. 6d. each.

KITTY GRULLEMANS.—Splendid novelty. The beautiful combination of bright orange and yellow comes out to perfection in this variety. The spikes are large and tall, the flowers each of great size and beauty, slightly fringed, usually flowering with two perfect spikes on a plant. Also a very fine forcing variety. 1/- each.

LAIDLEY.—Large flowers of a light pink ground colour, beautifully flushed and flaked with two deeper pink shades; a broad cream band on the lower petals and a crimson spot in throat. Strong, erect, well faced spike, up to nine flowers open at a time. A beautiful variety for decorative or show purposes. 1/- each.

LADY ST. OSWALD.—White ground striped with carmine violet stripe, grand for exhibition. 1/6 each.

LADY BETTY HARRIS.—Rose, flaked crimson, large yellow centre. 1/6 each.

LADY ADA FITZWILLIAM.—Salmon yellow, orange centre; a really beautiful variety. 6d. each.

LACROSSE.—A new and cherry-flowered cherry-vermilion-red, beautifully shaded to a light centre, lemon tip. Strong constitution; extremely early and flowers from bulbets. 6d. each.

LIEBESFEUER.—A rich deep scarlet self, which has achieved world-wide success, receiving award after award from the leading horticultural societies. Colour very pure and distinct in the flowering effect. Flowers of average size on long spikes. 6d. each.

LINWOOD BELLE.—Lavender-blue overlaid on cream ground the large blotches in centre to a reddish-mauve tint; flowers well formed and placed. 1/- each.

LOHENGRIIN.—Marble-white, shading to soft pink when in full bloom. A tremendous large flower of great substance. Several blooms open at the same time; tall and strong growing. A glorious novelty. 1/- each.

L'OR D'AUSTRALIE.—The slender tall stems are filled with well expanded flowers of deep yellow of great substance and size. Very beautiful. 6d. each.

STINTON'S "CLAREMONT" GLADIOLI

LUSTRE (Brightness).—Tall and very large flowered, bright orange-vermilion; a glorious variety for exhibition. Many flowers open at the same time.

Highly recommended. 6d. each.

MADAM GEO. BOULAY.—Large white flower, blood-red blotches. 6d. each.

MADAME MOUNET-SULLY.—This grand variety stands out well ahead of practically everything else of similar colour. It has large refined blooms of a pure ivory-white with clean-cut crimson-scarlet blotch on lower petals. Splendidly arranged spikes, carrying when well grown eight or more open flowers. 6d. each.

MARECHAL FOCH (Le Marechal Foch).—Originating from a cross between the two famous varieties "Halley" and "America," this variety inherits the colour of "America" with much of the size of "Halley." Spikes carry up to six open flowers. Growth dwarf. 6d. each.

MARIETTA.—A delicate shade of light salmon, beautifully blended with light orange, the lower petals shading to a bright burnt orange. A gladiolus of extra large size and splendid spike. 1/- each.

MARMORA.—This is a truly wonderful variety and has created quite a sensation wherever shown. The colour is lavender or lavender-grey, with petunia-coloured blotch. When the flowers open indoors the colour becomes a beautiful silvery-lavender. The blooms are exceptionally large and are perfectly placed on splendid spikes showing up to fourteen open flowers at a time. Taking into account the remarkable colour, perfect flower and spike, and all-round general quality, this is considered one of the most valuable varieties ever introduced. 1/- each.

MARY PICKFORD.—Delicate creamy-white; throat finest soft sulphur-yellow; highly recommended. 1/- each.

MR. LEON DOUGLAS.—Ground colour begonia-rose, striped with brilliant scarlet, pale yellow lip speckled ruby, extra large flowers on long spike, with eight to ten open. 6d. each.

MRS. F. C. PETERS.—A very popular American variety of an attractive shade of Amaranth pink; purplish blotch in the throat. Good long spike of large well opened flowers. 1/- each.

MRS. F. PENDLETON.—The large flowers and beautiful bright colours of this variety have won for it a world-wide approval, especially as a decorative gladiolus. Colour, light salmon-pink, showy blood-red blotched on lower petals. Undoubtedly one of the most beautiful gladioli in existence. 6d. each.

MRS. GALBRAITH.—May be recommended as a variety of great merit, much in demand for show purposes owing to its consistent production of admirable exhibition spikes of open flowers. The colour is an attractive shade of salmon flaked with a darker shade. 1/- each.

MRS. GRULLEMANS.—Pure golden-yellow with two or three flower-stems on one bulb. No one must compare this variety with the ordinary yellow Primulinus, as it is absolutely distinct and of a most attractive colour and habit. 1/- each.

MRS. POTTER PALMER.—Beautiful bright purplish-violet — one of the finest dark-coloured gladioli. 1/- each.

MRS. STONE.—Salmon pink on white ground. 6d. each.

MRS. VAN KONYENBURG.—A glorious light blue; the tall spikes carrying well arranged flowers of large size and excellent substance. At present, this is the finest variety of its colour. 1/6 each.

MRS. W. CUTHBERTSON.—Cherry-rose with lighter centre, and heavily crimped flower on tall and straight stem. 6d. each.

N. ROLAND BURKE.—Scarlet self, long spike, good exhibition variety. 1/- each.

ODALISQUE.—In a colour section not famed for long spikes, this fine variety is remarkable for the number of open flowers carried at one time. Colour, creamy-white with a scarlet blotch. Similar to "M. M. Sully" in many respects, but has more of a cream ground colour. 1/- each.

ODIN.—Salmon-orange, with crimson blotch on lower petals. 1/- each.

ORANGE GLORY.—A most beautiful ruffled orange, with light throat. A vigorous grower, broad foliage, tall and free flowering. 1/6 each.

ORBY.—Bright crimson, suffused and flaked deep crimson, shading to a lighter colour at edges. Distinct in appearance, and of rich colour with large spreading flowers on unusually long graceful spikes, this variety may be recommended for both decoration and exhibition. 1/6 each.

OUR SELECTION.—Salmon-red, flecked with a deeper shade and usually marked on the outer part of the flower with slate flakings. There is a cerise-cream bordered blotch on the lower petals of the extra large flowers, which are well arranged on long spikes. A first-class exhibition variety. 1/- each.

PAPILIO.—Terra-cotta, rather short growth, early flowering. 1/- each.

PHAENOMEN.—A very beautiful decorative variety with a most pleasing colour combination. The upper portion of the flower is soft salmon-pink with clean yellow blotches on the lower petals. Flowers of good size well placed on a spike producing up to six open blooms. 6d. each.

PINK WONDER.—Light pink-yellow, shading at the throat, overlaid with rose feathering. Often flowering with ten blooms on the spike. 1/6 each.

PORTIA.—Exquisite soft pink, with creamy-white throat. Good grower, good spike, but somewhat weak in stem. 6d. each.

PRIMUNELLA.—Soft yellow, shaded pink and slightly ruffled. An extremely fine novelty. 6d. each.

PRINCE OF INDIA.—An extraordinary combination of orange-buff, salmon, slate, etc., striped and marbled in an unusual way; lower petals orange-crimson on a cream ground, with the outside of the petals distinctly margined French grey. A variety of dwarf habit which has attracted much attention on account of its striking, uncommon colour, and is becoming very popular. 1/- each.

PRINCE OF WALES.—Recommended as one of the most beautiful varieties in existence. Has grand long spikes and large flowers of a lovely soft shade of salmon touched with cream on lower petals. Vigorous in growth and one of the earliest to bloom, it has achieved world-wide fame as a gladiolus par excellence for the cut-flower trade and florists' work. 6d. each.

RED LORY.—A splendid new variety, of which the beautiful and distinct colouring is orange-crimson, shading to bright orange on the edges of the petals. The lower portion of the flower is bright purplish-carmine edged with orange. A perfectly arranged spike bears ten to twelve open blooms. The flowers are large, well formed and of good substance. A variety of great value for exhibition purposes on account of its reliability in producing well formed spikes. 2/- each.

RED ROVER.—Rich crimson, flaked deeper dark spot, very fine. 6d. each.

RICH AND RARE.—Crimson, flaked and shaded with mulberry, white line; delightful shade of colour. 1/- each.

RICHARD DIENER.—Light rose-salmon, lightly flaked with deeper salmon. A variety of most attractive colouring and good show form, producing fine long spikes of well placed flowers. This variety will be popular on account of its beautiful colour. 1/- each.

ROMANCE.—Salmon, red and yellow centre. 6d. each.

ROUGET DE LISLE.—A gladiolus of the highest quality and one of the most reliable exhibition varieties in existence. The colour varies. At its best it is a rich reddish-orange, a striking blotch of purple or violet shade bordered with chocolate in centre. In type of flowers, and length and especially formation of spikes, this variety very nearly approaches the ideal. 1/- each.

ROSE ASH.—A very distinct variety of unusual colour. The centre of the flower is rosy-salmon, with the outer part overlaid with greyish lavender. The lower petals are yellow speckled with ruby. A popular variety on account of the unique colour. 6d. each.

ROSE BEAUTY.—Purplish-rose, white spot; fine bold spike. 6d. each.

SALMONEA.—Salmon and orange. 6d. each.

SALMON TROUT.—Salmon-scarlet. A good all-round exhibition variety. 1/- each.

STINTON'S "CLAREMONT" GLADIOLI

SCARLETTA.—A fine decorative variety of light scarlet colour with slender stems and a very light graceful appearance. 6d. each.

SCHWABEN.—The well known sulphur-yellow gladiolus, almost a self, the small brownish-carmine spot being well back in the throat. Fine, large flowers and long stiff spikes, though often rather too closely set. Has a truly magnificent constitution and is grown everywhere. 6d. each.

SHEILA.—This salmon-pink gladiolus is finding favour on account of its fine colour and decorative appearance. It has large, wide spreading, partly hooded flowers, lightly arranged on slender stemmed spikes. 1/- each.

SHRIMP.—Salmon-rose-pink, with cream lip; very attractive with its long spikes and dainty colourings. 6d. each.

SIR FRANCIS FOX.—Apricot-yellow, flaked with crimson, orange centre, lovely. 1/6 each.

SIR HERBERT MORGAN.—Yellow and gold ruffled with salmon. 1/6 each.

SIR H. P. BEAUMONT.—Pure yellow, a grand novelty. 6d. each.

SUNNYMEDE.—Brilliant orange-yellow, with a brilliant red blotch. A distinct and unusual gladiolus and a fine one. 1/- each.

SUNNYSIDE.—A champion of champions. Showing fifteen well formed flowers on a tall spike. The outer part of the flower is a beautiful cerise-pink, slightly flecked with a darker shade, the centre being pure white, which predominates as the flower expands. This variety is perfect in colour and spike. 3/6 each.

SUNSET.—Rosy-pink, splashed slaty-violet; a new shade. 1/6 each.

SYLPHIDE.—Beautiful bronze and brown, one of the most attractive gladioli. It may be used for bouquet or table decoration, for cut flower, or to be planted in the border. It will always be graceful no matter how used. 1/- each.

TEA ROSE.—A very interesting sort, with a most distinct colour, salmon-pink shaded orange, overlaid with yellow. Large flowers on tall graceful stem. Highly recommended. 1/- each.

THE KING.—Deep pink, carmine spot. 1/6 each.

TINAMBA.—A clear pale pink, flaked with salmon-rose, the centre petals being marked and shaded with mauve and cream. Has very large spreading flowers well placed on a good strong spike. A beautiful variety of distinct colour and strong constitution. 1/6 each.

TRUDEL GROTZ.—Immense spreading flower of an attractive shade of salmon pink, having orange flakes. Large blotch of orange-scarlet, with yellow line in the centre. This handsome gladiolus with its giant blooms and distinct colour will be popular for decorative purposes. 1/- each.

VESUVIUS.—Cherry-red, light red with greenish-yellow throat, very attractive. 6d. each.

VICTOR.—Colour brilliant scarlet, with large, conspicuous, pure white blotch on lower petals. It has extra large, well opened flowers, about six open at a time on strong, well formed spike. An exceptionally vigorous variety which can be recommended for any purpose. 6d. each.

VIOLET DE PARMA.—Beautiful shaped flowers of a pure violet shade, feathered white. The only variety of this colour, a beautiful gladiolus for exhibition purposes. 6d. each.

VIOLET QUEEN.—Clear violet, well opened flowers on medium-sized stem. Very attractive and free flowering. 6d. each.

WHITE GIANT.—Recommended as a pure white of quite exceptional size and vigour — truly a giant among whites. Valuable for floral work and the flower-bed. The spikes stand upright and strong, carrying a good number of open flowers. 6d. each.

W. H. PHIPPS.—This variety produces twelve or more open blooms of finest form on a tall spike. The flower is soft pink, overlaid with light rose-salmon, with cream linings in the throat. Highly recommended as a superb show flower. 1/- each.

WILTON.—A new reliable exhibition variety. Colour, salmon-orange with soft cream lip. Seven to ten large flowers always open on a spike of twenty or thirty buds. Size, substance, form and vigour perfect. 1/- each.

CHOICEST MIXTURE.—2/6 per dozen.

Any twelve varieties at 1/6 ..	1 corm of each for 15/-
Any twelve varieties at 1/- ..	1 corm of each for 10/-
Any twelve varieties at 6d. ..	1 corm of each for 5/-
Orders of less than 12 corms will be charged at list prices.	

PRIMULINUS HYBRIDS.

ALICE TIPLADY.—Lovely variety; flowers of good size and most attractive apricot-orange shade. 6d. each.

ARLON.—Large white-petalled flowers of bright orange-salmon, with a red throat. A bright conspicuous spot in the garden. Good strong spikes. 6d. each.

BUTTERBOY.—Soft butter-yellow; large flowers. 6d. each.

JEWELL.—The delicate salmon-pink shade and the yellow blotch on the lower petals form a very beautiful combination of colours. 6d. each.

L'AUTHIE.—One of the most delicate primis. The colour is pink, with yellowish centre, the whole flower is finely feathered brown. Large flower on strong stem. Highly recommended. 6d. each.

MADAM HERIOT.—Clear salmon-orange, shaded a little lighter on the edges. Considered the most delicate and graceful *Primulinus* we have ever seen. Every amateur should have it. A glorious gladiolus for exhibition purposes; well opened flowers. 1/- each.

MAIDEN'S BLUSH.—Clear delicate pink. An exquisite variety. 6d. each.

MIDSUMMER DREAM.—A geranium-red *Primulinus* of great beauty. Large and well expanded flowers on tall thin stem. A wonderful variety for exhibition purposes. Highly recommended. 6d. each.

MYRA.—Tall in growth and one of the largest. Colour a pleasing blend of salmon and yellow. 6d. each.

SAGINAW.—Medium light salmon buff, flaked smoky rose, a giant *Primulinus*. 6d. each.

STANDARD GOLD.—Fine long spikes of yellow; vigorous growth and good in every respect. 6d. each.

SCARLET CARDINAL.—This bright scarlet is the most brilliant in colour to be seen amongst the *Primulinus* hybrids. The flowers are of good size and are carried on graceful spikes. 6d. each.

TANGERINE.—An exquisite variety, producing tall, graceful spikes of glowing orange flowers. One of the finest *Primulinus* hybrids in existence. 6d. each.

THOTH.—A sulphur-white *Primulinus*, with light yellow throat. A very fine novelty. 6d. each.

WHITE BUTTERFLY.—Good white *Primulinus*. 1/- each.

SPLENDID MIXTURE ALL SHADES.—1/6 per dozen.

STINTON'S "CLAREMONT" ANEMONES AND RANUNCULUS

Stinton's "Claremont" Bulbs for Naturalising

An interesting and attractive addition to the garden is a corner devoted to the naturalising of bulbs. Many people dislike having to lift and replant bulbs each year.

A shrubbery or even a garden bed planted with several varieties of bulbs yields a quantity of cut flowers and requires little or no attention except for an occasional weeding if a garden bed is used.

When the bulbs are not in growth annuals may be sown in the bed if desired.

The following bulbs listed below are excellent for this purpose; the descriptions of them will be found elsewhere in this catalogue.

BULBS FOR NATURALISING

In Woodlands, Shrubberies, Orchards, Grass,
etc.

SPECIAL NOTICE.—These Collections offer special value for money, and cannot be varied under any circumstances.

STINTON'S "CLAREMONT" WINTER-FLOWERING SWEET PEAS

Winter flowering Sweet Peas are quickly gaining favour with all garden lovers. They flower over a long period and at a time when there are few other flowers. They should be planted in well prepared soil from January to the middle of March. By doing this the plants are well established before the soil gets too cold. A north-eastern aspect, protected from strong winds, is most suitable, and they will stand a considerable amount of frost. We offer only the choicest and most vigorous varieties.

3d. per Packet.

Larger Packets (three times quantity of seed), 6d. per Packet.

SPECIAL COLLECTIONS.

6 distinct varieties	1/3 per Collection.
12 distinct varieties	2/- per Collection.

ALBURY BEAUTY.—Large, orange-salmon self; always satisfactory.

ALBURY LAVENDER.—Self coloured flowers, lavender in colour.

ASTA OHN.—Lavender, suffused mauve; a beautiful variety.

AVIATOR.—Crimson-scarlet, a fine deep colour.

BLUE BIRD.—A beautiful dark true blue.

CHARMEUSE.—Bright rich shade of rose.

CONCORD COUNTESS IMPROVED.— lovely large clear pink.

CONCORD DEEP PINK.—A wonderful Pea, of great substance and telling colour; very vigorous.

CONCORD RADIANCE.—Bright rich shade of rosy cerise.

EARLY CANARY BIRD.—Rich deep cream or primrose.

ELFIN RUBY.—Beautiful bright red; excellent sort.

FLAMINGO.—Standard, bright orange; wings, orange-pink.

GENERAL JOFFRE.—Dark maroon, nearly black.

GLITTERS.—A rich sunproof scarlet of good substance.

GLORIOUS.—Warm rosy purple; fine large flowers.

GRENADIER. — Brilliant scarlet; magnificent flowers.

KOSCIUSKO. — Purest white; one of the finest white varieties grown.

LAURA.—Purple maroon; fine large flowers.

LIBERTY.—Bright glowing scarlet; lovely large flowers; extra.

MA BELLE ROSE.—A pale heliotrope of wonderfully good texture; good all round variety.

MRS. MAY HASSETT.—Pink, suffused cream; free flowering and fine long stems.

MOTTES PLUM.—Plum colour; good for exhibition.

NIAGARA.—Pale pink; lovely large flowers.

PRINCE.—Very deep blue; strong grower and large flowers.

SALMONEA.—Rosy salmon; a most attractive sort.

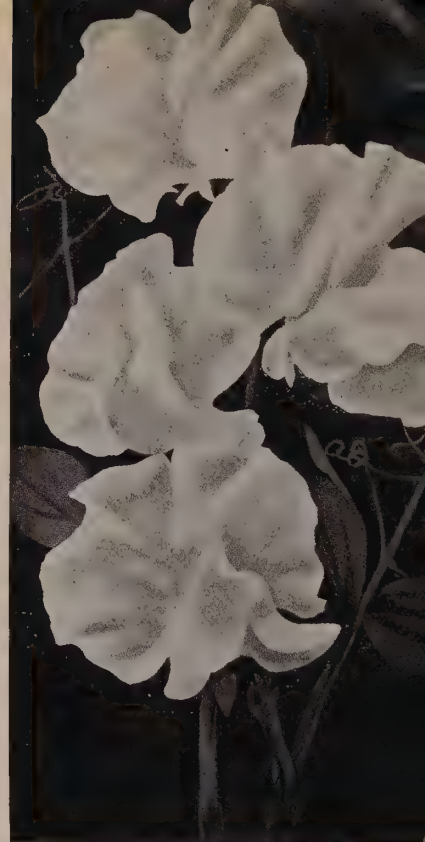

THALIA MOTTE.—Glowing crimson; large flower and fine spike.

VERSAILLES.—Pale blue, a beautiful shade of colour.

VERONIQUE.—Rose-pink; large flowers and very prolific.

YARRAWA.—Deep rose-pink, changing to light pink standard as blooms develop, with blush wings.

NOVELTY MIXTURE.—Containing the best of the newer varieties recently introduced, and comprising an excellent range of colouring.

STINTON'S "CLAREMONT" SPRING AND SUMMER FLOWERING SWEET PEAS

The seeds can be sown either in the open ground or in pots. The ground should be well manured and deeply dug in February or March, and the peas sown from April to August in double rows 9-12 inches apart. If the seeds are sown in pots, 3 or 4 inch pots will be the correct size, and the plants can be thinned to four or five to the pot when the seed is up. If the Peas are planted in clumps as taken from the pots 18 inches between the clumps will be required.

Rows should be at least 5 or 6 feet apart.

During dry weather after flowering has commenced, the ground round the Peas should be mulched with light manure, and copious waterings given.

If the finest blossoms are required for exhibition or other purposes,

BLAZE.—This variety is of great size, but cannot be considered of true Spencer type. On account of its fine quality and the fact that it is practically sunproof, we strongly recommend it for garden decoration. Wings and standards are of the same even tone of glowing orange-scarlet, and radiate a brilliance not to be found in any other orange-scarlet pea.

BRITTANIA.—Soft rose on deep cream ground; very frilled flowers on long stems.

CAMPFIRE.—Vivid scarlet; sunproof.

CHARITY.—Rich deep crimson; very large.

CHARMING.—Bright cerise; beautifully waved; large and vigorous.

CHIEFTAIN.—The plant is most robust in growth, and produces in the greatest profusion very long flower stems bearing four to five immense yet perfectly formed blossoms of a rich pure satiny mauve colour, entirely free of any purple shading.

COLORADO.—The colour is richer than orange, brighter than prawn red. The flower is equal in size to the best of Sweet Peas. Four and five flowers on excellent stems.

CRUSADER.—Standard; rich orange salmon; wings salmon shaded rose; a robust grower, very free flowering, producing large flowers, often five on a stem.

DELICE.—A pure pink self; enormous flowers on long stems; good exhibition variety.

DELIGHTFUL.—A rich terra cotta cerise, suffused orange; vigorous habit; perfect placement and a preponderance of flowers.

FLUFFY RUFFLES.—This marks the first of a new race of Sweet Peas. The flowers are so waved or ruffled to give it the appearance of an entirely different double flower. A beautiful shade of warm cream-pink, overlaid with soft light salmon. Of vigorous habit, it is an ideal variety for all purposes.

FORTUNE.—Very rich dark blue. Its wings are real blue, bright and solid. The standards, which are of great size, beautifully waved, are real rich violet. Suitable for garden, decoration and exhibition.

GLORIOUS.—This Pea is a decided improvement on any cerise yet offered. It has the habit of Charming, but the flowers are larger and richer in colour. A perfectly glorious variety all growers must have.

GOLD CREST.—Rich orange tinted salmon.

GUINEA GOLD.—Deep golden orange of good form, giving fours and fives freely, and standing the sun and wind better than most varieties of that shade.

HEBE.—Rich deep rose; an improved Hercules.

HONOUR.—We consider this variety will displace the old favourite crimson Charity; it is slightly deeper in colour, and the flowers are of better form.

IVORY PICTURE.—Rich cream on ivory; the form and build of the original Picture.

MARY PICKFORD.—A dainty cream pink, faintly suffused with salmon. Flowers of perfect form, with both standards and wings decidedly waved; the individual flowers are well placed.

each plant should be restricted to two or three shoots, which must be kept regularly tied up, and all side shoots removed as they appear.

Seed pods should never be allowed to form on the plants, or the season for flowering will be greatly shortened.

3d. per Packet. Larger Packets (three times quantity of seed),
6d. per Packet.

SPECIAL COLLECTIONS.

6 distinct varieties	1/3	per	Collection.
12 distinct varieties	2/-	per	Collection.

MAGNET.—A brilliant pink, very heavily suffused on a rich cream ground. A wonderful grower under all conditions. Large flowers are borne on long stout stems, producing in abundance four and five flowered sprays. This variety should be in every grower's collection whether for garden or exhibition.

MISS CALIFORNIA.—Rich salmon pink on cream; giving plenty of fours.

MODEL.—A good solid white (tinted) producing four well placed flowers on long stems.

MRS A. SEARLES.—Both outdoors and under glass it is top quality. Rich pink merging into soft orient red self, it is the nearest definition to the very remarkable and glorious colour.

OLYMPIA.—The flowers, which are very large, are of perfect form and well placed on long stout stems. The colour is a rich clear purple; one of the best in this section.

ROYAL BLUE.—The brightest of all the dark blues, a true rich navy or royal blue, glowing and bright; great substance, vigorous habit, and exquisite form.

RUDDIGORE.—The largest brilliant blood scarlet Sweet Pea. The standard is erect, wide, and of great substance; the flower stems are long, strong, and invariably carry four or five well placed perfect blooms, which are absolutely sunproof.

SKY.—Light silvery lavender blue. Though practically a self, the colour is slightly intensified in the wings. Flowers are large and well frilled.

SPLENDOUR.—Rich maroon red. This variety resembles Warrior in size and vigour, but is brighter and without a trace of purple; does not burn in the sun.

SUNKIST.—For many years Sweet Pea enthusiasts have been looking for a real good picotee edge cream ground novelty. The ground is a clear rich cream, and the pink picotee edging is clearly and cleanly defined. The flowers are large and bold, well waved, and beautifully placed on good stout stems.

SUSAN.—Dainty delicacy characterises the tints of this flower; the blush pink is laid on so lightly that a creamy ground colour merges through, and the standards and the reverse of the wings carry most pink.

SYBIL HENSHAW.—Deep rich crimson lake, with a bright metallic sheen overlaying the standard; very vigorous.

THE PRINCE.—A first-class exhibition variety. The flowers are exceptionally large and of magnificent form. The standard extends far beyond the keel. The colour is a rich clear crimson, overlaid with a beautiful metallic sheen.

TOM SYKES.—Wings scarlet pink; standard scarlet flushed with salmon on white. Some duplex flowers.

VENUS.—Cream pink, rather deeper than Fair Lady; very vigorous; perfectly fixed.

WARRIOR.—Very large shiny maroon.

WHAT JOY.—Large, solid, well waved cream; vigorous grower, producing fours on wonderful stems.

STINTON'S "CLAREMONT" MODERN BEARDED FLAG IRIS

Irises prefer a well drained soil. If the soil is likely to become water logged or soggy in the winter months the bed should be raised about three inches above the natural ground level.

Lime may be used fairly liberally; the plants thrive in a well limed situation.

When preparing an Iris bed, bone manure is the most suitable manure to use. Animal manure must be well rotted and worked down in the soil if it is to be used. Irises will flower in semi-shaded situations but to obtain the most satisfactory results they prefer an open sunny position. If possible it is as well to plant them in a bed to themselves where they may be left undisturbed after the flowering season is over.

Irises may be planted almost all through the year, though in the warmer months they require careful attention after planting. When planting Irises the rhizomes should be showing at the soil level. It is not necessary to lift them each year; they may be left undisturbed for about three years and then be lifted and divided to be planted back again. The blooms may be cut when the first flowers are opening; if the water is kept fresh every flower will come out.

When cultivating your Irises it is not necessary to cultivate deeply. The surface may be lightly worked up occasionally. Water the plants well before and during the flowering period about the beginning of October to the end of December.

Should the weather be excessively hot when they are going to rest a little water would be beneficial to them.

Pests and diseases are few among the Iris family if the old dying foliage is kept removed.

Never cut the old foliage half off; draw it clean from the rhizome.

We list the newest and most desirable varieties, and add to our stocks each year. We recommend these useful plants to the gardener.

ABBREVIATIONS.

S.—Standards or upright petals.

F.—Falls or drooping petals.

ABENDA.—A beautiful free flowering early variety, nearly 4 ft. high. S., large and incurved, a delightful shade of old rose overlaid bronze. F., rich madder crimson, suffused soft bronze. 2/- each.

ALLIES.—Strong grower, smoky wine color 2½ feet. 2/6 each.

AMBASSADEUR.—A late strong plant, with stout stiff stems, about 4 ft. Flowers very large, with smoky reddish violet standard, falls dark velvety violet, of great substance and almost horizontal. 2/- each.

ARIADNE.—Flowers large and strikingly beautiful. Height 3½ ft. S., very broad waved edges, pure silvery light blue. F., deeper blue, suffused with reddish violet at base; beard pale yellow. 2/- each.

ASIA.—A beautiful late flowering variety; one of the most glorious Irises in cultivation. Strong and tall grower; very free flowering. S., Pale lavender, suffused and reticulated yellow at base. F., light violet purple, paler at edges. 2/- each.

BELLARINE.—A splendid grower, with flower stems 4 to 4½ ft. high, and exceptionally large flowers of perfect form. S., light blue-violet, broad and waved at the margins. F., deeper in color. Quite distinct and sweetly scented. One of the most attractive varieties we have so far grown. 2/- each.

BELLADONNA.—Stout branching variety, growing 3 feet high. Color is a pleasing shade of rich china blue, for cutting or general decoration one of the most effective. 2/- each.

Effective planting of Modern Bearded Flag Iris near steps.

STINTON'S "CLAREMONT" MODERN BEARDED FLAG IRIS

- BENRIMO**.—A stout branching variety, with stems up to 4 feet high. S., large and incurved; a delightful shade of bright blue; F., light purple, with a conspicuous white lined base. Late flowering. 2/- each.
- BRONZETTA**.—Golden bronze and velvety maroon. 1/6 each.
- B. Y. MORRISON**.—Strong, but distinctly slender in stalk and leaf growth, medium height. S., pale lavender violet. F., velvety raisin purple, with a conspicuous broad lavender margin. Very distinct. 2/- each.
- CASSANDRA**.—Gigantic flowers, produced in great profusion. S., large, incurved, pretty shade of rose-violet. F., fully 3 inches long, crimson overlaid black with bold bronze, base reticulated white, bright orange beard. 2/- each.
- CHASSEUR**.—A very fine variety, with large flowers, opening dark yellow, and paling to a somewhat lighter shade. The standards are broad, and the falls roundish, with pale yellow centre. This variety, which flowers somewhat late, is certainly the best yellow we have. 2½ feet 2/6 each.
- CHESTER J. HUNT**.—Standards deep sky-blue, falls dark marine blue shading to the edges paler. Stigmas, pale blue; excellent. 1/6 each.
- CITRONELLA**.—One of the best yellows. Bright yellow standards. Falls, yellow, streaked brown. 2/6 each.
- CRETAN**.—The darkest and most handsome of the early flowering section. S., nicely arched and very bright blue-violet. F., rich violet-purple, giving at a distance the impression of black velvet. Sweet scented. 2/- each.
- CRUSADER**.—Beautiful violet blue, large; always admired. A fine variety. 1/6 each.
- CLUNY**.—Tall growing, with flowers of the largest size. Colour a lovely shade of pale lilac-blue the falls slightly deeper than the standards, with brown veining at the base. 2/- each.
- CZAR PETER**.—Very pale blue. 1/6 each.
- DIDO**.—A very beautiful variety. S., large and incurved bright mauve, overlaid bronze, F., over 2½ inches wide, brilliant crimson-violet, very free, exceptionally fine. 2/- each.
- DORA LONGDON**.—Pale wine-rose and yellow. 1/6 each.
- DUKE OF YORK**.—Stout branching stems, bearing many gigantic flowers of perfect shape and texture, well over 4 feet high. S., measuring 2¾ inches across, soft mauve-blue, faintly stained bronze. F., soft mauve-blue conspicuously illuminated with a bold orange beard. Early flowering. One of the finest varieties we have. Very sweetly perfumed. 2/- each.
- ED MICHEL**.—A fine Iris, tall spikes with large flowers, finely held and of splendid shape; the standards broad and filled. F., of great width, the colour is a distinct deep reddish petunia violet. Sweetly perfumed. Late. 1/6 each.
- EDEN PHILLIPS**.—A very beautiful Iris, and one of the most striking varieties yet introduced. Stout branching stems, large, well shaped flowers; a pretty uniform shade of dark lavender-blue, relieved with a bold white and yellow beard. Tall growing. 2/- each.
- FRANKLIN BEYNON**.—A pretty variety, producing its elegant flowers quite early, medium height. S., broad and incurved, light rose. F., soft rose, white and yellow beard. Extremely dainty. 2/- each.
- FERONIA**.—A fine strong variety, with large flowers on tall straight stems. S., unusual shade of soft rose-bronze. F., old rose, heavily lined madder crimson, rose and white halo surrounding its pretty sulphur beard. 1/6 each.
- FOSTERS YELLOW**.—Golden yellow, turning primrose. 1/6 each.
- FRA ANGELICO**.—A very free flowering variety. S., rich bronze, deepening at edges; F., bronze, shading to gold at base, and flushed with pale blue; very distinct. 2/- each.
- GAGUS**.—Clear Yellow; falls red lined. 1/6 each.
- GOLDCREST**.—Flowers bright violet blue, of a delightful self colour, with a conspicuous golden yellow beard which gives the variety its name. Height, 2½ feet. 2/6 each.
- HAKADOR**.—This pretty Iris is one of the most distinct in our collection, narrow grass-like foliage, thin wiry stems, 4 feet high, bearing 15 or more medium sized flowers, almost a uniform shade of pale rosy plum, with a pretty white beard. Invaluable for cutting. 2/- each.
- HALO**.—An exceedingly fine Iris, with flowers of the largest size and good quality. S., light violet; F., bluish violet. A good strong grower. 1/6 each.
- HARMONY**.—This most pleasing variety is a very distinct deep rich purple-blue self, the standards, falls and beard of exactly similar tone. A wonderful telling colour, not found in any other variety. Medium height and very free flowering. 2/- each.
- HARPALION**.—A beautiful variety, growing over 4 feet high, stems well branched gigantic flowers, well formed and freely produced. S., lavender, overlaid bronze. F., almost at right angles, deep lavender-blue, illuminated with a bronze beard. Mid season. 2/- each.
- HER MAJESTY**.—Standards rose, falls darker; veined cream. 1/6 each.
- HESTOINES**.—Very tall, stout branching stems, bearing many gigantic flowers; a delightful shade of silvery sky blue, massive light blue falls, with a conspicuous white lined base. 2/- each.
- HOMER**.—Fine rose pink variety. 1/6 each.
- IMPERATOR**.—A very fine free flowering variety, similar to "Ed Michel" but with larger and much more finely formed flowers of a more reddish bronze colour; 3 feet. 2/6 each.
- ISOLINE. A.M. R.H.S.**—Bronze yellow, tinged pale rose. 1/6 each.
- KING GEORGE**.—Dwarf, free flowering variety. S., purple-violet; F., crimson purple, with a conspicuous white and orange beard. 1/6 each.
- KNYSNA**.—Clear deep yellow, falls deep velvety red and brown. 1/6 each.
- LAMBRUS**.—Exceedingly tall, large well built flowers; S., broad and overlapping, rich lavender-blue, faintly mottled purple; F., rosy purple, conspicuous white mottled base, bright yellow beard. 2/-.
- LADY CHAS. ALLOM**.—One of the most beautiful new varieties. Rigid stems bearing large perfect shaped flowers of great texture. S., broad, incurved, rich blue; F., a few shades darker, set off with a bold yellow beard. Mid season. 1/6 each.
- LADY HILLINGDON**.—A distinct variety of peculiar coloring. S., fawn, suffused bronze; F., distinct shade of brown-crimson, edged sulphur fawn. 1/6 each.
- LADY LYLE**.—Massive light blue and indigo. Very fine. 1/6 each.
- LENT A. WILLIAMSON**.—One of the finest of the American varieties. Tall, strong grower, with extra broad leathery foliage. S., bright lobelia blue, shot fawn at the edges; F., rich velvety purple, suffused blue at the edge. Free flowering; a grand variety. 2/- each.
- LEONE TRENANCE**.—Standards, pale lavender; falls, slightly darker in tone, and much reticulated. The flowers are neat in appearance, of medium size and produced most freely. An established clump produces a wonderful effect in the border. 2/- each.
- LORD OF JUNE**.—A very strong grower, with massive flower of great size. S., palest lavender-blue; F., rich deep aniline blue. One of the finest Irises in cultivation; late flowering. 1/6 each.
- LORD LAMBOURNE**.—A magnificent variety, and one destined to become one of the world's favourites; perfect habit, branching stems, over 3½ feet high, bearing a profusion of large well shaped flowers. The colour combination is a pleasing one, a delightful shade of rose-fawn suffused with pale bronze; F., rich madder crimson, with white reticulated base, illumined with a bright yellow beard. 2/6 each.
- LORELEI**.—Pure yellow standards. Falls, yellow streaked violet. Very fine. 1/6 each.
- MRS. CHAS. PEARSON**.—Extremely dainty; tall branching stems, medium sized flowers; S., delicate mauve, F., rosy-mauve with a bold white lined blotch extending half-way down the falls; white beard. 2/- each.
- MRS. STUART LOVE**.—Wine and lavender-blue, tall and strong; light stems. 1/6 each.
- MONA**.—A very beautiful growing variety in the way of "Lord of June." S., a glorious shade of pale silvery-blue; F., light blue, stout branching stems, bearing a profusion of extra large flowers. 1/6 each.
- MRS. E. T. VIEUSSEUX**.—One of the finest of the many dark coloured varieties. S., bright crimson-purple; F., purple-black; early flowering. Tall growing. 2/6 each.
- MONTEZUMA**.—A good late yellow. S., Sunflower yellow, slightly spotted with bronze; the falls are pale yellow, lined with brown, and an almost white flush in the centre. A fine strong grower and free flowering. 2/- each.
- MRS. WALTER BREWSTER**.—This variety is vigorous and floriferous, about 3 feet high. Strong stiff stems, bearing sometimes six blooms at the same time. S., lavender-blue; F., aniline blue, the base veined on a white ground; beard yellow. Late flowering. 1/6 each.
- MEDRANO**.—A fine dark variety, with large flowers of fine form. S., well arched, rich dark violet, slightly suffused blue. F., same colour as standards but darker, heavily reticulated brown with a bright yellow beard. Sweetly scented. Late. 1/6 each.
- MAIDEN'S BLUSH**.—Extremely free, stout stems, nearly 4 feet high, well set with medium-sized flowers. S., soft lilac-rose; F., soft rose, yellow beard. Almost uniform in colour. 1/6 each.

STINTON'S "CLAREMONT" MODERN BEARDED FLAG IRIS

MADAM CHERI.—A tall, strong growing, free flowering variety, which gives a rich pink effect at a distance. The colouring is exquisite ageratum violet, washed with pink, and warmed by yellow undertone. Standard red-bronze. 1/6 each.

MDLLE. SCHWARTZ.—A magnificent Iris, raised in France. Very tall, with branching spikes bearing exceptionally large flowers. Colour palest mauve; many flowers open at a time. 1/6 each.

MELPOMENE.—A variety of outstanding merit, producing a profusion of attractive flowers. Stout branching stems, over 4 feet high, large well shaped flowers; S., dark lavender-blue; F., rosy blue; orange-yellow beard. 1/6 each.

MRS. H. F. BOWLES.—This is one of the finest introductions, and a colour combination that defies accurate description. Wiry slender branching stems, bearing a profusion of medium-sized flowers through the season. S., a most novel and delightful shade of soft brown overlaid old gold; F., glorious shade of brilliant brick red, glistening like a piece of silk, conspicuous white line base. 2/- each.

MAGNIFICA.—The largest flowered Iris we have. A fine strong plant, with branching stems reaching over 4 feet high. The flowers extraordinarily large, 6 inches high, and sweetly scented. S., light violet blue; F., dark reddish violet, with brown stripes at the base and yellow beards. One of the most beautiful and vigorous varieties. 2/- each.

NEPTUNE.—A fine tall Iris, similar in growth to "Lord of June." S., bright pale blue; F., purple-blue. Flowers of largest size, free flowering and reliable. 2/- each.

OLIVE MURRELL.—A magnificent tall growing large flowering variety of unusual colouring. S. of great size and finely arched, deep lavender rose shot with bronze. The slightly reflexed falls are a rich lavender-blue, shot with rose and bronze. The rich buttercup yellow of the beard and the style arms lights up the whole flower in a most beautiful manner. Sweetly scented. 2/- each.

OLYMPUS.—This is an extremely beautiful variety, large heavily built flowers, which are produced freely on stout branching stems. S. broad, incurved, rose overlaid soft bronze, massive falls over 2 inches broad, madder crimson, heavily reticulated white at the base, bold yellow beard. Height 4 feet. 2/-.

OLD IVORY.—Beautiful pale yellow standards. Falls, veined cinnamon. An outstanding variety. 2/- each.

OPERA.—A magnificent variety; a fine vigorous grower and free flowering, with blooms of medium size. S., bright rich pansy violet, shading to brownish violet at base; F., rich velvety violet-purple. A very striking Iris. 1/6 each.

PALLIDA FOL VAR.—A fine form, lavender; foliage brightly variegated; a gem. 1/6 each.

PALADIN.—Flowers of good substance; very large standards, and falls 2 3/4 inches broad, and very freely produced on branching spikes. S., clear violet-blue; F., deep rich violet-purple. Height 3 feet. 2/- each.

PROSPERO.—A fine strong growing variety with flowers of the largest size. S., pale lavender; F., rich deep violet-purple, slightly paler at the margins, heavily reticulated at the haft. Height, 3 1/2 feet. Late. 1/6 each.

PRINCESS ROYAL.—Tall, pale blue. 1/6 each.

PRINCESS VICTORIA LOUISE.—Pale yellow and plum colour, edged primrose, exceptionally fine flower. 1/6 each.

POWHATAN.—Very free flowering, of refined form and colour. S., rich petunia violet. F., slightly deeper, reticulated violet-purple on white. 1/6 each.

PERRY'S FAVOURITE.—Dwarf and free flowering. Slender, much branched stems; bearing a profusion of large, well shaped flowers, a uniform shade of rich violet, with a most remarkable white beard. 1/6 each.

QUAKER LADY.—Perfect shape and size, standards and falls pink; a lovely combination. 1/6 each.

QUEEN CATERINA.—A tall strong growing variety of outstanding merit; height 4 feet. Colour pale lavender-violet, with a rich orange beard. Flowers of fine lasting quality. 1/6 each.

RAFFET.—A late flowering variety with very large flowers. The standards and falls are a glorious uniform dark blue, the falls being striped at the base with white; 2 1/2 feet. 1/6 each.

ROSALBA.—A favourite on account of its striking colour. Flowers of medium size, giving a wonderful mahogany red effect in the mass. Free flowering. 1/6 each.

RUBY.—Flowers of medium size and perfect form. Colour a rich deep reddish violet-purple, the falls being slightly deeper in tone. A robust grower. 1/6

RHEIN NIXE.—Very charming form, with large flowers. Standards white, falls rich violet purple, with narrow white edge. 1/6 each.

SATIN QUEEN.—A large variety, spangled blue standards, velvety plum-purple falls. 1/6 each.

SIRDAR.—Remarkably free, stout branching stems, 3 1/2 feet high, bearing many enormous flowers. S., bright blue faintly edged silver; F., crimson-purple, shading to dark mauve. 1/6 each.

SOUVENIR DE MAD. GAUDICHAU.—A grand, deep violet-purple variety of extraordinary brilliancy of colouring. Flowers of the largest size, free flowering, and a strong, vigorous grower. One of the finest varieties in our collection; 3 feet. 2/- each.

SUNSET.—A strong grower, free flowering, and the last to flower. Sweetly scented. S. are real old gold, finely arched, and of good substance; F. are coppery yellow, heavily suffused with blue-violet in centre of the blade. Deep yellow beard. A fascinating mixture of real pastel colours. 1/6 each.

TITUS.—Tall branching stems, exceptionally large open flowers; S. broad, slightly incurved, brilliant shade of rosy mauve; F., standing at right angles, rose-carmine. 1/6 each.

THORA PERRY.—A charming pigmy form, growing about 1 foot high. Small flowers a uniform shade of violet-rose; a dainty little variety for a border. 1/6 each.

TITAN.—The largest of all the "Dominion" race. Enormous flowers with spreading falls, of very great substance, so that the flowers, in spite of their size, stand stiff and erect to the last. Arching standards, 3 inches broad, of light violet-blue. Broad smooth falls of violet-purple, deeper in the centre of the blade, and very conspicuous reticulations of white on the haft. Very strong plant, with broad massive foliage. Height 3 feet. Very free flowering. 2/- each.

TROOST.—Flowers are of large and good form, with deep rosy pink standards and paler falls, heavily veined violet, which changes to brown at the haft. 1/6 each.

VELVET QUEEN.—An improved Alcazar; very large flower; velvety blue and spangled blue. 1/6 each.

VICTORINE.—Standards white, blotched with purple, falls deep velvety purple, very fine and distinct. 1/6 each.

W. C. TERRY.—A grand iris, producing towering branching stems, nearly 5 feet high, smothered with large, brilliant coloured flowers. S., light violet-blue; F., bright crimson-purple, with a bold white base, yellow beard. 1/6 each.

WHITE KNIGHT.—The finest white iris we have flowered. Free flowering and pure white. Sweet scented. Late flowering. 1/6 each.

WYOMISSING.—Quite a new colour in Iris; rosy, white-veined rose. 1/6 each.

YEOMAN.—An exceptionally free flowering variety. Strong grower, with rich blue-toned flowers. S., clear light bluish violet, very large and arching; F., rich deep violet-blue, with light-brown reticulations at the haft. 2/- each.

ZOUAVE.—A pretty early flowering dwarf variety. S., white, suffused with lobelia blue; well arched; F., white, heavily spotted and reticulated with violet at the margins. 1/6 each.

ZILIA.—Strong growing variety and remarkably free; stout stems, bearing large well shaped flowers of a uniform shade of dark lavender-blue overlaid rose; very pretty. 1/6 each.

ZWANENBURG.—A free flowering early variety, opening its flowers in August and September. Colour silver splashed greenish old gold. Quite a rich Oriental colouring. Very fine for cutting. 1/- each.

REGELIO CYCLUS.—A hardy section which we recommend. The tubers should be planted an inch deep in soil to which the addition of a little bonemeal and lime has been added. Give them a sunny situation and good drainage. Named varieties only are available in shades of lilac, violet, wine, rose, violet-purple, black etc. 2/6 each, 25/- per dozen.

PUMILA or CRIMEAN.—These low growing iris are very suitable for the rock garden, the tufts of flowers giving a continuous show of flowers all through the spring. Obtainable in the following colours: Blue, purple, white, yellow etc. 6d. each, 5/- per dozen.

COLLECTIONS OF MODERN BEARDED FLAG IRIS. ∴ OUR SELECTION.

A. 12 distinct varieties, one plant of each, for 20/-

B. 12 distinct varieties, one plant of each, for 15/-

These collections contain a wide selection of colours and are offered in order to help those of our customers who find it difficult to make a selection.

STINTON'S "CLAREMONT" SPECIAL FLOWER SEEDS FOR AUTUMN SOWING

These seeds, in some cases unprocurable elsewhere in Australia, are the best of their kinds and, properly grown, will surpass any other strains in their respective classes.

ANEMONE, Coronaria, "Scarlet Emperor."—A wonderful new Anemone of the Coronaria type. The flowers are of immense size and great substance, and are borne on long clean stems reaching as far as two feet above the foliage. This new strain has now been re-selected and much improved, and now yields flowers up to 6½ inches in diameter. For decorative purposes, either in the garden or in the home, we know of nothing to equal this Anemone. 1/6 per packet.

ANEMONE, St. Brigid, "Claremont" Super-Hybrids.—In this superior strain of Anemone will now be found all the finest colours and largest flowers known to cultivation, the colourings ranging from pure white, through rose, pink, mauve, blue, down to brilliant scarlet and on to deep maroon. Invaluable alike for garden decoration or cut-flower purposes. 2/6 per packet.

Calendula Double Art Shades.

BEGONIA, "Claremont" Double Monarch Strain.—The best strain of these Begonias ever offered; a good percentage of doubles; very fine. 2/6 per packet.
CALCEOLARIA, "Claremont" Monarch Strain, Mixed. Excellent summer-flowering annuals, suitable for conservatories. Colourings ranging through brown, orange, rose, crimson, yellow and white, all variously mottled and spotted. 2/6 per packet.

CALENDULA, Double Art Shades.—This strain is entirely new in Calendulas. It contains many shades not previously obtainable, ranging from almost pure white, through cream and buff, to yellow and deep orange. Outstanding for massed bedding purposes and excellent for cut flowers. 1/- per pkt.

CALENDULA, "Radio."—One of the recent introductions. The double flowers are deep orange in colour. Excellent for indoor decoration. 6d. pkt.
CAMPANULA, Persicifolia, "Telham Beauty."—Blue. 6d. per packet.

CANDYTUFT, Mixed.—Extra select, a well blended mixture. 6d. per packet.

CINERARIA HYBRIDA, "Claremont" Special Strain.—Semi-dwarf; an excellent mixture, the best colours only having been retained. 2/6 per packet.

CINERARIA MULTIFLORA, "Claremont" Special Strain.—Semi-dwarf; carefully re-selected from a prize collection. 2/6 per packet.

CYCLAMEN PERSICUM, Giganteum Mixed.—An excellent mixture of good colours, ranging from purest white to deep red. 2/6 per packet.

CYCLAMEN PERSICUM, Choice Named Varieties.—
 "Cherry Ripe"—an almost pure scarlet. 5/- pkt.
 "Mont Blanc"—giant white. 5/- pkt.
 "Peach Blossom"—bright pink. 5/- pkt.
 "Princess May"—gigantic rose. 5/- pkt.
 "Rose of Zeklendorff"—light salmon. 5/- pkt.
 "Sanguineum"—deep blood-red. 5/- pkt.
 "St. George"—salmon, silvery foliage. 5/- pkt.

CYCLAMEN, Papilio Mixed ("Butterfly Cyclamen").—Dainty blooms in an excellent range of colourings. 2/6 pkt.

DIANTHUS.—Fine mixed, single or double. 6d. pkt.
DIGITALIS.—

"The Shirley"—a magnificent strain, colours ranging from pure white to deepest rose. 6d. pkt.
 "Ivory's Spotted"—a choice strain of spotted varieties. 6d. pkt.

GEUM.—

"Mrs. Bradshaw," fl. pl.—double scarlet flowers. 6d. pkt.

"Lady Stratheden"—golden-yellow flowers. 6d. pkt.

GLOXINIA, Hetherset Hybrids.—A grand strain of erect flowering varieties and most varied colourings. 2/6 pkt.

HOLLYHOCK.—

Chater's Double—extra choice. 6d. pkt.

Exquisite Mixed—large flowers, petals toothed and curled. 6d. pkt.

LUPINUS POLYPHYLLUS.—

Harkness Art Shades—these are decorative, tall flowered Lupins in delicate art shades. They like plenty of lime. 6d. pkt.

Laxton's Hybrids—wonderful range of colours. 6d. pkt.

MECONOPSIS BAILEYII ("The Blue Poppy").—This beautiful poppy produces its azure-blue flowers on stems two feet above the foliage. The seed should be sown where it is to remain in a somewhat shaded position. 2/6 pkt.

NEMOPHILA.—Mixed. 6d. pkt.

PANSY, Bedding Varieties.—

"Cliveden Blue." 6d. pkt.

"Cliveden Purple." 6d. pkt.

"Cliveden White." 6d. pkt.

"Cliveden Yellow." 6d. pkt.

"Emperor Frederick"—dark red, bordered orange. 6d. pkt.

"Helios"—pure yellow. 6d. pkt.

"La Brillante"—fiery red with dark spots. 6d. pkt.

"Wodan"—black. 6d. pkt.

Mixed from Choice Varieties. 6d. pkt.

PANSY.—

Bugnot's Giant Spotted—large and finely coloured (early). 1/- pkt.

PANSY, "Claremont" Special Exhibition Strain.

It is impossible to convey an adequate idea of the delightful variations in colour and marking of this well known and popular strain. Our seed is saved only from the largest and the best shaped flowers of the very richest colours, and we still consider this one of the finest Pansies in cultivation. Mixed colours. 3/6 pkt.

"Covent Garden"—very large flowers. 1/- pkt.

"Empress"—very choice mixture of large flowered type. 2/6 pkt.

Giant Curled. 1/- pkt.

"Madame Perret"—wine shades, large flowers. 1/- pkt.

"Non Plus Ultra"—superb, large flowered. 1/6 pkt.

Stinton's "Claremont" Special Flower Seeds for Autumn Sowing.

"Orange King"—Lower petals vivid orange, upper petals shaded apricot. 1/- pkt.
 Odier's Blotched and Stained—Very choice. 1/- per packet.

Roggli's Giant Mixed—Large, good colours. 2/- per packet.

Scotch or Fancy — An excellent mixture of exhibition type. 2/- per packet.

"Triumph of the Giants" — Fine large flowered strain. 2/6 per packet.

"Ullswater" (Sutton's) — Immense blooms of rich wedgewood blue, with deeper blue markings. 2/6 per packet.

PENTSTEMON, "Claremont" Strain :

Produces magnificent large flowered plants in all the best and most wanted colourings. 2/6 per packet.

POPPY, ICELAND :

"Claremont" New Hybrids — Very fine, reselected strain containing excellent colourings and no weak flowers. 1/- per packet.

"Coonara Pinks"—An excellent mixture of pink shadings; good exhibition strain for size and quality of colour. 1/- per packet.

"Sunbeam" Strain — Much improved strain with excellent range of colours. 1/- per packet.

POLYANTHUS PRIMROSE :

Mixed—Carefully reselected, and comprising the best colours only. 2/- per packet.

"Claremont" Blue-flowered—Very fine. 2/6 per packet.

PRIMROSE :

"Claremont" Blue Shades — This is the finest and most vigorous strain on the market. 2/6 per packet.

"Claremont" Mixed Hybrids — Carefully reselected from a prize collection. 2/6 per packet.

PRIMULA MALACOIDES :

"King Albert" — Soft rose; the flowers are of perfectly circular outline. 2/6 pkt.

"Princess Mary" — Deep rose-pink; great improvement on the old Malacoides. 2/6 per packet.

"Princess Patricia" — Bright rose flowers, beautifully laced. 2/6 per packet.

PRIMULA OBCONICA :

"Claremont" Giants — A magnificent strain and will produce larger and better coloured blooms than any other. 2/6 per packet.

RANUNCULUS :

"Claremont" Super-Hybrids, No. 5—

Admittedly the finest strain in cultivation, comprising a brilliant mixture of bright colours. It is outstanding in its harmony of colouring, size and form of flowers and robustness of constitution. 2/6 per packet.

STOCK :

"Claremont" Giant Perfection — Choice mixture of finest reselected colours. 2/6 per packet.

STOCK, Giant Winter Flowering Type (height 30 inches). Price, 6d. per packet.

"Abundance" — Rosy-lilac.

"Almond Blossom"—White shaded carmine.

"Aurora" — Buff, suffused rose.

"Beauty of Naples" — Fine old rose.

"Beauty of Nice" — A delicate flesh pink.

"Bianca" — Purest white.

"Crimson King" — Brilliant crimson.

"La Brilliance" — Crimson; very early.

"Light Violet" — A lovely colour.

"Lloyd George" — Blood red.

"Nuit d'Éte" — Dark blue.

"Parma Violet"—Very choice and delicate.

"President Wilson" — Dark lilac.

"Queen Alexandra" — Rosy-lilac.

"Rose Queen" — A lovely shade of rose.

"Rose of Nice" — Carmine-rose.

"Salmon King" — Bright salmon-rose.

"Yellow of Nice" — A fine vigorous yellow. Choice Mixed.

VIOLA :

"Claremont" Strain — Choice mixture of the best varieties. 1/- per packet.

Stinton's Apricot — Beautiful rich apricot shade, tinted towards the centre. A very unusual shade. 2/6 per packet.

SCHIZANTHUS MAXIMUS :

Chislehurst Giant Hybrids — Large flowered strain, with many exquisite violet and purple shades. 2/6 per packet.

Dr. Badger's Hybrids — This strain of Schizanthus is undoubtedly one of the finest in commerce. The plants are of excellent habit and the flowers show an unusually wide range of colours in various markings and combinations. 2/6 per packet.

- Dobbie's Model White — Crisp and good.
- Early White Stone or Six Weeks — Hardy and early.
- Golden Ball — Yellow, sweet.
- Manchester Market — Free growing.
- Swede — Laing's Garden — Medium sized, sweet.

What a Bean! — The New Bean "Acme"

Offered for the first time in Australasia — destined to be the

LEADING COMMERCIAL VARIETY

for its super-qualities found in no other bean; a real "find" in the seed world! "ACME" is marvellously disease and wilt-resistant — test-proven, hardy, EXTREMELY PROLIFIC — altogether a

HIGHLY PROFITABLE PROPOSITION!

"ACME" is one of the dwarf species, long-podded, fleshy, tender, epicurean flavour, superb colouring, an EARLY MATURER — in fact a

REAL MARKET WINNER!

But it's not so much what WE say as what OTHERS do. Just listen to this: Mr. M. C. Gallagher of Cowper, Clarence River, N.S.W., writes, of his own volition, as follows:

"I have much pleasure in sending you this unsolicited testimony to the value of your new bean 'ACME,' having tried it here this Spring with the well known standard variety 'CANADIAN WONDER'.

I found it to be slightly earlier than the 'C.W.,' much more prolific on the first pick, more disease-resistant — particularly healthy, in fact. The bush grows to a nice size and the beans, being of good length, are very easy to pick and are of splendid quality — a good carrier and of nice appearance, it brought a shilling a bushel more than the top market quote for me.

I have yet to find faults with it, and congratulate you on the introduction of something of real value to the home and market gardener."

9th November, 1933. (sgd.) M. C. GALLAGHER.

HOW'S THAT FOR PROOF?

Supplies Very Limited — Don't Miss It! ITS NAME IS "ACME"

Packets 2/6 and 5/- each — Post Free.

STINTON'S "CLAREMONT" MODERN HYDRANGEAS

The modern Hydrangeas far surpass the old forms of *Hydrangea hortensis*, both in form and in colour. Many original forms are now offered, and are worthy of a place in gardens. Hardy, low-growing shrubs, mostly deciduous, giving large heads of flowers in summer. In a soil containing iron the flowers almost invariably turn blue. To change the flowers blue in an ordinary soil, water occasionally from early spring to nearly flowering time with a weak solution of ferric alum, or sulphate of iron. In pruning, cut back at flowering time, or not later than the end of January. Do NOT prune in winter time — just cut any stem that is too tall. Water well in summer.

ACUMINATA — Beautiful deep blue flowers. 2/6 each.
ADELAIDE — Rich pink, shapely large truss. 2/- each.
AIJASAI — Pale pink flowers borne in large trusses. 1/6 each.
AMERICA — Very fine blood red, compact habit, large head turns a good blue in iron soils. 2/6 each.
ARCHIE MOWBRAY — Free flowering strong growing variety. Brilliant rosy mauve colour. 2/6 each.
BARONESS SCHOEDER — Flesh pink of uncommon shade. Strong growth. 2/- each.
BELGICA — Colour deep pink, dwarf free flowering. Blues readily 2/6 each.
BLUE LILAC — Distinct shade of blue flowers, borne in large trusses. Vigorous habit. 1/6 each.
BLUE PRINCE — Rosy red, beautiful cornflower blue when treated. 1/6 each.
CANDEUR — Pale cream colour, free flowering 1/6 each.
CENDRILLON — Dwarf, free flowering variety. Bright carmine flowers. 2/- each.
COLONEL DURHAM — Carmine crimson, compact blooms, very free. 2/6 each.
COQUELICOT — A very striking deep red. Dwarf habit. 1/6 each.
D. B. CRANE — A nice pink, wonderful truss, large petals. 2/- each.
DOMOTI — Beautiful large pale pink. Double flowers, dwarf, compact type. 2/6 each.
DUITSCHLAND — Deep pink, vigorous growing, compact, dwarf habit. 2/6 each.
E. G. HILL — Deep pink, easily turned to blue. 2/- each.
ECLAIR — Deep red, a beautiful variety of splendid habit. 2/- each.
ECLEUREUR — Free flowering dwarf habit. Carmine flowers. 2/6 each.
ETINCELLENT — A variety of perfect form. Brilliant crimson flowers. 2/- each.
FLORENCE BOLT — A fine variety, nice habit. Soft pink with deeper centre; good truss. 3/- each.
GERMAINE MOULIERE — Beautiful pure white variety, good foliage. Large truss. 1/6 each.
GERTRUDE GLAHN — Fine rich pink, compact growth. Good truss, large, individual flowers. 2/- each.
GOLIATH — Enormous truss. Flowers large clear pink. Blues readily. 1/6 each.
GUUDRUM — Early, dwarf, free flowering variety. Bright rose pink flowers 1/6 each.
H. B. MAY — Bright rose pink shaded mauve, good truss. 2/- each.
HELGE — Fine dark rose, large truss, dwarf habit. 2/- each.
HORTENSIS CYANOCLADA — The old pale pink variety. Strong growing, large truss. 1/6 each.
JOHN MENSING — A good variety. Dark rose coloured flowers. 2/6 each.
KRIEMHILDE — Salmon rose. Fringed petals. Early, free flowering. Compact habit. 2/- each.
LIEBLING — Early flowered, dwarf growth. Bright salmon pink colour. 2/- each.
LORELY — Early dwarf, rich carmine red flowers. 2/6 each.
LOUIS SAVAGE — Bright red, nearest to crimson. A good dwarf variety. 2/- each.
MADAME E. CHAUTARD — Rose coloured flowers, strong grower. 1/6 each.
MADAME TRUFFAUT — Free blooming, deep rose pink, nicely shaped truss. 1/6 each.
MADAME DE RIVERAIN — Intense clear blue, one of the best. 2/- each.
MDE. RONSARD — Fine cream, very distinctive. Free flowering. 1/6 each.
MME. P. de VILMORIN — Dark rose coloured flowers. Compact habit. 2/6 ea.
MADAME de VRIES — Large cup shaped flowers, beautiful apple blossom pink colour; strong grower. 1/6 each.
MARECHAL FOCH — Free flowering and dwarf. Metallic blue flowers shading to old rose. 2/- each.
MARIE MATHES — Silky rose, large solid shapely truss. 1/6 each.
MRS. BAARDSE — Vivid salmon; splendid habit. A fine all-round variety 2/- each.

MRS. CHAS. MILLS — Deep salmon red. Large flowers and truss. 2/6 each.
MRS. H. J. JONES — Pink, Dresden china shades, very large truss, compact growth. 2/6 each.
MRS. P. CATO — Rich pink, one that has attracted a lot of attention. Good grower. 1/6 each.
MOUNT ROSE — Very large deep pink flowers. 2/- each.
NEIGE ORLEANISE — Wonderful white. Excellent form considered to be the best white. 1/6 each.
NIEDERSACHEN — Very large truss, beautiful mauve-pink flowers. 1/6 each.
NIXE — A distinct shade of carmine red, very deep colour, good habit. 2/6 each.
OTASKA — An uncommon variety. Clusters of small flowers surrounded by large blooms. Strong grower. 1/6 each.
PARIS — Fine shaded pink, strong habit, a good variety for blueing. 2/6 each.
PARSIVAL — Beautiful deep carmine red, deeply fringed petals, well formed petals. 2/6 each.

STINTON'S "CLAREMONT" ROCK PERENNIALS

A section of the Rock Garden at our "Claremont" Nurseries.

The following list contains many interesting and quaint plants suitable for rock garden purposes. They may either be used for walls, paved walks, planting among rocks, or set on rock banks.

Rock gardening is not to be seen much in Australia at present. However, people are continually taking up this form of gardening and are finding it one of the most interesting. Some people have referred to it as being a Lilliputian form of gardening, the plants in most instances being of a dwarf habit, the height of growth ranging from one to twelve inches.

Drainage is essential to most rock plants; there are, of course, subjects which require a moist, damp situation. When building your rock garden be careful to have aspects facing north, south, east and west. Quite a number of rock subjects prefer an easterly or southerly aspect.

The colours of the flowers should be thought out and the plants placed in the positions to give the best effect. Do not go in for too much of the one plant. A large variety of plants gives you flowers all through the year and there is always something making a show of colour.

One of the main attractions with rock gardening is the fact that there is always something new to see and to admire.

STINTON'S "CLAREMONT" ROCK PERENNIALS

ACAENA:

Adsurgens — Hardy trailing shrubby plants. Attractive greyish-brown foliage. Nine inches. 1/- each.

Buchananii — A variety from New Zealand, very good for rock garden purposes; nine inches. 1/- each.

Microphylla — More prostrate in growth than the above varieties. Green foliage turning in autumn; six inches. 1/- each.

AJUGA. (Bugle):

Reptans Purpurea — Charming dwarf plant, giving an abundance of blue purple flowers. Extremely hardy. 1/- each.

ALYSSUM. (Madwort):

Citrinum — Attractive lemon-yellow flowered rock subject sweetly scented. Admirable for an edging among rocks. 9d. each.

AMPHICOMBE:

Arguta — Decorative foliage plants. Produces an abundance of lilac-colored flowers. Suitable for rock-garden or herbaceous border purposes. 1/- ea.

ANEMONE:

Montana — A clump of this subject makes a charming patch of colour. The purple flowers are borne on stems about twelve inches high. 1/- each.

Pulsatilla (The Pasqueflower) — This variety is more effective if planted in masses. Purple flowers with golden yellow centre. 1/6 each.

ANCHUSA:

Myosotidiflora — A fine plant growing about eighteen inches high. Sprays of pale blue flowers. 1/- each.

ANTIRRHINUM:

Rock Hybrids, Mixed — Choice collection of new Tom Thumb varieties. 2/6 per dozen.

AQUILEGIA (Columbine):

Pyrenaica — Will thrive in ordinary soil. Blue flowers borne singly on stems 12 inches long. 1/- each.

ARABIS (Rock Cress):

Alpina — Hardy perennial, useful for bedding purposes or rockeries. Flowers are white. Height six inches. 6d. each.

Alpina Rosea — Hardy perennial, useful for bedding. 9d. each.

ARENARIA (Sandwort):

Balearica — Mossy plant, bearing white flowers, useful for trailing on rocks. 1/- each.

ARMERIA (Giant Thrift):

"Bees Ruby" — Hardy perennials, low growing foliage, sending up flower heads eighteen inches high. Deep rose-pink in colour. 6d. each.

Gigantea — Glistening pink shade. 6d. each.

Gigantea Ruber — A striking variety of deep red colouring. 6d. each.

Vindictine — A variety of striking appearance; the flower stems rise nine inches from the foliage, bearing glorious crimson-purple blooms. 6d. each.

ARTEMISIA (Wormwood):

Stillariana — Dwarf shrubby plant bearing yellow flowers above the attractive foliage. 1/- each.

ASPERULA (Woodruff):

Cynanchica — A shaded position would be the best for this subject; pink flowers; plants about nine inches high. 1/- each.

Odorata — White flowered variety, suitable for shady situation. 1/- each.

ASTER (Starwort):

Alpinus — Dwarf growing variety, clear lavender blooms borne profusely in Spring. 1/- each.

Alpinus subcoeruleus — A delightful mauve flowered variety. 1/- each.

AUBRETIA: Hardy creeping border plant; excellent for rockeries, giving a brilliant show in Spring and Summer.

Bougainvillii — Light violet-purple. 6d. each.

Deltoides — Blue. 6d. each.

Hendersonii — Deep purple. 6d. each.

Leichtlini — Rosy lilac. 6d. each.

Purpurea — Deep purple. 6d. each.

Rosea splendens — Pretty trailing plant, attractive pink flowers. 6d. each.

Twilight — A hybrid with pale pink heads of flower. 6d. each.

Violet Queen — Deep violet. 6d. each.

Whitewell Gem — Lavender. 6d. each.

Large-flowered Hybrids — Choice mixture. 6d. each.

AURICULA (Dusty Miller): This race of shade-loving plants is remarkable for the wonderful range of colours obtainable. The colours embrace many odd shades of purple, pink, buff and green.

Hybrida — Mixed varieties, flowering from Winter to early Spring. The dwarf plants are very similar to Primulas in growth. 1/- each.

BELLUM:

Minutum — Flowers similar to the daisy, very dwarf, white flowered rock subject. 1/- each.

BETONICA:

Grandiflora rosea — Hardy little plant, growing to about eighteen inches; pink flowers. 1/- each.

BORAGO:

Laxiflora — Loose blue flowered trailing rock plant; a lover of half shade. 1/- each.

CALANDRINIA:

Umbellata — A bordering plant of neat spreading habit; showy flowers of deep carmine colouring. 1/- each.

CAMPANULA:

Spreading plants, long flowering, most varieties thriving best in moist situations. 1/- each.

Bellardi — Beautiful clear blue.

Carpatica — Blue, large flowers.

Carpatica alba — Pure white.

Collina — One of the best deep blues.

Exisa — Small foliated variety; blue.

Fragilis — An attractive variety of a pleasing shade of blue.

Garganica C. W. Payne — This variety is perhaps the best of the trailing species. The plants bear a profusion of blue and white star shaped flowers over a long period.

Garganica Hursuta — Somewhat taller in growth than other varieties; one of the best blues.

Isophylla — A beautiful rock species of these attractive garden subjects, plants of a trailing habit being covered in the Spring with masses of small bluebell flowers.

Hosti — Good blue flowering harebell.

Hosti alba — A lovely white form of the above.

Istriaca — Prostrate species, profusion expanded blue bells, with protruding stamens. Six inches.

Lauri — Very floriferous variety. Beautiful lavender blue flowers.

Muralis — Trailing species, lovely blue-purple flowers.

Pulla — A purple-flowered variety, growing about 12 inches high.

Pumila alba — Charming white bells, six inches.

Pumila "Miss Willmott" — Lovely light blue.

Rhomboidalis — Useful spreading plant. Sapphire-blue flowers borne in thick clusters on stems. Twelve inches long.

Turbinata — Dwarf growing variety. Dark purple-blue.

Aubretia growing on wall.

STINTON'S "CLAREMONT" ROCK PERENNIALS

CENTAUREA :

Dealbata — One of the useful rock plants growing about eighteen inches high; mauve-pink flowers. 1/- each.

CERASTIUM :

Hardy trailing perennials, suitable for rock work.

Biebersteinii — White foliage, snowy-white flowers; this variety is evergreen. 6d. each.

CHEIRANTHUS. (Siberian Wallflower) :

Allioni — Early flowering perennial, with glorious orange flowers. Very attractive subject for the rock garden or massed bedding effect. 6d. ea.

CISTUS. (Rock Rose) :

Algarvense — Dwarf shrub covered in Spring with yellow flowers and black centre; very striking appearance. 1/- each.

Helianthemum, Mixed — Attractive subject for the rock garden; suitable for dry situations. 6d. each.

CONVOLVULUS :

Cantabricus — Trailing pink flowered plant; prefers sunny position. 1/- ea.

Mauritanicus — Blue flowered plant for rock work purposes. Low growing, sending long sprays all over the rocks. 1/- each.

CORYDALIS :

Cheilanthesfolia — Plant close among rocks for best effect. Attractive fern-like foliage. Yellow flowers. 1/- each.

COTULA :

Hastii — Dwarf creeping herb. Excellent carpeting plant; finely cut foliage. 1/- each.

Pyrethrifolia — Fern-like foliage; a variety from New Zealand. A good carpeting variety. 1/- each.

CRASSULA :

Album — Suitable for rockeries; spreading habit, very fast growing. 6d. ea.

CRUCIANELLA (Crosswort) :

Stylosa — A trailing plant that will thrive in any position. Pink flowers. 1/- each.

CYANANTHUS :

Lobatus — Small blue-flowered trailing plant a lover of sandy soil. 1/- each.

CYNOGLOSSUM :

Nervosum — A good, hardy perennial with deep blue flowers. 1/- each.

DIANTHUS. (Pinks) :

Alpinus — A lovely Alpine pink, thriving best in semi-shade. Large carmine flowers spotted crimson. A striking variety. 1/- each.

Caesius (Cheddar Pink) — Six inches high; glaucous green foliage; fragrant pale pink flowers; likes an old wall or gritty chink; excellent for rock garden. 6d. each.

Cruentus — Good scarlet flowered variety. Flowers borne on stems twelve inches long. 1/- each.

Deltoides (Maiden Pink) — Nine inches high; prefers dry position, but will thrive almost anywhere; colour bright pink. 6d. each.

Rosemond — Hybrid alpine pink; semi-double salmon pink, blooms nine inches. 1/- each.

Squarrosus — Dwarf white flowered species, fragrant and showy. 1/- each.

DIASCEA :

Barbarea — A delightful flower; salmon pink colouring; easy to cultivate. 1/- each.

DIANELLA :

Intermedia — Grass-like foliage, attractive sprays of blue flowers followed by blue berries which last on the plant for several weeks. 1/- each.

EPILOBIUM. (Willow Herb) :

Nummarifolium — A tiny creeping plant; grows tight on the ground. Minute white flowers. 1/- each.

EPIMEDIUM. (Barrenwort) :

Versicolor — A plant of outstanding qualities. The flowers change color from yellow to red and are borne on stems about twelve inches long. 1/- each.

ERIGERON. (Summer Star Wort) :

Glaucus rosea — A prostrate species; pretty rose pink flowers. 1/- each.

Mrs. Gale — Very dwarf, producing flowers of a pleasing mauve shade. 1/- each.

Philadelphicus — This variety grows to a height of twelve inches; deep purple. 1/- each.

ERICA :

Alporti. English Heath — Alpine shrubby plant bearing lilac-mauve flowers. 1/6 each.

Vagans rosea — A low growing trailing species of attractive appearance; rosy lavender flowers. 1/6 each.

ERINUS :

Alpinus — Easy rock plant to grow of very neat habit; lilac. 1/- each.

Alpinus albus — A pure white form, thrives well in gritty soil. 1/- each.

Alpinus carmineus — Compact alpine evergreen giving small spikes of carmine flowers; six inches. 1/- each.

EUPHORBIA :

Myrsinites — Tuft of grey-green foliage from which the yellow flowers rise on stems about twelve inches in length. 1/6 each.

ERODIUM. (Heron Bill) :

Amanum — Alpine plant with grey fernlike foliage, white flowers; six inches. 1/- each.

FESTUCA. (Fescue Grass) :

Glaucia — An ornamental grey foliage grass, about six inches high. 1/- ea.

FUCHSIA :

Procumbens — One of the most attractive subjects for walls. The trailing plants bear quaint brown and yellow flowers followed by purple-red berries in winter. 1/6 each.

GALIUM. (Bed Straw) :

Rubrum — A useful plant for covering rocks or rock work. The reddish purple flowers make a bright show in Spring. 1/- each.

GENTIANA. (Gentian) :

Cruciata — One of the easiest varieties to cultivate; deep blue flowers. 1/6 each.

Moorcroftiana — The pale blue flowers are held erect on stems six inches long. 1/6 each.

Sino-ornata — A variety from China of trailing habit; superb azure blue trumpets in autumn. 1/6 each.

GERANIUM. (Crane's Bill) :

Well-known plant that will thrive in any position.

Cinerium — Alpine species; pale pink veined purple, four inches. 1/- each.

Freemontii — Erect habit, rosy lilac flowers; twelve inches. 1/- each.

Hybridum "Russell Prichard" — An excellent hybrid, producing magenta flowers for months. Trailing habit. 1/- each.

Lancastriense — Prostrate species, pale pink flowers. 1/- each.

Traversi — Fine foliage, soft lavender pink flowers. 1/- each.

Sanguineum compactum — Very compact with dark rosy pink flowers; nine inches. 1/- each.

Wallichianum — Pale purple flowers; very effective. 1/- each.

GEUM :

Borisii — A plant that should be in every rock garden. The beautiful orange-red flowers are borne in profusion throughout late Spring and Autumn. 1/- each.

GLOBULARIA :

Cordifolia — A compact growing creeping plant, suitable for covering large rocks. Lavender blue flowers; will thrive in common soil. 1/- ea.

GYPSOPHILA :

Attractive little perennial for bordering purposes; light foliage and masses of small flowers. Plant in sunny position.

Fratensis — Neat alpine plant with rose pink sprays of bloom. 1/- each.

Paniculata — Small white flowers borne on thin stems in gauzy masses. 6d. each.

Repens — Charming rock perennial, producing masses of pale rose coloured flowers; three inches in height. 6d. each.

HELIANTHEMUM. (Sun Roses) :

Excellent plants for wall, thrive in dry situations.

Croceum — Brilliant yellow. 1/- each.

Fireball — Intense glowing scarlet. 1/- each.

HERNIARIA :

Glabra — Smooth leaved evergreen herb. One of the best carpeting plants. 1/- each.

STINTON'S "CLAREMONT" ROCK PERENNIALS

HEUCHERA:

Pink Fairy — A small type of attractive appearance. 1/- each.

HIERACIUM. (Hawkweed):

Aurantium — Hardy orange flowered herbaceous perennial. Will thrive in light rich soil. 1/- each.

HYPERICUM. (St. John's Wort):

Fragile — Prostrate variety of fine merit. Bright yellow flowers. 1/- each.

Olympicum — An admirable edging plant, yellow flowers borne in profusion. 1/- each.

IBERIS. (Perennial Candytuft).

Gibraltarica — Beautiful species, producing large heads of pale mauve flowers. 6d. each.

INULA:

Ensifolia — A small perennial plant suitable for rock garden or border purposes. Yellow flowers. 1/- each.

IRIS:

Stylosa superba — A small variety of Stylosa with grass-like foliage. Pretty lilac-blue flowers; six inches. 1/6 each.

JASIONE:

Perennes — Dwarf plant preferring a sheltered position. Blue flowers. 1/- each.

LANTANA:

Sellowiana — A mauve-purple flowered form of trailing habit; very suited for rock work. 1/6 each.

LAVERDULA:

Alpina — Dwarf compact subject. Deep lavender flowers sweetly scented, early; twelve inches. 1/- each.

LINARIA. (Toad Flax):

Cymbalaria alba — Useful trailing plant for rocks, masses of white flowers. 1/- each.

LINUM. (Flax):

Campanulatum — The yellow flax. Free flowering. Twelve inches. 1/- each.

Perenne — A beautiful free flowering pale blue flax, good rock. plant; twelve inches. 1/- each.

LITHOSPERNUM:

Prostratum — An excellent plant for rock edgings, giving masses of deep gentian-blue flowers 1/6 each.

LOLIUM:

Perenne Variegata — This is one of the hardiest and most attractive ornamental grasses we have for rock garden purposes. The green and white foliage gives a striking note of colour to the rockwork. 1/- each.

LOTUS:

Peliorhynchus — Grey foliaged trailing plant, useful for rock work; gives a brilliant show of scarlet and brown flowers in Spring and Summer. 1/- each.

LYCHNIS:

Alpinum — Small tufts of foliage. Heads of rose coloured flowers very attractive rock garden subject. 1/- each.

Pyrenaica — Dwarf growing species, producing pretty clusters of palest pink flowers. 1/- each.

Viscaria Splendens — Neat rock garden or border plant, spikes of deep pink flowers 1/- each.

LYSIMACHIA. (Loosestrife):

Nummularifolia (Creeping Jenny) — Creeping plant preferring a moist spot. Pretty yellow flowers. 1/- each.

MARGYRICARPUS:

Setosus — Pearl Berry. A shrubby trailing plant with attractive white berries. 1/- each.

MENTHA. (Mint or Pennyroyal):

Alpinum — Very dwarf plant, trailing in dense masses close to the ground. The foliage has a very sweet perfume. 1/- each.

MENZIESIA:

Polifolia Alba — Irish Heath. Alpine species with white bells resembling Lily of the Valley. 1/6 each.

Purpurea — Purple flowered form of the above. 1/6 each.

MIMULUS (Monkey flower):

Cardinalis — Beautiful orange-red flowered musk. Plant in semi-shaded position. 1/- each.

Moschatus — Dwarf musk plant, pure yellow flowers. 1/- each.

NEPETA: Nervosa — Different growth to N. Mussini. Light blue spikes of bloom; nine inches. 1/- each.

NIEREMBERGIA:

Calycina — Sub shrub, white flowers, tinted lavender. 1/- each.

Rivularis ("The Trailing Cupflower") — A beautiful trailing rock plant. Pure white flowers. 1/- each.

OENOTHERA (Evening Primrose):

Fraseri — Yellow-flowered perennial of long-flowered quality; twelve inches. 1/- each.

Macrocarpa — Large leaved variety. One of the best yellow flowers. 1/- each.

Rosea — Dwarf species, long-flowering; deep rose flowers; nine inches. 1/- each.

Tarifolia (Syn Acaulis) — Fine prostrate species, large flowers open white and turn to pink; very beautiful. 1/- each.

OMPHALODES: Cappadocica — Thrives in half shaded position; dwarf growth of neat tufts of leaves. Beautiful blue forget-me-not flowers. 1/6 each.

PAROCHETUS: Communus ("Blue-flowered Shamrock") — An attractive trailing plant with clover-like foliage. Pretty blue-purple pea-shaped flowers. Semi-shaded position. 1/6 each.

PENTSTEMON (Beard Tongue): Procerus — A lovely species, producing masses of blue-purple flowers on long stems. Strongly recommended for the rock garden. 1/6 each.

PHLOX:

Canadense — Beautiful rock plant, free flowering, lavender-blue. 1/- each.

Subalata rosea — Moss pink; very dwarf, prostrate plant giving masses of rose-pink flowers. An excellent rock subject. 1/- each.

Subalata alba — A pretty white-flowered form of the above. 1/- each.

PHYTEUMA (Rampion):

Betonifolium (Horned Campanula) — Small flat leaves, spikes of deep blue flowers; nine inches. 1/- each.

Serratum — A compact variety. Free flowering heads of blue flowers. 1/- each.

PINK: Joyce Henning Hybrid — Garden Pink. Free flowering, double crimson clove scented; growth about six inches high. 1/- each.

POTENTILLA (Cinquefoil):

Miss Willmott — Lovely rock or border plant. Gives a profusion of cherry-red flowers. 1/- each.

Recta macrantha — A beautiful free flowering rock subject bearing golden yellow flowers. 1/- each.

PRATIA: Angulata — Hardy creeping plant from New Zealand. Bears an abundance of white flowers. 1/- each.

PRIMULA:

Denticulata — A really beautiful lilac-flowered variety. The round heads of flower come early in the spring. 1/- each.

Florindae — Glorious new Chinese variety, growing from four to five feet. The flowers are butter-yellow, and it thrives in a moist or wet place, or rich soil in half shade. 1/- each.

Linda Pope — An old and rare Primula, toothed leaves edged with white meal. Fine head of lavender-blue flowers. 1/- each.

Lilacina plena — The old double lilac-flowered variety of Acaulis type. 1/- each.

Littoniana — A fine violet-purple flowered variety. 1/- each.

PRUNELLA (Self-Heal): Grandiflora rosea — A subject preferring a semi-shaded position. Deep rose-pink flowers. 1/- each.

RAULIA: Tenuicaulis — A compact grey-foliaged carpeting plant. A native of New Zealand. 1/- each.

ROSEMARINUS (Rosemary): Officinalis Prostratus — Hardy evergreen shrub of prostrate nature. The flowers are light purple. Excellent for planting among rocks. 1/6 each.

SAGINEA: Humilis — Very dwarf moss-like vivid green plant with small white flowers. 1/- each.

SALVIA (Sage): Pratense tenori — A variety of this well known family giving beautiful heads of deep blue flowers. 1/- each.

SAPONARIA (Soanwort):

Caespitosa — Pretty trailing habit, red flowers, making a bright show. 1/- each.

Oxymoides — Pretty little trailing plants; useful for rock garden purposes. Produces delicate pink flowers. 1/- each.

STINTON'S "CLAREMONT" ROCK PERENNIALS

SAXIFRAGA (Saxifrage): These are one of our most interesting rock subjects.

The quaint rosettes of foliage and delicate colouring of the flowers give continual interest to the rock gardener. 1/- each.

Aizoon — An easy variety to cultivate; pure white flowers.

Aizoon lutea — Soft yellow, paling to cream.

Cochlearis minor — Rosettes of leaves, very small white flowers.

Cotyledon — Large green rosettes with long arching plumes of white spotted red flowers.

Hostii — A rare species, very flat leaves, white flowers, spotted purple.

Longifolia — Long leaved species. White spotted red.

Primuloides, Elliott's variety — Compact rosettes of London Pride type, from the Pyrenees. Deep pink.

SCUTELLARIA (Skullcap):

Coelestina — New perennial from Siberia, giving racemes of light blue flowers; suitable for rock garden. 1/- each.

Indica Japonica — Small growing rock plant; easy to cultivate; grey foliage; purple flowers. 1/- each.

SEDUM (Stonecrop): Low growing spreading plants; suitable for rock gardens and dry situations; the flowers are in most cases white or blush-white. 6d.

Acre — Forms a dense mat of growth covered in midsummer by bright yellow flowers.

Auriculatum — Attractive little plants, with rosettes of glaucous leaves, pink stems.

Ericoides — Fine foliage; variety of a more upright habit; very excellent for the rock garden.

Glandulosum — Grey foliage, spreading habit, keeping close to ground.

Glaucum — Dwarf spreading foliage, pinkish white flowers.

Obtusatum — One of the attractive yellow-flowered varieties.

Sieboldi — One of the best. Attractive fan-shaped leaves alternated grey leaves, edged pink. Bright pink flowers in Spring.

Spathulatum Roseum — This variety grows to a height of about six inches, having rose-coloured leaves, somewhat rounded in shape and placed alternatively up the stem. Very attractive.

Spurium roseum — This variety is about six inches high; rose-coloured flowers.

Variegatum — A variegated form, with rather dense foliage.

SEMPERVIVUM (Houseleek):

Arachnoideum — Curious little rock subject. Plants form masses of small rosettes covered with fine woolly web. Purple flowers. 1/- each.

SILENE:

Maritima — An excellent wall subject. Good grey foliage. White. 1/- each.

Pusilla — Very dwarf species, pure white. 1/- each.

Schafta — Beautiful rose-pink flowers. Attractive foliage. 1/- each.

SISYRINCHIUM:

Bellum — Pretty blue flowered rock plant that should be in every collection. Each flower is held erect on stems about six inches long. Golden yellow centre to each flower. 1/6 each.

STATICE (Sea Lavender):

Armeria formosa — Resembles the Armeria in growth, pale pink heads of bloom. 6d. each.

Latifolia — Broad leaved blue flowered plant nine inches high. 1/- each.

Minuta — One of the smallest varieties; bright red. 1/- each.

Sinensis — A Chinese variety. Pure yellow. Silver calyx. 1/- each.

THYMUS (Thyme): Dwarf spreading plants; excellent for walls.

Citriodorus (Lemon Thyme) — Yellow and green foliage, with sweet lemon scent, pale mauvy-pink flowers. 6d. each.

Nitidus — Rare variety, purple flowers, greyish foliage. 6d. each.

Nummularifolius — Large round leaves, pale lavender flowers. 6d. each.

Pauciflorus — Very highly perfumed foliage. 6d. each.

Serpyllum Major — Fairly rapid grower; mauve. 6d. each.

Serpyllum Minor — Small leaved variety; excellent grown over rocks. 6d.

Variegatus — This is a pretty variegated form, with true Thyme scent. 6d.

TUNICA:

Saxifraga — Low growing plant, suitable for rockeries; the flowers are delicate blush-pink shade. 6d. each.

VERBENA:

Chamaedryoides — A trailing species from Chile. Plants grow flat on the ground; brilliant scarlet flowers. 1/- each.

VERONICA, Speedwell (Rock species):

Bidwilli — Dwarf foliated plant, large blue flowers. 1/- each.

Incana — Good spikes of blue flowers. Attractive silvery foliage. Fine wall plant. 1/- each.

Lyalli — Dwarf. White flowers veined lilac. 1/- each.

Reptans — One of the best; royal blue. 1/- each.

VIOLA:

Allanah — A striking species bearing masses of rose-magenta flowers six inches high. 1/- each.

Bosniaca — Very small form of bedding Viola. A lovely addition to the rock garden. Rose mauve. 1/- each.

Gracilis — The beautiful rock violet. Dwarf tufted foliage. Very free flowering. 1/- each.

Sylvestris rosea — Very compact, low growing, rose flowered variety; one of the best. 1/- each.

ZAUSCHNERIA:

Californica (Californian Fuchsia) — The brilliant scarlet flowers of this rock subject make it worthy of attention. It thrives in a hot situation. 1/-.

We offer the following suggestions as to suitable subjects for:

WALL PLANTING.

Achillea	Alyssum	Arabis
Campanula	Helianthemum	Dianthus
Erinus	Lychnis	Gypsophila repens
Iberis	Saxifraga	Phlox
Saponaria	Tunica	Silene
Thymes	Viola	Veronica

We offer 12 suitable Wall subjects, one each variety, for 10/6:

PAVED WALKS.

Armeria	Aubretia	Arabis
Campanula	Dianthus deltoides	Veronica
Crassula	Festuca	Cerastium
Sedum	Saxifraga	Nepeta
Thymes	Verbena	Sempervivum

We offer 12 suitable subjects for Paved Walks, one of each variety, for 10/6.

STINTON'S "CLAREMONT"

HERBACEOUS PERENNIALS

It is essential that every garden should have a corner devoted entirely to herbaceous plants. Many new and attractive plants are now obtainable, giving the gardener a continual supply of cut blooms throughout the year.

The area set aside for herbaceous perennials should be carefully prepared. Trench the soil well, working in rotted stable manure or, failing this, some bone meal or blood and bone manure.

A border properly prepared is well worth while, as the results obtained will prove. It is not necessary to replant every year; most perennial plants give better results when left undisturbed. In the summer months a mulching of stable manure is beneficial to them, helping to conserve the moisture in the soil; and it also acts as a preventative of the hot sun rays striking at the root of the plants.

Care should be taken when planting the border. Make sure that the tall plants are placed in the back positions and grade the remainder down, according to the height, never allowing the border to look stiff; work all the plants into the scheme so as to give the best natural effect.

ACHILLEA :

Ptarmica fl. pl. ("The Pearl")—Hardy perennial, giving throughout the summer an abundance of sprays of globular-shaped flowers. Very useful for cutting; grows to a height of two feet. 1/- each.

Millifolium Ruber — This is similar in habit and form to the above, the colouring being magenta red. 1/-.

ACONITUM :

Grandiflorum — Beautiful herbaceous perennial, pale yellow flowers. Thrives well in semi-shaded position. 1/- each.

Grandiflorum album — An attractive white-flowered form of the above. 1/- each.

Napellus (Monk's Hood) — A variety bearing rich blue flowers. 1/- each.

AGAPANTHUS (African Lily):

Umbellatus — Beautiful blue-flowered herbaceous plants. The flowers are placed in a cluster on stems about two feet long. 1/- each.

Umbellatus Candidus — A pure white flowered form of the above. 1/- each.

ALSTROEMERIA (Peruvian Lily):

Aurantica — Showy; free flowering, tuberous plant; orange, spotted brown and crimson. Flowers in summer. 1/- each.

Lutea — Rich clear yellow. 1/6 each.

Psittacina — Crimson, chocolate and green markings. 1/6 each.

Revoluta Majestica — The best variety of all, deep apricot colour; flowers continuously. 2/- each.

ANCHUSA : Blue-flowered herbaceous plants, useful for border purposes and rock-garden work.

Capensis ("Bluebird") — Vivid indigo blue, very rich shade. 3/6 per dozen.

Italica — Clear sky blue. 3/6 per dozen.

Italica Lissadell — Large-flowered, gentian blue 3/6 doz.

ANEMONE (Japanese Windflower):

Japonica — A hardy free flowering perennial, blooming from February to May. The rosy-pink flowers are borne on stems about two or three feet long. This subject thrives in a rich soil and with partial shade. 1/- each.

Japonica alba — Similar to the above, the colouring being pure white. 1/- each.

ANTHEMIS :

Kelwayi — Hardy decorative plant, giving an abundance of lemon-yellow flowers. 6d. each.

Montana — Similar to *Kelwayi*, flowers being purplish-white. 6d. each.

Nobilis (Chamamile) — Single-flowered form, white. 6d.

AQUILEGIA (Columbine):

Chrysantha Grandiflora Alba — White and yellow, long spurred. 3/6 per dozen.

Coerulea — Sky blue, long spurred. 3/6 per dozen.

"Rose Queen" — Rose, long spurred. 3/6 per dozen.

Skinneri — Yellow, tipped green, scarlet, long spurred. 3/6 per dozen.

Long Spurred Hybrids — Fine border plants, useful for cut flowers, wonderful range of colours. 2/6 dozen.

ARTHROPODIUM :

Cirratum — Large green slender leaves. Flowers white, borne in branching panicles. Plants grow from two to three feet high. 1/- each.

ASPHODELUS :

Luteus — Hardy yellow-flowered perennial, good foliage. 1/- each.

Ramosus — White-flowered form. 1/- each.

Lupinus Polyphyllus Hybrids.

Stinton's "Claremont" Herbaceous Perennials

- ASTER** (Michaelmas Daisy): A beautiful class of herbaceous plants, flowering nearly the whole of the summer. A large variety of named sorts is available. 1/- each.
- BAPTISIA**: *Australis* — Tall growing, from two to three feet high. Useful foliage. blue flowers. 1/- each.
- BOCCONIA**: *Japonica* — Cream-flowered perennial. Hardy. Effective among other flowers. 1/- each.
- BOMAREA** (Climbing *Alstroemeria*):
- Multiflora* — A striking variety, bearing masses of flowers. 1/- each.
 - Salsilla* — Green and crimson flowered variety; semi-shaded position. 1/-.
- CAMPANULA** (The Bellflower) — Summer-flowering perennials, with foliage clusters to the ground. Flower spikes rise about two to four feet, bearing pendulous bell-like flowers.
- Alliariaefolia* — Large blue flowers. 1/- each.
 - Celtidifolia* — Showy plant, about three feet high, blue-mauve. 1/- each.
 - Glomerata* — Deep purple, twelve inches high. 1/- each.
 - Nobilis* — A fine flower; white, spotted red. 1/- each.
 - Persicifolia* — Beautiful blue flowers. 3/6 per dozen.
 - Persicifolia Alba* — Pure white. 3/6 per dozen.
 - Persicifolia "Mauve Beauty"* — White, suffused mauve, double. 1/- each.
 - Persicifolia "Telham Beauty"* — Clear sky-blue, large flowers. 6d. each.
 - Urticifolia* (The Nettle-leaved Campanula) — Blue. 1/- each.
- CATANANCHE**: *Coerulea* — Sky-blue perennial. Excellent for cutting. 1/- ea.
- CENTURIA**:
- Babylonica* — One of the useful yellow-flowered perennials. Hardy. 1/- ea.
 - Macrocephala* — Large heads of rich yellow flowers. 1/- each.
 - Montana* (Perennial Bluebell) — Blue. Prized for cutting. 1/- each.
- CEPHALARIA**: *Tartarica* — Belonging to the Scabiosa family; plants produce large heads of golden-yellow flowers. 1/- each.
- CEDRONELLA**: *Cana* — Fragrant plant, bearing an abundance of crimson flowers. 1/- each.
- CERATOSTIGMA**, *Plumbagenoides* — Low growing, trailing plant, about 12 inches high. Rich indigo-blue flowers. Autumn foliage. 1/- each.
- CHELONE**:
- Barbata* — Light scarlet-flowered perennial, similar in growth to the Pentstemon. 1/- each.
 - Barbata Salmonia* — A beautiful pink-flowered form. 1/- each.
- CHRYSANTHEMUM**: *Leucanthemum* — Large, white-flowered herbaceous daisy, excellent for cutting purposes. Suitable for perennial border. 6d. ea., 5/- dozen.
- CIMICIFUGA** (Bugwort): *Racemosa* — Tall growing, thrives well in rich soil. Flowers creamy-white; produced on stems three feet high. Prefers a semi-shaded position. 1/- each.
- CONVALLARIA** (Lily of the Valley): *Majelis* — Attractive clusters of white bell-like flowers; beautiful perfume. 3/6 per dozen.
- CYNOGLOSSUM** (Hound's Tongue): *Amabile* — A perennial with deep blue forget-me-not flowers and rough grey foliage. 3d. each, 2/6 per dozen.
- CYPERUS** (Umbrella Grass): *Alternifolius* — Useful for rock-work, pond or pot culture. 1/- each.
- DAISY** (*Bellis Perennis*): *Monstrosa*, Mixed — Excellent line, large flowers, good colours. 1/- per dozen.
- DICENTRA** (Bleeding Heart): *Exima* (The Ever-blooming Bleeding Heart) — Greyish, ferny foliage, carmine pink flowers. 1/6 each.
- DICTAMNUS** (*Fraxinella*):
- Fraxinella* (Burning Bush) — One of the oldest bordering plants. Very long lived. Rich purple flowers. 1/- each.
 - Fraxinella Alba* — A white-flowered variety. 1/- each.
- DIERAMA** (Fairy Bells): *Pulcherrima* — Beautiful bulbous plants, allied to Sparaxis. The quaint funnel-shaped flowers are rich blood-purple in colour. Tall-growing; elegant spikes of bloom. 6d. each.
- DORONICUM** (Leonard's Bane): *Plantagineum* — An early spring-flowering perennial with low-growing foliage; sends up flower stems about eighteen inches in height. The yellow daisy-like flowers are very attractive and useful for decorative purposes. 1/- each.
- ECHINOPS** (Globe Thistle):
- Bannaticus* — Tall, spiny-foliaged plant. Grey blue flowers. 1/- each.
 - Humilis* — Good, rich blue, growing about three feet high. 1/- each.
 - Ritro* — Strong heads of rich blue colour. 1/- each.
- ERIGERON**:
- Aurantiacus* (Orange Daisy) — Hardy perennial, good deep orange flowers. 1/- each.
 - Mucronatus* — Purple and white. Very free-flowering. 1/- each.
 - Quakeress* — Free-flowering. Rich, rosy lilac. 1/- each.
 - Speciosus* — Beautiful deep mauve. 1/- each.
- ERYNGIUM** (Sea Holly) — The Sea Hollies present the appearance of spiny bushes; the stems, leaves, and bracts are enveloped in coats of silvery-grey or steely blue. The Eryngiums are useful for house decoration in winter; the beautiful blue or silver sheen is retained to perfection if shoots are cut and dried gradually when at their best.
- Alpinum* (Alpine Sea Holly) — Grows to two or three feet in height; large flower heads of splendid steel blue set off by bracts which look like steel or burnished silver. 6d. each.
 - Amethystinum* — Beautiful deep blue flowers, blue stems and bracts. 6d. each.
 - Platum* — Prichards Blue. A fine blue-flowered form. 1/- each.
 - Violeta* — Very attractive variety. 1/- each.
- FRANCOA** (Bridal Wreath): *Ramosa* — A plant loving semi-shaded conditions, prostrate foliage. Flowers white borne on long stems. 1/- each.
- FUNKIA**: *Lineata Alba* — Hardy herbaceous perennial from Japan, producing sprays of white flowers; prefers a dry situation, is also useful as a pot plant. 1/6 each.
- GAILLARDIA** — Sun-loving plants, very hardy and decorative, they may be used in the perennial border with advantage. Good results can be obtained by planting the young side shoots each year.
- Hybrida Grandiflora*, Mixed — Excellent mixture. 1/6 per dozen.
 - Portola Hybrids* — A special strain introducing all shades. 2/6 per dozen.
 - Sanguinea* — Blood red. 2/6 per dozen.
- GERANIUM** (Cranesbill): *Grandiflorum* — Dwarf growth; large blue flowers. 1/- each.
- GEUM**:
- Coccineum* "Mr. J. Bradshaw" — A showy scarlet-flowered, hardy perennial. 1/- per dozen.
 - Gray's Seedling* — Orange scarlet. 1/- each.
 - Orange Queen* — Showy orange flowers. 1/6 per dozen.
- GYPHOPHILA**: *Acutifolia* — Handsome foliage plant; about four feet high, attractive pink flowers. 1/- each.
- HELLEBORUS** (Christmas Rose): *Niger* — Hardy hybrids, flowering in winter and early spring, with single white and purplish flowers. They love shade and manure. 1/6 each.
- HELENIUM**:
- Autumnale* — Good herbaceous perennial, rich yellow flowers. 1/- each.
 - Cupreum* "Crimson Beauty" — Flowers coppery red. 1/- each.
 - Hoopesii* — Orange flowered, excellent herbaceous plant. 1/- each.
 - July Sun* — Clear yellow. 1/- each.
 - Riverton Beauty* — Rich golden yellow, black cone. 1/- each.
 - Wyndley* — Large flowered new hybrid; bronze and yellow; 3 feet. 1/- each.
- HEMEROCALLIS** (Day Lily): *Fulva* — Beautiful orange-flowered perennial; very hardy and will thrive in almost any position. 1/6 each.
- HEUCHERA**: Attractive perennials, giving masses of pink and rose coloured flowers, borne on long stems. Excellent for indoor decoration.
- Carleen* — Very tall. Good heads of lovely carmine flowers. 1/- each.
 - Pauline* — Beautiful shade of rose pink. 1/- each.
 - Prichard's White* — Pure white. 1/- each.
 - Rosea* — Double rose-red. 6d. each.
 - Sanguinea* — Coral scarlet; double; very pretty. 6d. each.
 - Scoresby Pink* — An excellent variety. Attractive shade of pink. 1/- each.
- HELIOPSIS**: *Scabra* — Good yellow-flowered plant, very hardy. 1/- each.
- INCARVILLEA** (Pride of China) *Delavayii* — An attractive bordering plant from China. The flowers come in early summer, being rose-coloured and resembling a Gloxinia in shape. The flower stems are about two feet high above the finely cut prostrate foliage. 1/- each.
- INULA**: *Royleana* — Rough looking plants, though very interesting. Yellow flowers. 1/- each.

Stinton's "Claremont" Herbaceous Perennials

IRIS: Stylosa — This winter-flowering Iris is perhaps one of the most useful plants we have. The pretty china-blue flowers are unsurpassed for decorative purposes. 6d. each, 5/- per dozen.

KNIPHOFIA (Tritoma or Red Hot Poker) — An attractive race of red, orange and yellow-flowered perennial plants; the flowers produced in long spikes on tall stems. Flowers in summer.

Aloides — Orange, yellow and red; six feet. 1/- ea.

Chloris — Greenish-yellow and red; three feet. 1/- ea.

Citrea — Citron-yellow; four feet. 1/- each.

"Diana" — Rose-red and cream; three feet. 1/6 ea.

Ensifolia — Rich yellow; flowers in winter; three feet. 1/- each.

"Goldelse" — Golden-yellow; dwarf; 3 feet. 1/- ea.

"Golden Spire" — Golden, with green tip; four feet. 1/- each.

"Ideale" — Rich crimson; three feet. 1/6 each.

"John Benary" — Rich crimson and yellow; three feet. 1/6 each.

Leichtleni — Vermilion and yellow; four feet. 1/- ea.

Longicollis — Yellow, red and green; six feet. 1/- ea.

Metackii — Crimson and yellow, three feet. 1/- ea.

Pauciflora — Yellow; two feet. 1/- each.

"Prince of Orange" — Orange-red and crimson; four feet. 1/- each.

"Stella" — Yellow and orange; four feet. 1/- each.

Tuckii — Yellow and red; three feet. 1/- each.

"Victor Lemoine" — Red and yellow; strong spike; four feet. 1/- each.

Uvaria — The old red hot poker plant. Red and yellow. 1/- each.

LINARIA (Toadflax):

Macedonia Speciosa — Handsome plant, 2-3 feet high, bright yellow flowers. 1/- each.

Macedonia Speciosa Nymph — Beautiful cream coloured flowers. 1/- each.

LIATRIS: Spicata — Uncommon plant, about two feet high, attractive purple flowers. 1/- each.

LINUM (Flax): Narbonense — Ornamental free flowering perennial; deep blue flowers, one of our best perennial plants. 1/- each.

LOBELIA: Cardinalis — Prefers half-shade; bronze foliage, rich cardinal red flowers. 1/- each.

LUPINUS POLYPHYLLUS (Perennial Lupin): These decorative, tall growing Lurins, in art shades and long flower spikes, are specially recommended for the herbaceous border. The plants are lime lovers. 6d. each, 5/- per dozen.

Elegans — Blue and white.

Harkness Art Shades — A beautiful range of colours.

Downer's Hybrids — An excellent mixture of choice colours.

"Lavender Queen" — Lavender-tinged rose.

Laxton's Hybrids — Wonderful range of colour.

New Perennial Hybrids — Choice mixture of latest colours.

Six Hills, Scented — Great range of colours.

"Tangerine" — Golden-yellow and orange-red.

"Rubin" — Fine crimson.

LYCHNIS (Rose Campion):

Chalcedonica — Brilliant scarlet-flowered perennial; very easy to cultivate. The growth is erect and the large flowers are borne on stems two feet high. 6d. each.

Coronaria Atrosanguinea — Striking perennial, deep crimson. 1/- each.

Coronaria Flos Jovis (Flower of Love) — Good red-flowered variety. 1/- each.

LYTHRUM: Rose Queen — A delightful pink-flowered perennial, very hardy. 1/- each.

MESEMBRYANTHEMUM (Ice Plant): Succulent plants from South Africa. Thrive well in any dry, sunny position. We stock varieties ranging in colours from pale pink, apricot, yellow to bright red. 6d. each, 5/- per dozen.

MONARDA (Horsemint):

Didyma — Pretty scarlet flowers. Good for indoor decoration. 1/- each.

Didyma Rosea — Pink flowered form. 1/- each.

Purpurea — Rich purple. 1/- each.

NEPETA (Cat Mint):

Mussini — A dwarf border or rock plant, giving a dense carpet of lavender-blue flowers in spring and summer. 6d. each.

Ochranica — Tall growing, violet-flowered variety. 1/- each.

OROBUS (Bitter Vetch):

Vernus Roseus — Showy perennial, rose-pink flowers. 1/- each.

Vernus Purpureus — Purple. 1/- each.

PAEONIES: Double-flowered — These beautiful herbaceous plants rival all other garden subjects for individual beauty of flowers and their long lasting qualities as a cut flower. They prefer a good rich soil; rotted cow manure is most beneficial to them. Paeonies should be planted in a sheltered position away from the hot winds and the plants left undisturbed to obtain the best results. We can supply strong roots in shades of deep red, rich pink, rose-pink, pale pink, white and flesh, etc. 2/6 each.

PAPAVER ORIENTALE (Oriental Poppy) — Beautiful perennial poppies; indispensable for the perennial border. 6d. each, 5/- per dozen.

"Beauty of Livermere" — Dark crimson.

Carneum — Beautiful flesh pink.

Dark Crimson — Striking shade.

"Mrs. Perry" — Shrimp pink.

"Mahoney" — Maroon-crimson.

"Princess Victoria Louise" — Salmon-pink.

Perry's White — Satiny white.

"Queen Alexandra" — Salmon-pink, crimson blotch.

"Rembrandt" — Beautiful orange-scarlet.

Mixed Hybrid Varieties — Excellent range of colours.

New Hybrids — Excellent mixture in art shades.

PERENNIAL PHLOX — Hardy free flowering herbaceous plants, giving an abundance of blooms all through the Summer and Autumn. Lift plants in Spring, and give the soil a good supply of manure before replanting. Keep old flowers cut from plants. Plant in open situation and water freely in Summer. The following named varieties are available. 1/- each; 10/- per dozen:

Albion — Pure white; dwarf habit.

Artemis — Large flowered; magenta red; tall robust habit.

Attraction — Bright salmon-pink, with crimson eye; tall habit.

Corot — Silver-lavender; bright rose eye; tall habit; large trusses of flowers.

Dawn — Almond-blossom pink shading to purplish-maroon eye; intermediate habit.

Decussata — Supplied in mixed or named varieties; give an open sunny spot in a well-manured soil.

Meconopsis Baileyi.

MECONOPSIS BAILEYI (Blue Poppy from Tibet).—During the past few years many plants have been introduced into this country but few have been so striking as this introduction. The plants grow easily and vigorously, and the charming flowers, of an arresting shade of blue, are borne on stems two feet high. The blooms last for about three weeks when cut and are excellent for indoor decoration. Very hardy perennial. Will thrive best planted close under a rough rock wall looking to the south. 1/6 each.

Kniphofias add a bright note of colour to the flower border.

Stinton's "Claremont" Herbaceous Perennials

- Echo** — Purple, suffused with lavender; intermediate habit.
- Ecstasy** — Bright salmon-rose, suffused with lavender; vermilion eye; large truss; intermediate habit.
- Endymion** — Pure lavender, pencilled in centre with dwarf habit.
- Fiona** — Pale lavender with bright eye; large truss; purple; large truss; dwarf habit.
- Hebe** — Purplish-rose, with lavender shadings; large flowers and truss; intermediate habit.
- Inspiration** — Deep mauve, faintly pencilled in centre with purple and white; tall habit.
- Iolanthe** — Brilliant vermilion-red; large truss; intermediate habit.
- Isis** — Pale pink, with carmine eye; large truss; tall robust habit.
- Ivanhoe** — Pale rose, suffused with white; intermediate habit.
- Jupiter** — Beautiful golden-salmon, with bright cerise eye; intermediate habit.
- King Lud** — Rosy-crimson; tall robust habit.
- Mars** — Magenta crimson; large truss; tall robust habit.
- Matchless** — Purple-lavender, marked with white in centre; large flowered; tall robust habit.
- Mercury** — Bright rose-pink, suffused with lavender; dwarf habit.
- Murillo** — White, faintly shaded with pink going to a bright eye; dwarf habit.
- Rose Marie** — Lavender rose; bright carmine eye; dwarf habit.
- Royalty** — Rich purple; large truss; tall robust habit.
- Shot Silk** — Bright carmine-rose overlaid with brilliant satin flame; dwarf habit.
- Tara** — Carmine-red, crimson eye; tall robust habit.
- The Gondolier** — Striking shade of rose-pink, with vermilion eye surrounded with pale lavender; large truss; dwarf habit.
- The Whistler** — Bright carmine-purple, shading to vermilion eye; intermediate habit.
- The Yeoman** — Salmon-pink, with bright rosy-red eye; intermediate habit.
- Ulysses** — Rose-pink overlaid with lavender; bright eye; tall robust habit.
- Utopia** — Bright rosy-lavender, with vivid vermilion eye; tall robust habit.
- PHYGELIUS** :
Capensis — Attractive plant of weeping habit. Showy scarlet flowers. 1/- each.
- PHYSOSTEGIA** :
Virginiana — Tall growing perennial, useful for cutting. The mauve-pink flowers are borne on stem about two feet long. Very hardy. 6d. each; 5/- per dozen.
- PINK** :
Mrs. Ethel Pritchard — Free flowering, double, crimson, maroon centre. 1/- each.
J. Manning — Single, crimson and black. 1/- each.
- PLATYCODON** :
Grandiflorum (Chinese Bellflower) — A blue-flowered perennial of striking appearance; very hardy. 1/- each.
Grandiflorum Album — An exquisite white flowered form 1/- each.
- POLEMONIUM**. (Jacob's Ladder) :
Coeruleum — Hardy herbaceous plants; flowers of beautiful shade of blue; will thrive almost anywhere. 1/- each.
- POLYANTHUS**. (Primula Polyantha Hybrids) :
 Low growing perennials, flowering in Winter and early Spring. Plant in a semi-shaded position.
Giant Munstead Strain — Large flowered strain; the colours ranging from pale yellow to clear orange. 3/6 per dozen.
Polyanthus Primrose Hybrids — A bright coloured mixture, very choice. 3/6 per dozen.
"Claremont" Blue Shades — A lovely hybrid strain of these useful plants; vigorous growth. 6d. each. 5/- per dozen.
- POTENTILLA**. (Cinquefoil) :
Fruiticosa — A shrubby evergreen plant, bearing golden-yellow flowers. 1/- each.
- POTERIUM** :
Obtusatum — Useful free flowering plant, producing beautiful feathery plumes of rose-pink flowers, 1/- each.
- PRIMROSE**. (Primula vulgaris and hybrids) :
 Low growing plants, giving an abundance of blooms.
"Claremont" Blue Hybrids — Mixture of blue shades ranging from soft slate blues to vivid indigo shades. 6d. each; 5/- per dozen.
English Primrose — The common yellow primrose; very free flowering. 2/6 per dozen.
Fine Mixed Hybrids — Extra choice mixture, embracing all colours. 3/6 per dozen.
- PYRETHRUM** :
 Showy and useful perennials, with fine feathery foliage.
"James Kelway" — Large, single; bright scarlet, yellow in centre; unsurpassed for cutting purposes. 6d. each; 5/- per dozen.
Marie — Semi-double, deep rose, paling to centre. 1/- each.
Single Rose — Beautiful rose shade; excellent for cutting. 6d. each; 5/- per dozen.
- RHAPANTICUM** :
Pulchrum Major — A very beautiful flowering perennial. The bright crimson flowers make an excellent show of colour. 1/- each.
- RUDBECKIA** :
Californica — A plant bearing bright yellow flowers on stems four to five feet long. 1/- each.
Lacinata — Double yellow flowers, attractive foliage. 1/- each.
Pinnata — Clear yellow. 1/- each.
Purpurea Major — Purple flowered variety. 1/- ea.
- SALVIA**. (Sage) :
Argentea — Silvery foliage; yellow flowers, free flowering. 1/- each.
- SAXIFRAGA** :
Beesiana — Similar to a Megasia. Carmine pink flowers. 1/- each.
Cordifolia — Handsome hardy foliage plant which produces clusters of rose-pink flowers in Winter and early Spring. Flowers last a long time after cutting. Likes a cool situation. 1/- each.
- SCABIOSUS** :
Caucasica — A delightful flower, pale blue, bearing flowers almost the whole year round. One of our most useful perennials for indoor decoration. 1/- each.
Caucasica Alba — A white flowered variety. 1/- each.

Stinton's "Claremont" Herbaceous Perennials.

SCHIZOSTYLIS (Kaffir Lily):

Coccinea — Bulbous plant, bearing erect heads of flag-like blooms of a rich scarlet colour. 1/6 each.

Mrs. Heggarty — Clear salmon-pink; a good autumn flower. 1/6 each.

SHASTA DAISY:

Improved — Pure white flowers over four inches across; long wiry stems; good for cutting; free blooming. 6d. each, 5/- per dozen.

SIDALCEA (Greek Mallow):

Rose Queen — Hardy herbaceous plant, requiring a well drained soil. Pink. 1/- each.

SILENE (Catchfly):

Orientalis — Tall robust growing biennial of neat habit; plants freely branched from base, each carrying a large tubular head of bright rose-pink flowers; excellent for cutting and showy for the herbaceous border; grows to a height of two to three feet. 1/- each.

SOLIDAGO (Golden Rod):

Flexuosa — Golden Wings. Tall, very suitable for back row of herbaceous border. Yellow plumes of flower. Autumn. 5ft. 1/- each.

STOKESIA (Cornflower Aster):

Cyanea — Large flowered blue perennial; very hardy and extremely showy; excellent for the herbaceous border. 1/- each.

THALICTRUM (Meadow Rue or Feathered Coubaine):

Dipterocarpum — Hardy perennial; foliage useful for cutting, as it resembles Maidenhair Fern. Dainty mauve flowers borne in long sprays. 1/- each.

Dipterocarpum Album — A pure white form of the above. 1/- each.

THERMOPSIS:

Caroliniana — A flower resembling the Lupin in form — a good bright yellow. 1/- each.

TROLLIUS (Globe Flower):

Europaeus — Early flowering, perhaps one of the first to flower. Lemon-yellow, 2½ feet. 1/- each.

Ledebouri — Deep orange-yellow, remains in flower longer than T. Europaeus. 2½ feet. Likes a moist position. 1/- each.

VERBASCUM (Mullein):

Bursa — Tall growing, about five-six feet. Silvery foliage, large primrose flowers. 1/- each.

Leianthum — Bright yellow-flowered plant, native of Syria, growing from six to eight feet in height. Very effective. 1/- each.

VERBENA (Verbain):

Bonariensis — A distinct variety of this family, tall growing. Beautiful lavender flower, borne on long slender stems. 1/- each.

VERONICA (Herbaceous Speedwell):

Candida — Shrubby plants, long flowering. Gives abundance of pure white flower sprays. 1/- each.

Maritima Rosea — Pink flowered variety, lives longer than V. Candida. 1/- each.

VIOLET:

Compte de Brazza — This is the best double white violet we have and is a great favourite. 3/6 per dozen.

La France — Single large round petals; colour, metallic blue; flowers carried on long stiff stems and extremely large; a glorious flower. 2/6 dozen.

Lady Hume Campbell — One of the finest double varieties in cultivation; colour similar to Marie Louise; very strong constitution; the foliage is taller and it does not suffer in the hot summer months as do some varieties. 3/6 per dozen.

Lutea — Single flowered type, giving flowers which are orange-yellow in colouring. 1/- each, 10/- per dozen.

Marie Louise — Flowers large and full, delicate blue shading towards the centre; highly scented. 3/6 per dozen.

Mde. Millet — A beautiful variety; the double flowers are a soft shade of blue, deepening towards the centre; similar in form to Marie Louise. 3/6 per dozen.

Mrs. D. Lloyd George — Extra long stems, measuring nine to ten inches; colour rich deep violet-blue, broad stiff petals, small rosette in the centre of each flower, which is white, tinted red. Flowers are of enormous size. 3/6 per dozen.

Neapolitan — Lavender with white centre; very double. 3/6 per dozen.

Princess Mary — Beautiful semi-double flowers, rich violet-blue; a distinct variety. 3/6 per dozen.

Princess of Wales — One of the finest single varieties in cultivation; blooms almost like a Viola; stalks six to eight inches long and standing erect; habit vigorous; colour, decided bright blue; sweet perfume. 2/6 dozen.

STINTON'S "CLAREMONT" LAWN GRASSES

A well kept lawn makes a perfect setting for the house and garden. All preparation work for lawn-making should be very thorough, and deep trenching should be practised. We advocate trenching the soil two feet deep, especially if it be a clay soil. Into the clay should be worked some old manure, leaf mould or any humic matter available. Some bone dust may be added to the soil.

The lawn area must be well drained, otherwise moss and other damp soil troubles will come. After draining and trenching, the soil should be well rolled to make a firm seed bed. While rolling care should be taken to see that the surface is kept perfectly level.

We advocate Autumn sowing for preference; but grass seed may be sown almost at any time, except in extreme Winter. Select a day free from wind for sowing, and lightly sow the seed with soil. Never allow the surface to become dry. Roll the young seedlings quite early, and mow when the blades are growing a few inches in length.

Always keep the lawns cut short; mow them regularly and water well in Summer. Topdress Buffalo and Couch lawns in Spring; all other lawns in Autumn.

Revive lawns with sulphate of ammonia water, using one ounce per gallon per square yard. Note that sulphate of ammonia will kill clovers; so that while it will clean out grass lawns of weeds, it must not be used as a stimulant for clover lawns.

We supply sulphate of ammonia in 5lbs. for 1/6. Quotations for larger quantities.

Grasses for lawns can be supplied as under either separately or in mixtures. We have for sale the following sound, clean and new grass seed: English Rye, 1/- lb.; Irish Rye, 1/- lb.; Kentucky Blue, 3/- lb.; Chewings Fescue, 2/- lb.; Couch Grass, prices on request; Creeping Bent, 2/6 lb.; Crested Dog's Tail, prices on request.

We offer a special mixture for lawns containing any or all of the above in quantities to suit all soils. The seeds are free from foreign weeds, guaranteed germinable, and free from clover.

Clover lawns are made from White Dutch Clover Seed instead of grasses. We supply this in bulk or in small quantities. This Clover may be added to grass mixtures if desired. Price, 2/6 per lb.

Buffalo Grass lawns are eminently suited for light sandy soils. Roots should be planted from September to December. Price, 10/- per bag.

All grass seed prices are subject to market and currency fluctuations, and prices will be forwarded on request.

STINTON'S "CLAREMONT" TUBEROUS BEGONIAS

The Tuberous Begonias are, without a doubt, one of our finest glasshouse subjects. They are easy to cultivate provided that they are attended to correctly. Tuberous Begonias require a good rich fibrous loam to which a little charcoal has been added. Good drainage is essential. Many failures are due to the plants being forced into growth too early after potting.

When the tubers are potted they should be put into a frame over which there is a hessian roller, and allowed to come into growth gradually. We found it to be an advantage not to move the plants into the glasshouse until near the flowering stage.

Begonias will do no good in a badly ventilated house. They require a maximum amount of light and air in order to obtain the most satisfactory results. Begonias grown in a closed glasshouse will become tall and weak, producing only small blooms.

The ideal house for Begonia culture is one with a fairly low roof, having the windows along the sides to open outwards. Ventilators in the roof and under the benches are necessary to ensure an even flow of fresh air around the plants. The glass in the roof should be lightly whitewashed on the inside. The best results can be obtained if the windows are left open night and day. When the flowering season is finished and the foliage has died down, the pots should be laid on their sides underneath the benches and left without water until the growth commences again about October.

Our list includes many of the latest introductions, together with some very excellent mixed lines. Tubers are obtainable from August until October. As we always have a large demand for our Tuberous Begonias, we advise our clients to place their orders early and so avoid disappointment.

Albatross — Large flowered pure white. 10/- each.

Apple Blossom — A charming variety, the colouring of which is best described by its name; shape resembles a lovely formed tea rose; growth very vigorous. 3/6 each.

Black Knight — Flowers of perfect camellia shape, of very dark crimson color, the darkest crimson yet introduced; dwarf in habit and very fine. 15/- each.

Betty Hampton — Coppery old rose with yellow sheen; flowers are a grand rose form; splendid habit. 10/- each.

Brian Langdon — A giant Begonia; immense blooms give the impression of a huge paeony; colour is bright rose-pink. 12/6 each.

C. E. Pearson — Vivid orange-scarlet, with beautifully waved petals; an enormous flower, often 6-7 inches in diameter. 17/6 each.

Corientia — A charming shade of old rose, while the flower is of very deep camellia form; extra large size and frequently reaches 7 inches in diameter; robust growth. 15/- each.

Daybreak — Bright salmon shaded buff and yellow; vigorous and free. 5/- ea.

E. J. Henderson — Bright rich crimson with prettily waved petals; habit dwarf and branching. 7/6 each.

Ethel Schieferdecker — Dark old rose; flower large and of perfect rose shape, beautifully cupped petals; first class. 10/- each.

Florence Bigland — Beautiful apricot, with deeper shade on edges of petals; flowers full and deep; wonderfully vigorous. 12/6 each.

F. C. Calthrop — A rich deep scarlet; the flowers are quite up to exhibition standard; handsome foliage; strong and vigorous habit. 7/6 each.

Grace — A beautiful shade of bright lilac-rose, quite a new colour; the flowers are of loose roseline formation and are freely produced. 3/6 each.

Grand Monarch — Extra large flowered crimson; perhaps the finest crimson yet offered; large flowers of beautiful form, reflexing petals. 3/6 each.

Hilda Langdon — This is undoubtedly the most beautiful Begonia ever offered; the lovely rose-pink flowers are easily 6-7 inches across and of perfect rose form; excellent habit. 7/6 each.

Irene Tampling — A splendid variety; deep fiery orange; extra large and attractive flowers; freely produced. 3/6 each.

King Albert — Rich dark scarlet of superb quality; flowers very large, whilst the bold handsome foliage and splendid habit make a plant of noble proportions. 7/6 each.

Lady Ann — Beautiful shade of pale rose; flowers of extra large size and perfect form. 7/6 each.

Lady Cromer — A superb variety of enormous size; ground colour pearl-pink overlaid with brighter pink, shading to bluish-white at the edges; beautiful waved petals; strong erect habit; vigorous growth. 5/- each.

Lady Rhondda — Another fine addition to the frilled type of double Begonias; beautiful salmon-pink; enormous and beautifully carried on stiff upright stems. 10/6 each.

Louise Arnold — Lovely and unusual shade of blush; one of the finest introductions; blooms 8 inches in diameter are often produced on a plant in a 6 inch pot; habit dwarf and neat. 21/- each.

Lord Lambourne — A noble plant bearing flowers of an unusual shade of deep salmon-orange with lighter shades in the centre; perfect camellia shaped flowers about 5 inches in diameter. 5/- each.

Lucy V. Tonar — A remarkably fine variety of a beautiful dark old rose shade; extra large massive flowers, petals of fine substance and depth. 5/- each.

Madam Tetrazzini — Quite one of the most lovely varieties yet sent out; flowers of an exquisite shade of salmon-pink; large and full, very deep and fleshy petals. 5/- each.

Madame Louise Laroque — Splendid picotee; flowers white with a shade of cream, prettily margined with a wire edge of rose; plant, vigorous and free. 10/- each.

Madam Sarah Grand — Glorious rose-pink, resembles the variety "Lady Ann," but much deeper. 5/- each.

Mrs. R. R. Anderson — Bright rose-pink with distinct spots of white; perfect form; free and vigorous. 5/- each.

Mrs. A. B. Bantock — Beautifully frilled; perfect form; deep rose cerise; habit excellent. A.M. R.H.S. 5/- each.

Mrs. J. B. Butler — Beautiful light salmon; bearing large perfectly shaped flowers, with petals of unusual substance; strong stems; excellent for conservatory and exhibition. 17/6 each.

Mrs. F. Bedford — Extra large flowers of a lovely shade of blush with salmon and flesh shading; large rounded petals; tall grower, throwing flowers well up. 5/- each.

Mrs. E. Bromet — A soft rose-pink; the large flowers are freely produced; free and vigorous growth. 5/- each.

Mrs. J. S. Brunton — This variety possesses every good quality, being a strong and vigorous grower of neat habit; extra large flowers of perfect rose form; the colour is lilac-rose. 5/- each.

Mrs. F. C. Calthrop — One of the most exquisite colours in our collection, being a most beautiful shade of salmon-pink, shading in centre to deeper salmon and buff; the flowers of perfect camellia shape with rounded petals are held well above the foliage. 5/- each.

Mrs. W. C. Cuthbertson — This is generally acknowledged to be one of the most beautiful double Begonias yet raised; the colour is a delightful shade of lilac-rose, the petals being beautifully frilled at the edges. Although the plant is rather small in growth it bears freely extra large flowers of 5-6 inches in diameter. 5/- each.

STINTON'S "CLAREMONT" TUBEROUS BEGONIAS

- Mrs. F. Hedges** — Unique form and colouring, resembling a tea rose with incurving petals; these shade from pink on the edge to glowing orange in centre. 7/6 each.
- Mrs. J. Raeburn Mann** — Deep but bright shade of rose; the form of this beautiful variety is perfect with broad, smooth petals; splendid habit. 12/6 each.
- Mrs. H. Moncrieff** — Colour light rose with deeper colouring on edges of petals, which are beautifully frilled; the flowers are large and very deep; a most lovely variety. 5/- each.
- Mrs. Robert Morton** — A charming combination of colour, the face of the petals being deep lemon-yellow and the reverse bronzy-yellow, giving a rich effect; fine large flowers. 5/- each.
- Mrs. E. Ramsden** — Beautiful shade of reddish old rose; flower like a loosely formed tea rose; growth free; habit excellent. 7/6 each.
- Mrs. J. L. Rushton** — This belongs to the Fimbrinta Plena type and is a rich buttercup yellow; flowers are full and plants extraordinarily large. 5/- ea.
- Mrs. J. Reid** — Lovely shade of pink, a soft yet bright colour, which is very charming, of largest size and great depth. 3/6 each.
- Mrs. T. N. Waldron** — Lovely shade of salmon-cerise, quite unusual; flowers resemble a rose with perfect centre; plant extra vigorous. 12/6 each.
- Mrs. H. Wilson** — Beautiful flower of light carmine red colouring; strong erect growth. 3/6 each.
- Mona** — Fine white, large smooth petals; plant grows very freely. 5/- each
- Pavlova** — A most lovely variety; colour a soft yet deep rich shade of apricot; flowers are perfect in shape and beautifully frilled petals; strong sturdy growth. 5/- each.
- Peace** — Flowers, a lovely shade of cream shading to yellow in centre; the extra large flowers, 5-6 inches in diameter, are carried boldly above the foliage and much resemble a huge rose, being very deep and full. 3/6 each.
- Princess Victoria Louise** — A lovely Begonia, with beautiful flowers of a soft salmon-pink shade; perfect form, enormous size and very deep. 5/- each.
- Queen of the Belgians** — This grand variety produces flowers of an enormous size and of splendid form and substance; the colour is a delightful shade of rich pink; extra strong growth and free branching habit. 12/6 each.
- Ruth Ward** — Rich deep rose-pink; large flowers of splendid formation; the beautifully waved petals and dwarf habit greatly enhance its appearance; a splendid variety. A.M. R.H.S. 12/6 each.
- Salome Blackmore** — Lovely light salmon-pink, being unique, and petals being slightly cupped create a charming effect; growth free; habit rather tall. 10/- each.
- Sidney Robinson** — Soft orange of perfect shape; strong grower; first class habit; fine for exhibition. 5/- each.
- Sir Phillip Sassoon** — Deep carmine red; in fact, the most remarkable Begonia of this shade yet offered; the flowers resemble a rose in form and depth, and the edges of the petals are slightly waved; plant tall and vigorous. 21/- each.

In addition to the above named varieties, we have some excellent double and crested types of tuberous Begonias.

Large flowered double types, heavily frilled, in choice mixture. 2/6 each; 30/- per dozen.

Choice unnamed double flowered varieties, in shades of crimson, rose, salmon, orange, yellow and white. 2/- each; 20/- per dozen.

A splendid assortment of double varieties, including all shades in brilliant mixture. 1/6 each; 15/- per dozen.

Single crested varieties, a strain yielding an abundance of fine blooms. 1/6 each; 15/- per dozen.

A fine display of Tuberous Begonias in the glasshouse of one of our clients.

STINTON'S "CLAREMONT" SUCCULENTS

Most of the varieties contained in this list belong to the group of Mesembryanthema natives of South Africa. They are fast gaining popularity and in the last few years have created a great deal of attention throughout the world.

They thrive in the most arid regions. The more interesting varieties are found in the desert. Owing to the scanty rainfall in those parts, the plants store up water in their fleshy leaves making it possible for them to thrive in periods of drought. They furnish the only supply of water to wild herds of antelopes, ostriches and even the tortoise, in the hot dry weather. Some varieties are very hard to distinguish from their natural surroundings, so closely do they resemble the rock fragments among which they grow, that one would pass them by without seeing them.

These plants will revel in a hot, dry position, out in the full sun and open to all weather conditions. If they are to be grown in pots be sure that plenty of drainage is given to them and the soil is of a light free nature.

AFRICAN SUCCULENTS.

ALOE VARIEGATA—This species has great drought-resisting capacity; the red flowers and variegated foliage are very striking. 3/6 each.

ARGYRODERMA TESTICULARE — Dwarf Stemless Mesem.; very rare. 5/- each.

ARIDARIA RESURGENS — This curious little plant remains hidden underground for the greater portion of the year but in the springtime produces a delightful cluster of yellow blooms which in turn develop into blood red capsules. 3/6 each.

CHEIRODOPSIS CIGARETTIFERA—A dense Mesem-like plant, the base of which resembles a cigarette holder; large yellow flowers. 3/6 each.

CHEIRODOPSIS TUBERCULARIA—Like "C. Cigarettifera"; the growths are covered with minute tubercles. 3/6 each.

COTYLEDON DECUSSATA — The most beautiful bell-shaped red flowers on long slender stems; ornamental foliage. 3/6 each.

CRASSULA PACHYPHYLLA—A single-stemmed dwarf similar to C. Columnaris, producing beautiful and highly scented flowers. 3/6 each.

CYLINDROPHYLLUM BAINII — Plants form clusters of finger-like masses; very attractive. 5/- each.

DELOSPERMA HERBUM — Little clumps of pointed leaves, tinted pink, very interesting; flowers white. 2/6 each.

DIDYMAOTIS LAPIDIFORMIS — One of the rarest of the "stone plants." Consists of two brown stemless stonelike leaves resembling the broken shale among which they grow. 3/6 each.

DIDYMAOTIS (New SP035)—A newly discovered unnamed dwarf variety. 5/-.

EUPHORBIA AGGREGATA — Quaint, square-shaped plants, small spines and leaves growing from centre. 5/- each.

EUPHORBIA MAUNTANUCA — Candle-like stems about 4 inches high, growing in clusters, small leaves. 5/- each.

EUPHORBIA PILLANSII — Very similar in growth to "E. Aggregata." 5/- each.

GIBBAEUM ANGULIPES—Angular autumn-tinted leaves, flowers profusely. 2/6.

GIBBAEUM DISPAR — Dwarf type; dull slate colour, harmonising perfectly with the formation in which it grows. 2/6 each.

GIBBAEUM GEMINUM — A dwarf variety somewhat resembling "G. Pubescens." 2/6 each.

GIBBAEUM MOLLE — A cluster of fleshy nodules which resemble the round stones among which they grow. 3/6 each.

GIBBAEUM PERVERIDAE — A cluster of quaintly shaped leaves of typical Gibbaeum structure. 2/6 each.

GIBBAEUM SHANDII—Very similar in habit and growth to "G. Pubescens." 5/-.

GLOTTIPHYLLUM DEPRESSUM — A handsome, easily grown species; growths short and broad, large golden-yellow flowers, freely produced. 2/6 each.

GLOTTIPHYLLUM (SP042) — All species of this genus make excellent specimens, whether in pots or in a rockery. 2/6 each.

HEREROA CANA — Squat angular earth-coloured leaves which harmonise with their natural surroundings. 5/- each.

HEREROA DOLABRIFORMIS — A dwarf compact plant, leaves round at the base but becoming more and more compressed laterally towards the apex, giving the growths a hatchet-shaped appearance. 3/6 each.

HEREROA STANLEYI — This species produces an abundance of yellow flowers. 2/6 each.

HEREROA (New SP043) — Somewhat larger than "H. Dolabriformis"; flowers profusely. 2/6 each.

Didymaotis Lapidiformis.

MENTOCALYX VELUTINUM — The clusters of golden yellow leaves and large flower of the same colour present a very showy appearance. 5/- each.

MESEMBRIANTHEMUM MELEAGRIS — Small compact bushy growths 2 inches high, russet leaves and mauve flowers. 2/6 each.

MESEMBRIANTHEMUM OBTUSUM — Stunted cluster of twin fleshy leaves; flowers profusely. 2/6 each.

MESEMBRIANTHEMUM PEERSII — Clusters of fleshy leaves in clusters some two inches high. 2/6 each.

PEERSIA MACRANDENIA — Fingerlike growths and very showy when in bloom. 2/6 each.

PLEIOSPILOS FERGUSONII — Rough brown angular fleshy leaves which successfully disguise their presence among the shale of similar structure. 2/6.

PLEIOSPILOS ROODIAE — Somewhat distinct from the usual type of this genus, growths green shading to red during drought; symmetrical, producing a compact clump; flowers yellow. 3/6 each.

RHINOPHYLLUM MUIRII — A cluster of quaint autumn-tinted fleshy leaves, flowers profusely. 2/6 each.

RIMARIA HEATHII — A beautiful stemless Mesem, of shapely form, growths a glossy pale green; makes a fine specimen. 3/6 each.

RIMARIA (New Species 044) — Dwarf; species would make an excellent specimen for pots. 5/- each.

RUSCHIA IMPRESSA — Compact bush habit with curiously shaped leaves and producing a mass of small mauve flowers. 5/- each.

RUSCHIA MICROPHYLLA — Cushion-shaped clusters with minute pointed leaves. Makes a brave show of colour in the springtime. 2/6 each.

RUSCHIA PERFOLIATA — Dwarf variety resembling "R. Crassa." 5/- each.

RUSCHIA PYGMAEUM — Dense clusters of small nodules resembling Conophytum; flowers profusely. 2/6 each.

RUSCHIA (New Sp. 044) — Compact bushy habit, flowers very profusely. 3/6.

RUSCHIA (Unnamed species 044/1) — Quaint dwarf rounded growths of unique appearance. 3/6 each.

RUSCHIA (Unnamed species 044/2) — Clusters of grey pointed foliage forming small rosettes of growth. 3/6 each.

RUSCHIA (Unnamed species 044/3) — A very interesting species, round compact leaves. 5/- each.

STOMATIUM FULLERI — Dwarf pale green growths, peculiarly warted and toothed, flowers freely in spring and early summer. 2/6 each.

STINTON'S FAMOUS "CLAREMONT" DELPHINIUMS

Blue Delphiniums are one of our best perennials for the border. They furnish our gardens with flowers of great beauty, the wide range of blue shades making them especially attractive. We have devoted much time in reselecting our "Claremont" Hybrid Delphiniums, and we consider them to be equal to the finest strains obtainable. Particular care has been taken in making sure that most of the blue shades are well represented in the "Claremont" strains.

The Delphinium is most effective in the garden, the stately heads of blue flowers give a striking effect in the flower border. They can be easily grown from seed, the flowers from the seedlings being equal to the leading hybrid varieties. The "Claremont" Delphiniums are produced under the best conditions. They are all raised in the open seed beds, from which they are rowed out into nursery land, where they are reselected when in bloom. The following strains which we offer include all of the popular blue shades.

BELLADONNA HYBRIDS — A beautiful sky-blue variety of a delicate shade of blue. The pure pale blue flowers are most effective. This is a strain well suited for cut flower purposes. An excellent flower for indoor decoration.

BLACKMORE & LANGDON'S PRIZE STRAIN, MIXED — A beautiful mixture embracing all shades of blue. Some of the lovely opal tints and two-toned blue shades are included in this strain of Delphinium; tall growing and large flower spikes.

"CLAREMONT" MIXED HYBRIDS — Much time has been given to this wonderful "Claremont" strain of Delphiniums. All the shades of blue ranging from pale blue to a deep rich purple-blue, as well as the beautiful amethyst shadings, are represented in this strain. The long spikes of bloom are held well above the foliage, giving a graceful dignity to the flowers. When planted in clumps in the flower border they are most striking.

HOLLYHOCK STRAIN — This is a very tall growing type, giving good spikes of bloom. The flower heads are compact; many dark shades of blue are to be seen in this strain. This is perhaps one of the tallest growing strains of hybrid Delphiniums.

Strong crowns, top size—1/- each, 10/- dozen.

Second size crowns—6d. each, 5/- dozen.

We send our Delphinium crowns out in the months of July and August. It is advisable to order early, as we always have a large demand for our "Claremont" strain of Hybrid Delphiniums.

Delphinium "Claremont" Hybrids

NEW SOUTH WALES, ADELAIDE AND HOBART CUSTOMERS PLEASE NOTE :

We are pleased to announce that Messrs. Austraseed Traders Ltd. of 382-386 Sussex Street, Sydney, are acting as our agents for New South Wales and Queensland; Messrs. Harris Scarfe Ltd. of Grenfell Street, Adelaide, for the Adelaide district; and Messrs. Charles Davis Ltd. of 60-64 Elizabeth Street, Hobart, for the Hobart district. Full stocks of bulbs are carried by them throughout the bulb-planting season.

STINTON'S BULB-PLANTING CHART

This chart has been prepared after much thought, and if followed better displays should result. Careless planting often results in failures, therefore it is essential to at least try to obtain a maximum germination from efforts expended.

Each square represents one inch both ways, giving depth and distance apart.

READ THIS CAREFULLY! — DO NOT CONFOUND THE READING OF THIS CHART.

Each square represents one inch both ways, giving depth and distance apart. In certain positions the matter on above chart is somewhat congested, and we feel we should remind our clients to take care in reading the instructions given in regard to distance apart and depth to plant. Distance apart is marked on ruled line alongside bulb, and depth to plant is read from the top of the chart to bulb.

BULB-PLANTING INFORMATION.

Most bulbs revel in a moist soil, but few of them will stand wet conditions. The soil water must not be allowed to rise to the level of the roots. Such subjects as Hyacinths and Tulips are gross feeders, and have root systems which, in favourable soils, go down to eighteen inches. If the garden is expected to grow all classes of bulbs, the soil must be drained to a depth of not less than two feet. This will ensure porosity of the soil, a warmer soil in winter, a cooler soil in summer, proper ripening of bulbs. Bulbs which are left in the soil for more than one season will not be liable to rot during the hot summer months when heavy waterings soak the soil.

Where the garden is some size, where a good fall obtains, and where there is an outlet for drainage water, drainage is accomplished by laying agricultural tiles at the proper depth, not below the clay, and fifteen feet apart.

In the small garden surrounded by similar allotments, where this is not practicable, a certain measure of efficiency is possible only by deep digging and by mixing some rubble or light material into the sub-soil. Every such garden is a problem in itself, and obviously cannot be dealt with here. Climatic conditions, annual rainfall and soil conditions are so diverse in the great Australian continent that no hard and fast rule regarding the proper depth to plant can be laid down. There is one principle, however, which must be rigidly observed in all locations; that is, good drainage.

The depths indicated on the chart above are calculated for a well worked, medium garden soil, thoroughly drained. For a light, sandy soil, one inch deeper than the indicated depth would not be too deep, and in the case of a very heavy, stiff soil, one inch less would be about right.

TERMS OF BUSINESS

CREDIT TERMS.—To our regular Customers, the terms are cash in thirty days.

REMITTANCES may be made in any form convenient to our Customers. Cheques, Postal Notes and Money Orders should be made payable to Stinton & Son, and in each case should be crossed. When cash is sent by letter, this must, in the Customers' own interests, be registered. Please add exchange to Cheques (Interstate, 1/-).

EARLY ORDERS.—To ensure delivery of best quality Bulbs at the proper time, Customers are earnestly requested to write and have their Bulbs reserved as **early in February** as possible.

STINTON'S BULBS have been carefully grown, under the hardest conditions, in the soils and situations most suited to them. Cultural directions are sent with each variety.

NEW ZEALAND CUSTOMERS are requested to please remit by Cheque, Money Order or Postal Note. Please add 1/- exchange to Cheques.

SUBSTITUTES.—Should the variety ordered be sold out, we shall send in its place the most suitable substitute, unless instructed to the contrary.

UNSIGNED ORDERS.—Letters sometimes reach us without name or address; it is thus impossible to trace the senders. Please write clearly, and state whether Mr., Mrs. or Miss.

ORDER FORM.—The use of this will greatly facilitate the speedy handling and despatch of your order.

BULB, PLANT AND SEED CATALOGUES.—These will be sent, as printed, to our regular Customers. At least two Catalogues are issued each year, and should these fail to reach our Customers a copy will be sent free on request.

ORDER BULBS EARLY.—Each season we have to disappoint Customers who fail to order in good time.

Bring your garden troubles to us and we will help you.
This service is free.

Regd. Trade Mark.

TRADE MARK.—For the protection of our Customers, our Trade Mark appears on all packages, and without which none is genuine.

Ranunculi growing at our Bulb Grounds at Moolap, Victoria (to the right, Iris "Imperator").
